Report description:

North America Prosthetic Heart Valve Market

The North America prosthetic heart valve market was valued at \$3.5 billion in 2023 and is projected to reach \$9.8 billion by 2033, growing at a CAGR of 10.7% from 2024 to 2033.

A prosthetic heart valve is a man-made equipment used to replace the damaged native valves of the human heart. It opens and reopens with each heartbeat, similar to the natural valves, allowing the blood to flow throughout the body efficiently. It is majorly of two types, bioprosthetic and mechanical. A bioprosthetic valve is developed using natural tissues taken from humans or animals. Alternatively, a mechanical valve is made of sturdy materials such as carbon or titanium. The longevity of the device guarantees 20-30 years of operation and lowers the risk of blood clotting close to the valve surface.

The U.S. Census Bureau indicates the geriatric population to grow exponentially by 2030. Since the elderly population remains highly susceptible to heart disorders, the North America prosthetic heart valve market is anticipated to grow significantly in the future. Furthermore, the availability of advanced medical and imaging technologies enables the development of customized valves as per the requirement of each patient. This acts as a key driver of the market. A notable trend gaining prominence in the market for elevating the efficacy of the device is the integration of wireless smart sensors into it. These sensors facilitate real-time monitoring of pressure gradient and blood flow through the heart, which enables early detection of issues after the surgery.

However, the introduction of new surgical methods and valve-associated technologies is a time-consuming process due to the stringent regulatory framework established by governing bodies such as the U.S. Food and Drug Administration. This delays the advent of innovative technologies and hampers the growth of the North America prosthetic heart valve market. On the contrary, expansion of the medical tourism industry in the country is poised to present remunerative opportunities for the market. For instance, a report by Patient Beyond Borders-an advocate of affordable, high-quality medical care for healthcare consumers globally-states that the U.S. is a prime location for inbound medical tourism as the country hosts more than 1.4 million patients

annually, generating a revenue of over \$14 billion. Moreover, cardiology is one of the popular procedures for which foreign patients visit the region. Therefore, the future of the North America prosthetic heart valve market looks promising.[]

Segment Review[]

The North America prosthetic heart valve market is segmented on the basis of product, and country. On the basis of product, it is divided into tissue heart valve, mechanical heart valve, and transcatheter heart valve. Country wise, it is analyzed across the U.S., Canada, and Mexico.[]

Key Findings[]

On the basis of product, the transcatheter heart valve segment held a high share of the market in 2023.[]

Competition Analysis[]

The major players in the global North America prosthetic heart valve market include Abbott Laboratories, Artivion, Inc., Anteris Technologies Ltd., Boston Scientific Corporation, Edward Lifesciences Corporation, JenaValve Technology, Inc., Colibri Heart Valve, Medtronic plc, Meril Life Sciences Pvt. Ltd., and ShockWave Medical, Inc. These major players have adopted various key development strategies such as business expansion, new product launches, and partnerships to strengthen their foothold in the competitive market[]

Additional benefits you will get with this purchase are:

- Quarterly Update and* (only available with a corporate license, on listed price)
- 5 additional Company Profile of client Choice pre- or Post-purchase, as a free update.
- Free Upcoming Version on the Purchase of Five and Enterprise User License.
- 16 analyst hours of support* (post-purchase, if you find additional data requirements upon review of the report, you may receive support amounting to 16 analyst hours to solve questions, and post-sale queries)
- 15% Free Customization* (in case the scope or segment of the report does not match your requirements, 15% is equivalent to 3 working days of free work, applicable once)
- Free data Pack on the Five and Enterprise User License. (Excel version of the report)
- Free Updated report if the report is 6-12 months old or older.
- 24-hour priority response*
- Free Industry updates and white papers.

Possible Customization with this report (with additional cost and timeline, please talk to the sales executive to know more)

- Regulatory Guidelines
- Additional company profiles with specific to client's interest
- Additional country or region analysis- market size and forecast
- Expanded list for Company Profiles
- Historic market data
- Key player details (including location, contact details, supplier/vendor network etc. in excel format)
