

**Silicone Fluids Market by Type (Straight, Modified), End-Use Industry (Personal Care & Beauty, Textiles, Automotive & Transportation, Industrial, Building & Construction), Region - Global Forecast to 2032**

Market Report | 2025-02-25 | 241 pages | MarketsandMarkets

**AVAILABLE LICENSES:**

- Single User \$4950.00
- Multi User \$6650.00
- Corporate License \$8150.00
- Enterprise Site License \$10000.00

**Report description:**

The global silicone fluids market is projected to grow from USD 6.71 billion in 2024 to USD 10.03 billion by 2032, at a CAGR of 4.4 % during the forecast period. Increasing demand from various industries such as automotive & transportation, personal care & beauty, industrial, textiles, etc., rapid technology development, and a growing focus on sustainability, the future of the silicone fluids in the coming years are promising. End-use industries like cosmetics, automotive, construction, electronics, and healthcare are offering vast opportunities for market growth. The increased demand for silicone fluids anticipated from the personal care industry further enhances their application due to excellent spreadability and easy handling together with their smooth feel and water resistance, with consumers now switching to premium-grade skincare and haircare solutions. The automotive industry, on the other hand, has turned into a potential market for the application of silicone fluids with the inception of the EV era and the surging demand for specialized lubricants, thermal management solutions, and durable coatings.

"Straight are projected to be the second largest segment by type in silicone fluids market"

The straight type silicone fluids ranked second in the global silicone fluids market. It is due to its extensive demand in multiple end-use industries, such as personal care, automotive, construction, and electronics. The fluids with a highly pure silicone polymeric composition and no significant modification are characterized by high thermal stability, good lubricity, very low surface tension, and good water-repellent characteristics. Their capacity to retain viscosity over a broad temperature range renders them highly suitable for industrial lubricant applications, foaming agent applications, and as release agents in manufacturing.

"Automotive & transportation is projected to be the second largest segment by end-use industry in silicone fluids market"

The automotive and transportation industry was the second-largest contributor to the global silicone fluids market, on account of

www.scotts-international.com

the increasingly high demand from end-users for performance-enhancing materials in vehicles, which result in greater durability, efficiency, and safety. Silicone fluids are becoming an important part of an automotive application due to their excellent thermal stability, lubrication properties, repellency to water, and resistance to chemicals. The fluids thus used in automotive lubricants are said to be able to lessen frictional forces, increase fuel economy, and extend the life of vital parts in engines and transmissions as well as in braking systems. In terms of thermal management, silicone fluids are designed to work with coolants, heat transfer fluids, and dielectric fluids so that these vehicles prevent overheating in internal combustion engines (ICEs), hybrid vehicles, and electric vehicles (EVs). With the advent of both electric mobility and autonomous driving technologies, there is an increasing requirement for sophisticated silicone-based coatings, sealants, and insulating materials, in particular for their use in protecting the battery pack, sensors, and electronic control units (ECUs) from moisture and dust, as well as extreme temperatures.

"North America counts for the second-largest share in silicone fluids market by region"

Silicone fluids market in the North American region registered the second-highest share due to considerable demand from key industries such as automotive, personal care, construction, electronics, and healthcare. The growth of silicone fluids is economically bolstered by an established region-wide industrial base, technical advancement, and high consumer spending. The majority of silicone fluids in North America are consumed by the U.S.A. owing to the high demand from the applications in the personal care and cosmetics market wherein silicone fluids are used extensively in formulating skin care, hair care, and make-up products, owing to properties such as smooth texture, excellent spreadability, and moisture retention. Also, with the booming automotive sector, particularly the growing focus on electric vehicle (EV) adoption, silicone fluids will find growing use in lubricants, coatings, and thermal management solutions.

By Company Type: Tier 1: 25%, Tier 2: 42%, and Tier 3: 33%

By Designation: C-level Executives: 20%, Directors: 30%, and Others: 50%

By Region: North America: 20%, Europe: 10%, Asia Pacific: 40%, South America: 10%, Middle East & Africa 20%

Notes: Others include sales, marketing, and product managers.

Tier 1: >USD 1 Billion; Tier 2: USD 500 million-1 Billion; and Tier 3: <USD 500 million

Companies Covered: Dow (US), Wacker Chemie AG (Germany), Elkem ASA (Norway), KCC Corporation (South Korea), and Shin-Etsu Chemical Co., Ltd. (Japan), and others are covered in the silicone fluids market.

The study includes an in-depth competitive analysis of these key players in the silicone fluids market, with their company profiles, recent developments, and key market strategies

Research Coverage

This research report categorizes the silicone fluids market by type (straight, modified), end-use industry (personal care & beauty, automotive & transportation, industrial, textiles, building & construction, others) and by region (Asia Pacific, North America, Europe, South America, and Middle East & Africa). The scope of the report covers detailed information regarding the major factors, such as drivers, restraints, challenges, and opportunities, influencing the growth of the silicone fluids market. A detailed analysis of the key industry players has been done to provide insights into their business overview, solutions, and services; key strategies, agreements, new product launches, acquisitions, and recent developments associated with the silicone fluids market. Competitive analysis of upcoming startups in the silicone fluids market ecosystem is covered in this report.

Reasons to buy the report

The report will help the market leaders/new entrants in this market with information on the closest approximations of the revenue numbers for the overall silicone fluids market and the subsegments. This report will help stakeholders understand the competitive landscape and gain more insights to position their businesses better and to plan suitable go-to-market strategies. The report also helps stakeholders understand the pulse of the market and provides them with information on key market drivers, restraints, challenges, and opportunities.

The report provides insights on the following pointers:

- Analysis of key drivers (Growth in automotive sector, high demand for silicone fluids in personal care & beauty industry, superior dielectric properties of silicone fluids), restraints (Stringent regulatory policies for silicone fluids, higher production cost of silicone

fluids), opportunities (High potential in healthcare applications, development of bio-based silicone fluids), and challenges (Unpredictability of raw material prices).

- Product Development/Innovation: Detailed insights on upcoming technologies, research & development activities, and new product & service launches in the silicone fluids market

- Market Development: Comprehensive information about profitable markets - the report analyses the silicone fluids market across varied regions.

- Market Diversification: Exhaustive information about new products & services, untapped geographies, recent developments, and investments in the silicone fluids market.

- Competitive Assessment: In-depth assessment of market shares, growth strategies, and service offerings of leading players Dow (US), Wacker Chemie AG (Germany), Elkem ASA (Norway), KCC Corporation (South Korea), and Shin-Etsu Chemical Co., Ltd. (Japan) among others in the silicone fluids market.

## **Table of Contents:**

1	INTRODUCTION	24
1.1	STUDY OBJECTIVES	24
1.2	MARKET DEFINITION	24
1.3	STUDY SCOPE	25
1.3.1	MARKETS COVERED AND REGIONAL SCOPE	25
1.3.2	INCLUSIONS AND EXCLUSIONS	26
1.3.3	YEARS CONSIDERED	26
1.4	CURRENCY CONSIDERED	26
1.5	UNIT CONSIDERED	27
1.6	SUMMARY OF CHANGES	27
2	RESEARCH METHODOLOGY	28
