### **Report description:**

In 2024, retail e-commerce in Canada continued to see strong, if slower than in 2023, growth in current value sales. At the end of the review period, retail e-commerce remained a fast-developing and dynamic channel in the market. While the rates of retail value growth have slowed since the exponential increment recorded in the wake of the Coronavirus (COVID-19) pandemic in 2020, they reached double-digit or close to double-digit rises over the remainder of the review period.

Euromonitor International's Retail E-Commerce in Canada report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Product coverage: Retail E-Commerce by Product, Retail E-Commerce by Type.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
