- Multi-User License \$4500.00
- Custom Research License \$7000.00

Report description:

The India Foliar Fertilizer Market was valued at USD 2.65 billion in 2024 and is projected to reach USD 3.53 billion by 2030, growing at a CAGR of 4.86% during the forecast period. This sector has experienced rapid expansion within India's agricultural industry. Foliar fertilizers, which are plant nutrients applied directly to crops' leaves, provide essential nutrients for optimal growth and development. Their popularity has surged in recent years due to their advantages, including improved nutrient absorption, faster results, and reduced nutrient wastage compared to traditional soil-based fertilization methods.

A major driver of this market's growth is the increasing demand for higher agricultural yields to meet the needs of India's growing population. Farmers are increasingly turning to foliar fertilizers to enhance crop productivity and improve the quality of their produce. Additionally, India's diverse agricultural environment, spanning from rice and wheat to fruits and vegetables, makes foliar fertilizers a versatile solution for various crops. The market is diverse, offering liquid, powder, and granule formulations, each tailored to different crop types and growth stages. Manufacturers are focusing on research and development to create innovative, efficient products that address the specific nutritional needs of various crops, further fueling market growth.

Government initiatives promoting sustainable agricultural practices and reducing the use of chemical fertilizers and pesticides have also played a crucial role in supporting the market. These policies not only aim to increase crop yields but also to improve soil health and minimize the environmental impact of conventional farming methods. Despite the market's growth, challenges remain, including educating farmers on proper usage, ensuring product quality and consistency, and managing price volatility.

Key Market Drivers:

Growing Demand for Enhanced Crop Productivity

The India Foliar Fertilizer Market has been significantly driven by the rising demand for improved crop productivity. India's

agricultural sector faces immense pressure to meet the needs of its billion-plus population. In response, farmers are increasingly relying on foliar fertilizers to boost crop yields and enhance product quality. These fertilizers offer a quick and efficient means of delivering essential nutrients directly to plants, leading to healthier, more productive crops.

The pressure to increase agricultural output is driven by the need to consistently produce high-quality crops at large volumes. Foliar fertilizers are particularly advantageous during critical growth stages, offering faster and more precise nutrient delivery than traditional soil fertilization methods. This ability to provide immediate results is crucial in addressing nutrient deficiencies, environmental stress, and sudden weather changes that can adversely affect crops. Additionally, foliar fertilizers' versatility makes them suitable for India's diverse agricultural landscape, allowing farmers to tailor fertilization to the specific needs of various crops, from staple grains like rice and wheat to high-value horticultural products like fruits and vegetables.

Key Market Challenges:

Quality Control and Consistency

The India Foliar Fertilizer Market is characterized by a broad range of manufacturers, including both large, established companies and smaller, less-regulated producers. This diversity can lead to inconsistent product quality and safety standards. Some manufacturers prioritize cost reduction over quality, potentially compromising the effectiveness of their products. Furthermore, the regulatory environment for foliar fertilizers in India is relatively lenient compared to other agricultural inputs, allowing substandard products to enter the market. The absence of stringent quality control measures increases the risk of counterfeit or low-quality products, which can negatively affect crop performance and harm the environment. Farmers often face difficulty distinguishing between legitimate and counterfeit products, leading to uncertainty and poor decision-making. Inconsistent fertilizer formulations and varying nutrient content across different products can also cause unpredictable outcomes, impacting crop health and yield.

Key Market Trends:

Technological Advancements and Product Innovation

Technological innovations and product developments are playing a vital role in the expansion of the India Foliar Fertilizer Market. Significant research and development in the sector have led to the creation of advanced formulations and application technologies. One notable example is the partnership between KRIBHCO and Novonesis in September 2024, which resulted in the introduction of "KRIBHCO Rhizosuper," a Mycorrhizal Biofertilizer enhanced with Novonesis' proprietary LCO (Lipo-chitooligosaccharides) Promoter Technology, aimed at boosting crop productivity and soil health for Indian farmers. Manufacturers are increasingly investing in research to better understand crop-specific nutritional needs and regional variations. This has led to the development of tailored foliar fertilizer formulations designed for specific crops and agro-climatic zones, optimizing plant nutrition for improved crop yields. In addition, technological advancements in delivery systems, such as precision spraying equipment, drones, and automated application technologies, are allowing for more accurate and efficient application of foliar fertilizers. These innovations minimize waste, maximize nutrient absorption, and improve the overall effectiveness of fertilization.

