### **Report description:**

The Global Sodium Cocoyl Isethionate Market reached a valuation of USD 226.1 million in 2024 and is forecasted to grow at a CAGR of 5.7% between 2025 and 2034. Known for its versatility and gentle cleansing properties, sodium cocoyl isethionate is a surfactant derived from coconut oil that finds widespread application in personal care products. Its ability to cleanse effectively without stripping natural oils makes it an ideal ingredient for sensitive skin formulations. Increasing consumer preference for natural and mild personal care ingredients has significantly contributed to its growing demand. The ongoing shift towards clean beauty, eco-friendly formulations, and sulfate-free products further propels its adoption across various applications. As consumers become more environmentally conscious, the demand for plant-derived and biodegradable components, including sodium cocoyl isethionate, is set to expand. The growing awareness of skincare routines and the rising disposable incomes in emerging markets are also driving market growth.

The powdered form of sodium cocoyl isethionate commanded a significant share of USD 124.5 million in 2024 and is projected to grow at a 5.7% CAGR through 2034. Its popularity stems from its stability, ease of use, and compatibility with a wide range of formulations. Manufacturers appreciate its convenience for producing solid products and its ability to blend seamlessly into various applications. Its lightweight nature and suitability for sustainable packaging further enhance its appeal to brands focused on eco-friendly practices.

In the hair care sector, sodium cocoyl isethionate generated USD 79.2 million in revenue in 2024 and is anticipated to grow at a CAGR of 5.7% during the forecast period. Its mildness and foaming properties make it a preferred choice for shampoos and conditioners. By supporting sulfate-free formulations and maintaining natural scalp oils, it meets the rising consumer demand for products catering to sensitive and dry hair types. The ingredient's sustainable sourcing and biodegradable nature align with the growing interest in clean and green beauty solutions, solidifying its position as a vital component in hair care innovation.

China emerged as the leading market in the Asia Pacific region, with a valuation of USD 35.3 million in 2024 and an expected

CAGR of 4.5% from 2025 to 2034. The country's strong production capabilities and extensive supply chain infrastructure position it as a global hub for personal care ingredients. Increasing demand for personal care products, supported by evolving beauty trends and higher disposable incomes, further strengthens its dominance. Additionally, China's commitment to sustainable and clean beauty practices continues to drive the market forward, solidifying its influence on the global sodium cocoyl isethionate industry.
