

## **Global Craniomaxillofacial (CMF) Devices Market - Products, Materials and Applications**

Market Report | 2025-03-10 | 233 pages | Industry Experts

### **AVAILABLE LICENSES:**

- Single user licence (PDF) \$4500.00
- Enterprise Electronic (PDF) \$7200.00

### **Report description:**

Craniomaxillofacial (CMF) Devices Market Trends and Outlook

Craniomaxillofacial (CMF) devices comprise a range of specialized medical implants and devices to treat disorders or injuries impacting the skull, face, and jaw. These devices are integral to reconstructive surgeries, trauma care, and orthognathic procedures, facilitating the restoration of structure and function in the craniomaxillofacial region. CMF devices, which include plates, screws, bone graft substitutes, distraction systems, and TMJ replacements, are essential for stabilizing, aligning, and reconstructing facial structures. They address facial fractures, congenital deformities, jaw misalignment, and skull repairs. Recent advancements in materials such as biocompatible metals, ceramics, and biodegradable polymers have enhanced healing processes and reduced the need for secondary surgeries. Moreover, 3D-printed implants for personalized facial reconstruction, smart sensors for healing monitoring, and augmented reality for surgical precision are revolutionizing CMF surgery. These devices are extensively used across diverse medical fields, including neurosurgery, otolaryngology, plastic surgery, dentistry, and orthognathic surgery, supporting treatments for skull fractures, jaw realignment, and facial reconstruction. As the demand for aesthetic enhancements and trauma interventions continues to escalate, CMF devices are pivotal in restoring facial symmetry, enhancing functionality, and improving overall quality of life. Furthermore, CMF technologies are increasingly deployed in complex procedures such as cranial flap fixation, distraction for deformity correction, and thoracic fixation for spinal stabilization, ensuring superior outcomes in challenging clinical scenarios. Global Craniomaxillofacial (CMF) Devices market size is estimated at \$2.1 billion in 2024 and is projected to reach \$3.5 billion by 2030, with a CAGR of 8.7% during the forecast period 2024-2030.

The craniomaxillofacial (CMF) devices market is significantly influenced by the rising incidence of cranial and maxillofacial injuries, particularly those resulting from road accidents, sports injuries, and acts of violence. Increasing awareness of facial fractures and congenital disorders, such as cleft lips and craniosynostosis, is driving the demand for CMF devices. Technological advancements in minimally invasive surgeries (MIS) and robotic-assisted procedures have improved surgical outcomes, fostering market growth. Additionally, the growing prevalence of osteoporosis and other age-related conditions among the geriatric population is further increasing the demand for reconstructive surgeries. The development of 3D printing and bioabsorbable implants has enhanced

[www.scotts-international.com](http://www.scotts-international.com)

the efficiency and customization of surgical procedures, promoting the adoption of CMF devices. The expanding popularity of aesthetic surgeries also supports the market, as patients increasingly seek cosmetic enhancements through minimally invasive procedures. Improved access to healthcare, particularly in emerging regions, is another significant factor driving market expansion. Moreover, a growing emphasis on patient safety, expedited recovery, and reduced recovery times is fueling the preference for CMF devices. Furthermore, initiatives from organizations such as the American Society of Craniofacial Surgeons are raising awareness about CMF surgeries. The ongoing shift toward more effective and timely treatments is expected to sustain market growth in the coming years.

#### Craniofacial (CMF) Devices Regional Market Analysis

North America is expected to maintain its leadership in the global craniofacial devices market, holding an estimated around 53% share in 2024. This dominance is driven by the high prevalence of facial deformities and fractures, a robust healthcare infrastructure, and significant healthcare expenditure. The region benefits from the availability of advanced implants, an increasing volume of CMF procedures, and greater awareness of deformity correction surgeries. The growing demand for minimally invasive procedures, a robust insurance system, and a high concentration of leading manufacturers contribute to this region's market growth. In contrast, the Asia-Pacific region is projected to be the fastest-growing market, with a CAGR of 9.8% during the forecast period from 2024 to 2030. This growth is fueled by advancements in healthcare infrastructure, rising disposable incomes, an expanding geriatric population, and a growing demand for innovative surgical techniques. Key countries such as Japan, China, and India, with their burgeoning middle class and proactive government healthcare initiatives, are significantly contributing to the growth of the CMF market in the region, positioning Asia-Pacific as a potential future leader in the industry.

