### **Report description:**

2024 was a difficult year for retail in France. Store-based retailing remained at a standstill in current value terms and saw a net loss of over 2,000 outlets - primarily, but not exclusively independent stores. While retail e-commerce rebounded in value, this was insufficient to drive overall market growth. Surprisingly, even the Paris Olympics, which succeeded in attracting visitors and tourists, failed to provide a meaningful boost to consumer spending.

Euromonitor International's Retail in France report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Product coverage: Retail E-Commerce, Retail Offline.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
