### **Report description:**

Despite the COVID-19 pandemic being declared over by the World Health Organisation in 2023, Italian consumers still maintained a strong focus on hygiene in 2024. Nonetheless, the use of bleach is declining in favour of other home care products containing bleach. The wording "with bleach" has increasingly been used on the labelling of surface care and other home care products since the pandemic, with these products appealing to consumers looking to sanitise their homes without using basic bleach.
