- Multi-User License \$5500.00
- Custom Research License \$8000.00

Report description:

Global Smart Elevator Market Overview

The global smart elevator market is valued at USD 19.46 billion in 2024 and is projected to reach USD 35.30 billion by 2030, registering a Compound Annual Growth Rate (CAGR) of 10.27% from 2024 to 2030. The accelerating pace of urbanization and the increasing construction of high-rise buildings are driving the demand for advanced vertical transportation solutions. Additionally, the rising emphasis on energy efficiency and sustainability is promoting the development of eco-friendly, smarter elevator systems. Technological advancements, particularly in the Internet of Things (IoT) and Artificial Intelligence (AI), are enhancing functionality, enabling predictive maintenance, and improving the overall user experience. The growing focus on building security and access control is further fueling market growth. Furthermore, the aging population's need for better accessibility is driving demand, as smart elevators offer enhanced convenience and ease of use. The trend toward smart buildings and smart cities also supports the adoption of smart elevator technologies.

Key Market Drivers: Urbanization and Technological Advancements

The rapid urbanization and continuous technological advancements are the primary drivers behind the growth of the smart elevator market. As urban areas expand and population density increases, the need for efficient, reliable vertical transportation in

www.scotts-international.com

high-rise buildings becomes more critical. The construction boom, including skyscrapers and multi-story residential complexes, demands advanced elevator systems capable of handling higher passenger volumes while maintaining safety and operational efficiency. Smart elevators, integrated with destination control systems and predictive maintenance capabilities, optimize travel routes and minimize downtime through real-time diagnostics and maintenance alerts.

Technological advancements play a key role in the evolution of smart elevators. The integration of IoT technology allows for continuous monitoring and data collection, enhancing elevator functionality and reliability. AI and machine learning algorithms further optimize performance by analyzing usage patterns and predicting maintenance needs, resulting in reduced wait times and energy consumption. Additionally, improvements in materials and design contribute to the development of more sustainable, energy-efficient elevator systems, supporting global efforts to reduce carbon footprints and promote green building practices. According to the United Nations, by 2050, 68% of the world's population will reside in urban areas, with an additional 2.5 billion people expected to move to cities.

Key Market Challenges: High Initial Costs and Maintenance Complexities

Despite the advantages, one of the significant challenges facing the smart elevator market is the high initial installation cost and ongoing maintenance expenses. Smart elevator systems, which incorporate advanced technologies like IoT, AI, and sophisticated security features, require substantial investment. The upfront capital expenditure for these systems is significantly higher compared to traditional elevators, which can be a financial barrier for small and medium-sized enterprises (SMEs) or developers with limited budgets. Additionally, retrofitting existing buildings with smart elevator systems involves substantial modifications, further escalating costs.

Ongoing maintenance of smart elevators also presents challenges. Although these systems are designed to enhance performance and reduce downtime, they require specialized skills and expertise for repairs and maintenance. The complexity of the integrated technologies means that standard elevator maintenance teams may lack the required knowledge, leading to a reliance on highly skilled technicians. This specialized maintenance can be costly and may not be readily available in all regions. Furthermore, the continuous need for software updates and cybersecurity measures to protect against potential breaches adds to operational costs, making widespread adoption more challenging.

Key Market Players:

- Hitachi, Ltd.
- TK Elevator GmbH
- Schindler Holding Ltd.
- Otis Worldwide Corporation
- KONE Corporation
- Mitsubishi Electric Corporation
- Fujitec Co., Ltd.
- Hyundai Elevator Co., Ltd.
- Honeywell International, Inc.
- Toshiba Corporation

Report Scope: This report segments the Global Smart Elevator Market into several categories, detailing industry trends and providing insights as follows:

- By Component:
 - oControl Systems
 - oMaintenance Systems
 - oCommunication Systems
- By Installation Type:
 - oLow and Mid-rise
 - oHigh-rise
- By Application:
 - oResidential
 - oCommercial

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

- o Institutional

- By Service:

- o New Installation Services

- o Modernization Services

- o Maintenance Services

- By Region:

- o North America: United States, Canada, Mexico

- o Asia-Pacific: China, India, Japan, South Korea, Australia

- o Europe: Germany, United Kingdom, France, Poland, Spain

- o South America: Brazil, Argentina

- o Middle East & Africa: Saudi Arabia, South Africa, Iraq, UAE

Competitive Landscape: The report includes a detailed analysis of key companies operating in the Global Smart Elevator Market, providing valuable insights into their strategies, market share, and product offerings.

Available Customizations: TechSci Research offers customization options for the Global Smart Elevator Market report to address specific company needs. Customization options include:

- In-depth analysis and profiling of additional market players (up to five).

Table of Contents:

1. Service Overview
2. Research Methodology
3. Impact of COVID-19 on Global Smart Elevator Market
4. Executive Summary
5. Voice of Customers
6. Global Smart Elevator Market Outlook
 - 6.1. Market Size & Forecast
 - 6.1.1. By Value
 - 6.2. Market Share & Forecast
 - 6.2.1. By Component (Control Systems, Maintenance Systems, Communication Systems)
 - 6.2.2. By Installation (Low and Mid-rise, High Rise)
 - 6.2.3. By Application (Residential, Commercial, Institutional)
 - 6.2.4. By Service (New Installation Services, Modernization Services and Maintenance Services)
 - 6.2.5. By Region
 - 6.3. By Company (2024)
 - 6.4. Market Map
7. North America Smart Elevator Market Outlook
 - 7.1. Market Size & Forecast
 - 7.1.1. By Value
 - 7.2. Market Share & Forecast