#### Craniofacial (CMF) Devices Market Analysis by Product

The Craniofacial (CMF) Devices market is segmented into CMF plate and screw fixation, cranial flap fixation devices, CMF distraction systems, bone graft substitutes, temporomandibular joint (TMJ) replacement devices, and thoracic fixation devices. Notably, the CMF Plate and Screw Fixation segment holds the largest market share, estimated at 65.3% in 2024, due to its extensive application in various surgical procedures such as deformity correction, sports injuries, facial fractures, orthognathic surgeries, neurosurgery, tumor excision, cosmetic surgeries, and pediatric surgeries. This segment's prominence is primarily linked to its critical role in fracture stabilization and promoting bone healing. Conversely, Bone Graft Substitutes are projected to exhibit the fastest growth, with a CAGR of 10.2% during the forecast period from 2024 to 2030. This growth is driven by the limited availability of donor bones and its use in bone defect reconstruction and spinal fusion procedures. Common synthetic bone substitutes include calcium sulfate, calcium phosphate ceramics, and bioactive glass ceramics, with France-based Biomatlante's MBCP biphasic calcium phosphate being a leading product that closely mimics natural bone and fosters bone formation during surgical interventions.

#### Craniofacial (CMF) Devices Market Analysis by Material

The Craniofacial (CMF) Devices market is segmented by material into metal, bioabsorbable material, ceramic, and plastics. Metal leads the CMF devices market, accounting for 62.2% of the market share in 2024. This dominance is attributed to its strength, durability, and reliability in fracture stabilization and bone support. Titanium and its alloys are often used in CMF surgeries due to their lightweight nature, strength, biocompatibility, and corrosion resistance. These characteristics make metallic materials particularly suitable for craniofacial implants, including plates, screws, and meshes. On the other hand, bioabsorbable materials are projected to experience the fastest growth, with a CAGR of 10.9% from 2024 to 2030. These materials offer several benefits, such as eliminating the need for secondary surgical intervention, biocompatibility, and improved assimilation within the body, contributing to their increasing acceptance in CMF procedures. Furthermore, advancements in bioabsorbable materials continue to enhance their mechanical properties, broadening their applicability and supporting market growth.

## Craniomaxillofacial (CMF) Devices Market Analysis by Application

The Craniomaxillofacial (CMF) Devices market is segmented by application into orthognathic & dental surgery, neurosurgery & ENT surgery, plastic surgery, and other applications. In 2024, Orthognathic & Dental Surgery holds a dominant position with a market share of 51.8%, driven by its extensive use in correcting dental and skeletal deformities, including jaw realignment and dental reconstructions. Meanwhile, the Neurosurgery & ENT Surgery segment is expected to experience the fastest growth rate, with a CAGR of 9.5% during the analysis period from 2024 to 2030. This growth is attributed to an increase in cases of trauma and spinal disorders requiring cerebrospinal fluid (CSF) management, as well as advanced surgical interventions such as craniotomies and deep brain stimulation. Additionally, innovations in surgical navigation technology and the development of bioabsorbable implants, exemplified by Medpor, are contributing to improved treatment outcomes for neurovascular diseases, skull fractures, and ENT-related conditions, further fostering market growth.

## Craniomaxillofacial (CMF) Devices Market Report Scope

This global report on Craniomaxillofacial (CMF) Devices analyzes the global and regional markets based on product, material, and applications for 2021-2030 period with projection from 2024 to 2030 in terms of value in US\$. In addition to providing profiles of major companies operating in this space, the latest corporate and industrial developments have been covered to offer a clear panorama of how and where the market is progressing.

