

Data Center Insulation Market by Material (Mineral Wool, PU Foam, PE Foam, Polystyrene Foam, Flexible Elastomeric Foam), Insulation Type (Thermal & Acoustic), Application (Wall & Roof, Raised Floors, Pipes & Ducts) and Region - Global Forecast to 2030

Market Report | 2025-02-01 | 224 pages | MarketsandMarkets

AVAILABLE LICENSES:

- Single User \$4950.00
- Multi User \$6650.00
- Corporate License \$8150.00
- Enterprise Site License \$10000.00

Report description:

The data center insulation market is projected to grow from USD 463.6 million in 2024 to USD 1,125.0 million at a CAGR of 15.9% from 2024 to 2030. The data center market is a key driver of the insulation market. Data center insulation is commonly employed in walls and ceilings, raised floors, pipes & ducts, and other areas in data centers to improve performance, and reduce heat gain, and losses caused due to instability of operating temperatures.

"By material, the flexible elastomeric foam segment is estimated to be the largest segment of the data center insulation market from 2024 to 2030."

The flexible elastomeric foam is forecasted to be the largest segment during the forecast period. This is because of its high usability in HVAC systems for its superior thermal insulation performance. Because it is flexible, it can be easily installed on curved surfaces such as those of pipes and ducts, while the closed-cell structure provides a good barrier against moisture absorption thermal performance of the material would, therefore, remain intact over time. It can also be formulated with fire retardants to enhance fire safety. It also offers dependable service in thermal insulation and resistance to moisture in critical systems. Hence, these factors drive the market growth for the flexible elastomeric foam segment.

"By insulation type, thermal insulation is estimated to be the largest segment of the data center insulation market from 2024 to 2030."

Based on insulation type, thermal insulation is projected to account for the highest share in the data center insulation market

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

during the projection period. Effective thermal insulation reduces heat transfer between the data center and its surroundings. This helps maintain a stable internal temperature with minimal energy consumption for heating and cooling. By lowering the energy required to manage temperature, thermal insulation reduces the workload on HVAC systems in data centers.

"From 2024 to 2030, by application, pipes & ducts are expected to be the largest application segment in the data center insulation market."

Pipes & Ducts is estimated to account for the largest share in the data center insulation market during the forecast period based on the application segment. The ducts in data centers carry chilled air which gets lost during transmission. By insulating ducts carrying chilled air, the cooling load on the data center's cooling systems can be reduced. This ensures the cold fluids used for cooling in data centers can maintain their temperature when they reach their destination.

"The Europe region's data center insulation market is projected to have the highest share in 2023."

In 2023, the largest share of the data center insulation market will be contributed by Europe. The region is expected to be the second-fastest-growing market owing to favorable climatic conditions and hence requires more data center setup. Several colocation facilities using data center Insulation solutions across the region are likely to drive market growth. As per the Data Center Map, there are 1317 colocation data centers present in 23 Western European countries. This rapid adoption of AI and IoT increases the demand for edge computing and, therefore, edge data center deployment in the region.

Profile break-up of primary participants for the report:

-□By Company Type: Tier 1 - 20%, Tier 2 - 40%, and Tier 3 - 40%

-□By Designation: C-level Executives - 10%, Directors - 70%, and Others - 20%

-□By Region: North America - 45%, Europe -20%, Asia Pacific - 25%, and South America-5%, Middle East & Africa-5%

The Data center insulation report is dominated by players such as

Armacell (Luxembourg), Kaimann (Germany), Johns Manville (US), Kingspan Group (Ireland), Owens Corning (US), Boyd (US), ROCKWOOL A/S (Denmark), Sika AG (Switzerland), Supreme (India), IAC Acoustics UK Ltd. (UK), Ventac (Ireland), Aeroflex Company Limited (Thailand), Huamei Energy-saving Technology Group Co., Ltd. (China), and L'ISOLANTE K-FLEX S.p.A. (Italy) and others.

Research Coverage:

The report defines, segments, and projects the data center insulation market size based on product, process, end-use, and region. It strategically profiles the key players and comprehensively analyzes their market share and core competencies. It also tracks and analyzes competitive developments, such as expansions, agreements, and acquisitions undertaken by them in the market.

Reasons to Buy the Report:

The report is expected to help the market leaders/new entrants by providing them with the closest approximations of revenue numbers of the data center insulation market and its segments. This report is also expected to help stakeholder businesses and the market's competitive landscape better, gain insights to improve the position of their companies, and make suitable go-to-market strategies. It also enables stakeholders to understand the market's pulse and provides information on key market drivers, restraints, challenges, and opportunities.

