Report description:

Generics in Italy

Summary

Generics in Italy industry profile provides top-line qualitative and quantitative summary information including: market share, market size (value and volume 2018-23, and forecast to 2028). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

Key Highlights

- A generic drug is defined as a copy of an ethical (prescription) drug formerly protected by patents that have now expired. Both unbranded generics and branded generics are included in our market scope. However, off-patent drugs that continue to be offered by the original manufacturer under the original name, and which form part of the 'generic-eligible' market, are not included. Market value is evaluated at ex-factory prices. Market volume refers to the proportion of the total ethical pharmaceutical market in a country or region that is made up of generic drugs. Thus, it is a measure of the market share held by generics, rather than a direct measure of the total market volume. Regional volumes are calculated as averages of countries that comprise the region where volume data exists.
- The Italian generics market recorded revenues of \$1.5 billion in 2023, representing a compound annual growth rate (CAGR) of 2.8% between 2018 and 2023.
- Market consumption volume increased with a CAGR of 1.9% between 2018 and 2023, to reach a total of 31.0% of total pharma volume in 2023.
- The Italian generics market is supported by the new guidelines which streamline the pricing, reimbursement, and approval processes for generics and biosimilars.