## Key Metrics

Historical Period: 2021-2023

Base Year: 2024

Forecast Period: 2024-2030

Units: Value market in US\$

Companies Mentioned: 12+

## Craniomaxillofacial (CMF) Devices Market by Geographic Region

- ☐☐ North America (The United States, Canada, and Mexico)
- ☐☐ Europe (Germany, France, the United Kingdom, Italy, Spain, and Rest of Europe)
- ☐☐ Asia-Pacific (Japan, China, India, South Korea, and Rest of Asia-Pacific)
- ☐☐ South America (Brazil, Argentina, and Rest of South America)
- ☐☐ Rest of World

## Craniomaxillofacial (CMF) Devices Market by Product

- ☐☐ CMF Plate and Screw Fixation
- ☐☐ Cranial Flap Fixation Devices
- ☐☐ CMF Distraction System
- ☐☐ Bone Graft Substitutes
- ☐☐ Temporomandibular Joint (TMJ) Replacement Devices
- ☐☐ Thoracic Fixation Devices

## Craniomaxillofacial (CMF) Devices Market by Material

- ☐☐ Metal
- ☐☐ Bioabsorbable Materials
- ☐☐ Ceramics

□□Polymers

Craniomaxillofacial (CMF) Devices Market by Application

□□Neurosurgery and ENT Surgery

□□Orthognathic and Dental Surgery

□□Plastic Surgery

□□Other Applications (Including Trauma Reconstruction Surgery, Sports Injury Repair, Pediatric CMF Surgery, and Others)

## **Table of Contents:**

### **PART A: GLOBAL MARKET PERSPECTIVE**

#### **1. INTRODUCTION**

-□□Product Outline

o□□Craniomaxillofacial (CMF) Devices Defined

o□□Types of Craniomaxillofacial (CMF) Devices

-□□CMF Plate and Screw Fixation

-□□Cranial Flap Fixation Devices

-□□CMF Distraction System

-□□Bone Graft Substitutes

-□□Temporomandibular Joint (TMJ) Replacement Devices

-□□Thoracic Fixation Devices

o□□Craniomaxillofacial (CMF) Device Materials

-□□Metal

-□□Titanium and Titanium Alloys

-□□Stainless Steel

-□□Cobalt-Based Alloys

-□□Bioabsorbable Materials

-□□Polylactic Acid (PLA)

-□□Polyglycolic Acid (PGA)

-□□Polylactic-co-Glycolic Acid (PLGA)

-□□Polycaprolactone (PCL)

-□□Ceramics

-□□Calcium Phosphate (CaP)

-□□Bioactive Glass

-□□Polymers

-□□Biodegradable Polymers

-□□Non-Degradable Polymers

o□□Craniomaxillofacial (CMF) Device Applications

-□□Neurosurgery and ENT Surgery

-□□Orthognathic and Dental Surgery

-□□Plastic Surgery

-□□Other Applications

#### **2. KEY MARKET TRENDS**

-□□Global Burden of Facial Fractures and Regional Variations in Craniomaxillofacial (CMF) Care

-□□Growing Impact of Virtual Surgical Planning (VSP) on Craniomaxillofacial Surgery

-□□3D-Printed Bioceramic Implants: Advancing Craniomaxillofacial Reconstruction

-□□Augmented Reality (AR): A Promising Tool in Craniomaxillofacial Surgery

### 3. KEY MARKET PLAYERS

- Acumed LLC (United States)
- Avinent Implant System, S.L.U. (Spain)
- B. Braun Melsungen AG (Germany)
- Biotech Orthomed Inc. (India)
- Biocomposites Ltd. (United Kingdom)
- Changzhou XC Medico Technology Co., Ltd. (China)
- Integra LifeSciences Holdings Corporation (United States)
- Johnson & Johnson MedTech (United States)
- KLS Martin SE & Co. KG (Germany)
- Matrix Surgical USA (United States)
- Medartis AG (Switzerland)
- Medtronic plc (United States)
- Meticuly Co Ltd (Thailand)
- Renishaw plc (United Kingdom)
- Stryker Corporation (United States)
- Xilloc Medical Int B.V. (Netherlands)
- Zimmer Biomet Holdings, Inc. (United States)

