

Truck Platooning Market Opportunity, Growth Drivers, Industry Trend Analysis, and Forecast 2025 - 2034

Market Report | 2025-01-07 | 180 pages | Global Market Insights

AVAILABLE LICENSES:

- Single User \$4850.00
- Multi User \$6050.00
- Enterprise User \$8350.00

Report description:

The Global Truck Platooning Market reached USD 2.3 billion in 2024 and is projected to grow at a robust CAGR of 21.9% from 2025 to 2034. As the world becomes more focused on sustainability, operational efficiency, and safety, truck platooning is rapidly gaining traction. This innovative technology, where multiple trucks travel in a closely synchronized formation, is becoming a crucial solution for reducing fuel consumption and minimizing environmental impact. By reducing aerodynamic drag, these platoons significantly cut fuel costs while lowering carbon emissions.

At the same time, advancements in automation technology, including artificial intelligence (AI) and machine learning, make platooning a feasible option for fleet operators seeking greater efficiency and reliability. Governments are also contributing to the market's growth by offering incentives and funding research programs that promote the development of this advanced technology. Infrastructure upgrades and regulatory support are also helping drive adoption, making truck platooning a key component of the future of transportation.

One of the primary drivers of the truck platooning market is the ongoing support from both governments and private sectors. The shift toward automation in the trucking industry is pushing commercial fleets to adopt cutting-edge technologies that streamline operations, reduce fuel expenses, and enhance safety on the roads. With the increasing demand for logistics optimization, truck platooning offers an ideal solution for operators aiming to improve efficiency while reducing reliance on human drivers. Additionally, the growth in e-commerce and the pressure to meet delivery deadlines are prompting fleet operators to seek ways to increase speed while ensuring safety, further boosting the adoption of platooning.

The market is segmented by communication technology, which includes Vehicle-to-Vehicle (V2V), Vehicle-to-Everything (V2X), and Vehicle-to-Infrastructure (V2I). In 2024, the V2X segment captured 40% of the market share and is expected to generate USD 8 billion by 2034. V2X technology is fueling this growth by enabling seamless communication between platooning trucks and surrounding infrastructure, such as road systems, traffic signals, and other vehicles. This real-time data exchange optimizes

vehicle coordination, making platooning safer and more efficient, especially on interconnected roadways.

Truck platooning also relies heavily on hardware, software, and services. The hardware segment, which accounted for 46% of the market in 2024, is experiencing significant growth. Advanced sensors, including LiDAR, radar, cameras, and ultrasonic sensors, are integral to ensuring smooth, safe platooning operations. These technologies help trucks maintain precise distances, detect obstacles, and synchronize their movements, making hardware a critical component for the ongoing development of truck platooning systems.

The U.S. truck platooning market alone made up 80% of the global share in 2024. The nation's leadership in autonomous vehicle technology, including the continuous evolution of AI algorithms and sensor-based automation, is accelerating the adoption of platooning systems. As autonomous trucks become more reliable, fleet operators in the U.S. are increasingly adopting platooning technology to reduce fuel costs, streamline logistics, and enhance road safety. With continued advancements in automation, the U.S. market is poised for substantial long-term growth.

Table of Contents:

Report Content

Chapter 1 Methodology & Scope

1.1 Research design

1.1.1 Research approach

1.1.2 Data collection methods

1.2 Base estimates & calculations

1.2.1 Base year calculation

1.2.2 Key trends for market estimation

1.3 Forecast model

1.4 Primary research and validation

1.4.1 Primary sources

1.4.2 Data mining sources

1.5 Market scope & definition

Chapter 2 Executive Summary

2.1 Industry 360 synopsis, 2021 - 2034

Chapter 3 Industry Insights

3.1 Industry ecosystem analysis

3.1.1 Hardware providers

3.1.2 Software providers

3.1.3 Service providers

3.1.4 Technology providers

3.1.5 End users

3.2 Supplier landscape

3.3 Profit margin analysis

3.4 Technology & innovation landscape	
3.5 Patent analysis	
3.6 Key news & initiatives	
3.7 Regulatory landscape	
3.8 Use case	
3.9 Impact forces	
3.9.1 Growth drivers	
3.9.1.1 Growing sales of commercial vehicles	
3.9.1.2 Increase in demand to reduce operating cost and fuel consumption by fleet	
3.9.1.3 Rising demand for connected vehicles	
3.9.1.4 Stringent environmental regulations and rising demand for road safety	
3.9.1.5 High cost of technology and hardware	
3.9.1.6 Lack of infrastructure	
3.9.2 Industry pitfalls & challenges	
3.9.2.1 Lack of logistics control	
3.9.2.2 Risks associated with cross-border transportation	
3.10 Growth potential analysis	
3.11 Porter's analysis	
3.12 PESTEL analysis	
Chapter 4 Competitive Landscape, 2024	
4.1 Introduction	
4.2 Company market share analysis	
4.3 Competitive positioning matrix	
4.4 Strategic outlook matrix	
Chapter 5 Market Estimates & Forecast, By Component, 2021 - 2034 (\$Bn)	
5.1 Key trends	
5.2 Hardware	
5.2.1 Sensors	
5.2.2 Detection systems	
5.2.3 Camera	
5.2.4 Others	
5.3 Software	
5.4 Services	
Chapter 6 Market Estimates & Forecast, By Vehicle, 2021 - 2034 (\$Bn)	
6.1 Key trends	
6.2 Light Commercial Vehicle (LCV)	
6.3 Heavy Commercial Vehicle (HCV)	
Chapter 7 Market Estimates & Forecast, By Autonomous Level, 2021 - 2034 (\$Bn)	
7.1 Key trends	
7.2 Partially-autonomous	
7.3 Fully autonomous	
Chapter 8 Market Estimates & Forecast, By Communication Technology, 2021 - 2034 (\$Bn)	
8.1 Key trends	
8.2 Vehicle to Vehicle (V to V)	
8.3 Vehicle to Everything (V to X)	
8.4 Vehicle to Infrastructure (V to I)	
Chapter 9 Market Estimates & Forecast, By Region, 2021 - 2034 (\$Bn)	

- 9.1 Key trends
- 9.2 North America
 - 9.2.1 U.S.
 - 9.2.2 Canada
- 9.3 Europe
 - 9.3.1 UK
 - 9.3.2 Germany
 - 9.3.3 France
 - 9.3.4 Italy
 - 9.3.5 Spain
 - 9.3.6 Russia
 - 9.3.7 Nordics
- 9.4 Asia Pacific
 - 9.4.1 China
 - 9.4.2 India
 - 9.4.3 Japan
 - 9.4.4 South Korea
 - 9.4.5 ANZ
 - 9.4.6 Southeast Asia
- 9.5 Latin America
 - 9.5.1 Brazil
 - 9.5.2 Mexico
 - 9.5.3 Argentina
- 9.6 MEA
 - 9.6.1 UAE
 - 9.6.2 South Africa
 - 9.6.3 Saudi Arabia
 - 9.6.4 Turkey
- Chapter 10 Company Profiles
 - 10.1 AB Volvo
 - 10.2 Bendix
 - 10.3 Bosch
 - 10.4 Continental
 - 10.5 Daimler
 - 10.6 Hino Motors
 - 10.7 IVECO
 - 10.8 NVIDIA
 - 10.9 Omnitrac
 - 10.10 Peloton
 - 10.11 Scania
 - 10.12 TomTom
 - 10.13 TuSimple
 - 10.14 Veddel
 - 10.15 ZF Friedrichshafen