The report provides insights on the following pointers:

- Analysis of key drivers (Growing global data center market, growing pressure on acoustic insulation of data center buildings, Sustainability pressure for improved PUE and lower carbon emissions, Efficient and effective insulation), restraints (High initial cost, Difficulty in applying insulation on complex structures and shapes, and space constraints due to leaks, condensation, and moisture), opportunities (Increasing installation of generative AI-based mega data centers, Need for efficient insulation for cooling, Rising power densities in HPC, AI, and crypto mining), and challenges (Substitution threat from alternative materials, such as mineral fiber ceilings, roof coatings, and reflective panels) influencing the growth of the data center insulation market.

- Market Development: Comprehensive information about lucrative markets - the report analyses The data center insulation market is across varied regions.

- Market Diversification: Exhaustive information about new products & services, untapped geographies, recent developments, and investments in the data center insulation market.

- Competitive Assessment: In-depth assessment of market shares, growth strategies, and service offerings of leading players Armacell (Luxembourg), Kaimann (Germany), Johns Manville (US), Kingspan Group (Ireland), Owens Corning (US), Boyd (US), ROCKWOOL A/S (Denmark), Sika AG (Switzerland), Supreme (India), IAC Acoustics UK Ltd. (UK), Ventac (Ireland), Aeroflex Company Limited (Thailand), Huamei Energy-saving Technology Group Co., Ltd. (China), and L'ISOLANTE K-FLEX S.p.A. (Italy) among others in the data center insulation market.

Table of Contents:

1	INTRODUCTION	23
1.1	STUDY OBJECTIVES	23
1.2	MARKET DEFINITION	23
1.3	STUDY SCOPE	24
1.3.1	MARKETS COVERED	24
1.3.2	INCLUSIONS AND EXCLUSIONS OF STUDY	25
1.3.3	YEARS CONSIDERED	25
1.3.4	CURRENCY CONSIDERED	26
1.4	RESEARCH LIMITATIONS	26
1.5	STAKEHOLDERS	26
2	RESEARCH METHODOLOGY	27
2.1	RESEARCH DATA	27

4.4	DATA CENTER INSULATION MARKET, BY KEY COUNTRY	42
?		
5	MARKET OVERVIEW	43
5.1	INTRODUCTION	43
5.2	MARKET DYNAMICS	43
5.2.1	DRIVERS	44
5.2.1.1	Growing global data center market	44
5.2.1.2	Growing need to reduce noise levels	45
5.2.1.3	Increased focus on sustainability for better power usage effectiveness & lower carbon emissions	46
5.2.1.4	Growing demand for efficient and effective insulation	46
5.2.2	RESTRAINTS	46
5.2.2.1	High initial cost of implementing advanced insulation systems	46
5.2.2.2	Challenges leading to insulation failure	47
5.2.2.3	Lack of awareness	47
5.2.3	OPPORTUNITIES	47
5.2.3.1	Increasing installation of GenAI-based mega centers	47
5.2.3.2	Generative AI to fuel demand for dense racks and efficient insulation implementation	48
5.2.4	CHALLENGES	49
5.2.4.1	Alternative materials, such as mineral fiber ceilings, roof coatings, and reflective panels	49
5.2.4.2	Substitution of metal insulated pipes with self-insulated advanced plastics/polymer pipes within data centers	49
5.3	MACROECONOMIC OUTLOOK OF DATA CENTER INSULATION MARKET	49
5.4	GLOBAL ECONOMIC GROWTH AND GDP TRENDS	50
5.4.1	ENERGY PRICES	51
5.4.2	INFLATION	52
5.5	VALUE CHAIN ANALYSIS	53
5.5.1	DATA CENTER INSULATION MARKET: DETAILED VALUE CHAIN ANALYSIS	53
5.6	ECOSYSTEM ANALYSIS	55
5.7	PORTER'S FIVE FORCES ANALYSIS	57
5.7.1	BARGAINING POWER OF SUPPLIERS	58
5.7.2	BARGAINING POWER OF BUYERS	58
5.7.3	THREAT OF NEW ENTRANTS	58
5.7.4	THREAT OF SUBSTITUTES	59
5.7.5	INTENSITY OF COMPETITIVE RIVALRY	59
5.8	KEY STAKEHOLDERS AND BUYING CRITERIA	59
5.8.1	KEY STAKEHOLDERS IN BUYING PROCESS	59
5.8.2	BUYING CRITERIA	60