### 4. KEY BUSINESS AND PRODUCT TRENDS

- February 2025
  - o□Meticuly Enters the Italian Cranioplasty Market by Partnering with Ams Group Srl
- January 2025
  - o□Integra LifeSciences Announces the Launch of its Global Educational Platform Integra Institute
- December 2024
  - o□KLS Martin Group Announces the Opening of its New State-of-the-art-facility
- September 2024
  - o□Integra Featured in Medical Design & Outsourcing MedTech 100 Largest Players list
  - o□Stryker Acquires NICO Corporation
  - o□Biocomposites Completely Acquires SYNICEM and Subiton Products
  - o□Johnson and Johnson Reveal the New Brand Identity of their MedTech Company Brands
- More..

### 5. GLOBAL MARKET OVERVIEW

- Global Craniomaxillofacial (CMF) Devices Market Overview by Product Type
  - o□Craniomaxillofacial (CMF) Devices Type Market Overview by Global Region
- CMF Plate and Screw Fixation
- Cranial Flap Fixation Devices
- CMF Distraction System
- Bone Graft Substitutes
- Temporomandibular Joint (TMJ) Replacement Devices
- Thoracic Fixation Devices
- Global Craniomaxillofacial (CMF) Devices Market Overview by Material Type
  - o□Craniomaxillofacial (CMF) Devices Material Type Market Overview by Global Region
- Metal
- Bioabsorbable Materials
- Ceramics
- Polymers
- Global Craniomaxillofacial (CMF) Devices Market Overview by Application

**Scotts International. EU Vat number: PL 6772247784**

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

o□Craniomaxillofacial (CMF) Devices Application Market Overview by Global Region

- Neurosurgery and ENT Surgery
- Orthognathic and Dental Surgery
- Plastic Surgery
- Other Applications

## PART B: REGIONAL MARKET PERSPECTIVE

### 6. NORTH AMERICA

- North American Craniomaxillofacial (CMF) Devices Market Overview by Geographic Region
- North American Craniomaxillofacial (CMF) Devices Market Overview by Product Type
- North American Craniomaxillofacial (CMF) Devices Market Overview by Material Type
- North American Craniomaxillofacial (CMF) Devices Market Overview by Application
- Country-wise Analysis of North American CMF Devices Market

#### o□THE UNITED STATES

- United States Craniomaxillofacial (CMF) Devices Market Overview by Product Type
- United States Craniomaxillofacial (CMF) Devices Market Overview by Material Type
- United States Craniomaxillofacial (CMF) Devices Market Overview by Application

#### o□CANADA

- Canadian Craniomaxillofacial (CMF) Devices Market Overview by Product Type
- Canadian Craniomaxillofacial (CMF) Devices Market Overview by Material Type
- Canadian Craniomaxillofacial (CMF) Devices Market Overview by Application

#### o□MEXICO

- Mexican Craniomaxillofacial (CMF) Devices Market Overview by Product Type
- Mexican Craniomaxillofacial (CMF) Devices Market Overview by Material Type
- Mexican Craniomaxillofacial (CMF) Devices Market Overview by Application

### 7. EUROPE

- European Craniomaxillofacial (CMF) Devices Market Overview by Geographic Region
- European Craniomaxillofacial (CMF) Devices Market Overview by Product Type
- European Craniomaxillofacial (CMF) Devices Market Overview by Material Type
- European Craniomaxillofacial (CMF) Devices Market Overview by Application
- Country-wise Analysis of European CMF Devices Market

#### o□GERMANY

- German Craniomaxillofacial (CMF) Devices Market Overview by Product Type
- German Craniomaxillofacial (CMF) Devices Market Overview by Material Type
- German Craniomaxillofacial (CMF) Devices Market Overview by Application

#### o□FRANCE

- French Craniomaxillofacial (CMF) Devices Market Overview by Product Type
- French Craniomaxillofacial (CMF) Devices Market Overview by Material Type
- French Craniomaxillofacial (CMF) Devices Market Overview by Application
