Report description:

In line with the review period, in 2024, supermarkets remained the second largest retail channel in Finland behind hypermarkets in retail sales price (RSP) terms. While both channels registered growth during the review period, the gap between them has widened somewhat, with hypermarkets enjoying higher growth rates. This continued in 2024.

Euromonitor International's Supermarkets in Finland report offers insight into key trends and developments driving the industry. The report examines all retail channels to provide sector insight. Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
