Report description:

Vending in Canada's recovery from the Coronavirus (COVID-19) pandemic-induced slump stalled as retail current value sales decreased in 2024. This performance was partly due to previous rebounds in vending consumption, as consumers gradually returned to key locations for vending machines (offices, schools and public spaces) with the end of COVID-19 restrictions. Thus, there was a level of stabilisation at the end of the review period.

Channels include hypermarkets, supermarkets, discounters, convenience stores, mixed retailers, health and beauty retailers, clothing and footwear retailers, furniture and furnishing stores, DIY and hardware stores, durable goods retailers, leisure and personal goods retailers. There are profiles of leading retailers, with analysis of their performance and the challenges they face. There is also analysis of non-store retailing: vending; homeshopping; internet retailing; direct selling, as available.