Key Market Players:

- [] Zuari Agro Chemicals Ltd.
- [] Indian Farmers Fertiliser Cooperative Limited
- [] Coromandel International Limited
- [] Deepak Fertilisers and Petrochemicals Corporation Ltd. (DFPCL)
- [] The Fertilisers and Chemicals Travancore Limited (FACT)
- [] Gujarat State Fertilizers & Chemicals Limited
- [] Mahafeed Speciality Fertilizers (India) Pvt. Ltd.
- [] Madras Fertilizers Limited
- [] Paradeep Phosphates Ltd.
- [] DCM Shriram Ltd.

Report Scope:

This report segments the India Foliar Fertilizer Market into the following categories, alongside detailed industry trends:

- [] By Product:

Scotts International. EU Vat number: PL 6772247784

- o□West
- o□South

Competitive Landscape:

Company Profiles: The report includes an in-depth analysis of major companies within the India Foliar Fertilizer Market.

Available Customizations:

TechSci Research offers customized reports based on the specific needs of companies. Customization options include:

- Detailed analysis and profiling of additional market players (up to five).

Table of Contents:

1. Product Overview
 - 1.1. Market Definition
 - 1.2. Scope of the Market
 - 1.2.1. Markets Covered
 - 1.2.2. Years Considered for Study
 - 1.2.3. Key Market Segmentations
2. Research Methodology
 - 2.1. Objective of the Study
 - 2.2. Baseline Methodology
 - 2.3. Key Industry Partners
 - 2.4. Major Association and Secondary Sources
 - 2.5. Forecasting Methodology
 - 2.6. Data Triangulation & Validations
 - 2.7. Assumptions and Limitations
3. Executive Summary
 - 3.1. Overview of the Market
 - 3.2. Overview of Key Market Segmentations
 - 3.3. Overview of Key Market Players
 - 3.4. Overview of Key Regions/Countries
 - 3.5. Overview of Market Drivers, Challenges, Trends
4. Voice of Customer
5. India Foliar Fertilizer Market Outlook
 - 5.1. Market Size & Forecast
 - 5.1.1. By Value
 - 5.2. Market Share & Forecast

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

- 5.2.1. By Product (Mineral Liquid/Suspension Foliar Fertilizers, Biostimulants, Combinations of Biostimulants with Mineral Fertilizer Components)
- 5.2.2. By Application (Horticulture Openfield, Horticulture Greenhouse, Field Crops, Turf & Ornamental, Others)
- 5.2.3. By Region
 - 5.2.3.1. By State (Top 3 States)
- 5.2.4. By Company (2024)
- 5.3. Market Map
- 6. North India Foliar Fertilizer Market Outlook
 - 6.1. Market Size & Forecast
 - 6.1.1. By Value
 - 6.2. Market Share & Forecast
 - 6.2.1. By Product
 - 6.2.2. By Application
- 7. West India Foliar Fertilizer Market Outlook
 - 7.1. Market Size & Forecast
 - 7.1.1. By Value
 - 7.2. Market Share & Forecast
 - 7.2.1. By Product
 - 7.2.2. By Application
- 8. South India Foliar Fertilizer Market Outlook
 - 8.1. Market Size & Forecast
 - 8.1.1. By Value
 - 8.2. Market Share & Forecast
 - 8.2.1. By Product
 - 8.2.2. By Application
- 9. East India Foliar Fertilizer Market Outlook
 - 9.1. Market Size & Forecast
 - 9.1.1. By Value
 - 9.2. Market Share & Forecast
 - 9.2.1. By Product
 - 9.2.2. By Application
- 10. Market Dynamics
 - 10.1. Drivers
 - 10.2. Challenges
- 11. Market Trends & Developments
 - 11.1. Merger & Acquisition (If Any)
 - 11.2. Product Launches (If Any)
 - 11.3. Recent Developments
- 12. India Foliar Fertilizer Market: SWOT Analysis
- 13. Porter's Five Forces Analysis
 - 13.1. Competition in the Industry
 - 13.2. Potential of New Entrants
 - 13.3. Power of Suppliers
 - 13.4. Power of Customers
 - 13.5. Threat of Substitute Products
- 14. Competitive Landscape
 - 14.1. Zuari Agro Chemicals Ltd
