

Peripheral Vascular Devices Market Report by Device Type (Peripheral Vascular Stents, Peripheral Transluminal Angioplasty (PTA) Balloon Catheters, Peripheral Transluminal Angioplasty (PTA) Guidewires, Atherectomy Devices, Embolic Protection Devices, Inferior Vena Cava Filters, and Others), End User (Hospitals and Clinics, Ambulatory Care Centers, Specialty Clinics, and Others), and Region 2025-2033

Market Report | 2025-04-01 | 145 pages | IMARC Group

AVAILABLE LICENSES:

- Electronic (PDF) Single User \$3999.00
- Five User Licence \$4999.00
- Enterprisewide License \$5999.00

Report description:

The global peripheral vascular devices market size reached USD 12.3 Billion in 2024. Looking forward, IMARC Group expects the market to reach USD 20.7 Billion by 2033, exhibiting a growth rate (CAGR) of 5.64% during 2025-2033. The market growth is significantly propelled by ongoing innovations in minimally invasive procedures and amplifying prevalence of cardiovascular disorders. Moreover, demand for atherectomy devices, stents, and angioplasty balloons is heightening as healthcare providers emphasize on enhancing patient outcomes, driving substantial market expansion across medical industry.

Peripheral vascular disease (PVD) is a circulatory condition caused due to the narrowing, blockage, or spasms in the blood vessels located outside the heart and brain. Such occurrences reduce the blood flow through the vessels, resulting in weakness, pain, gangrene, hair loss on the legs, numbness, and muscle heaviness. Peripheral vascular devices, such as angioplasty catheters, peripheral guidewires, vena cava filters, stent grafts, and embolic protection devices (EPD), are used to treat artery blockages and narrowing. These blockages, particularly found in the peripheral vasculature, are caused by plaque build-up, which limits the blood vessels and reduces blood flow to the body parts. Peripheral vascular devices are safe, minimize the risk of infection and irritation, improve blood flow, and supply oxygenated blood through arteries.

Peripheral Vascular Devices Market Trends:

The increasing prevalence of venous diseases or CVI (chronic venous insufficiency) across the globe is creating a positive outlook for the market. Peripheral vascular devices provide sufficient blood flow to the brain, legs, and feet for proper functioning. Additionally, the rising geriatric population and the increasing incidences of various ailments, such as peripheral artery disease (PAD) and blockages, are favoring the market growth. Furthermore, this can be attributed to changing lifestyle habits, including smoking and high alcohol consumption, coupled with physical inactivity and unhealthy dietary habits. Apart from this, the growing inclination toward minimally invasive surgeries (MIS) due to fewer complications, less postoperative pain, shortened hospital stay, and faster recovery times are providing an impetus to the market growth. Moreover, the widespread adoption of atherectomy devices owing to the increasing prevalence of atherosclerosis, obesity, and lifestyle-related disorders is positively influencing the market growth. Other factors, including the significant growth in the healthcare industry, rising expenditure capacities of consumers, and extensive research and development (R&D) activities, are anticipated to drive the market toward growth.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each segment of the market, along with forecasts at the global, regional, and country levels for 2025-2033. Our report has categorized the market based on device type and end user.

Breakup by Device Type:

- Peripheral Vascular Stents
- Peripheral Transluminal Angioplasty (PTA) Balloon Catheters
- Peripheral Transluminal Angioplasty (PTA) Guidewires
- Atherectomy Devices
- Embolic Protection Devices
- Inferior Vena Cava Filters
- Others

Breakup by End User:

- Hospitals and Clinics
- Ambulatory Care Centers
- Specialty Clinics
- Others

Breakup by Region:

- North America
- United States
- Canada
- Asia-Pacific
- China
- Japan
- India
- South Korea
- Australia
- Indonesia
- Others

- Europe
- Germany
- France
- United Kingdom
- Italy
- Spain
- Russia
- Others
- Latin America
- Brazil
- Mexico
- Others
- Middle East and Africa

Competitive Landscape:

The competitive landscape of the industry has also been examined along with the profiles of the key players being Abbott Laboratories, B. Braun SE (B. Braun Holding GmbH & Co. KG), Becton, Dickinson and Company, Biotronik SE & Co. KG, Boston Scientific Corporation, Cook Group Incorporated, Cordis Corporation, iVascular S.L.U., Koninklijke Philips N.V., Medtronic plc and Terumo Medical Corporation.

Key Questions Answered in This Report

- 1.What was the size of the global peripheral vascular devices market in 2024?
- 2.What is the expected growth rate of the global peripheral vascular devices market during 2025-2033?
- 3.What are the key factors driving the global peripheral vascular devices market?
- 4.What has been the impact of COVID-19 on the global peripheral vascular devices market?
- 5.What is the breakup of the global peripheral vascular devices market based on the device type?
- 6.What is the breakup of the global peripheral vascular devices market based on the end user?
- 7.What are the key regions in the global peripheral vascular devices market?
- 8.Who are the key players/companies in the global peripheral vascular devices market?

Table of Contents:

- 1 Preface
- 2 Scope and Methodology
 - 2.1 Objectives of the Study
 - 2.2 Stakeholders
 - 2.3 Data Sources
 - 2.3.1 Primary Sources
 - 2.3.2 Secondary Sources
 - 2.4 Market Estimation
 - 2.4.1 Bottom-Up Approach
 - 2.4.2 Top-Down Approach
 - 2.5 Forecasting Methodology
- 3 Executive Summary
- 4 Introduction
 - 4.1 Overview
 - 4.2 Key Industry Trends

5 Global Peripheral Vascular Devices Market

5.1 Market Overview

5.2 Market Performance

5.3 Impact of COVID-19

5.4 Market Forecast

6 Market Breakup by Device Type

6.1 Peripheral Vascular Stents

6.1.1 Market Trends

6.1.2 Market Forecast

6.2 Peripheral Transluminal Angioplasty (PTA) Balloon Catheters

6.2.1 Market Trends

6.2.2 Market Forecast

6.3 Peripheral Transluminal Angioplasty (PTA) Guidewires

6.3.1 Market Trends

6.3.2 Market Forecast

6.4 Atherectomy Devices

6.4.1 Market Trends

6.4.2 Market Forecast

6.5 Embolic Protection Devices

6.5.1 Market Trends

6.5.2 Market Forecast

6.6 Inferior Vena Cava Filters

6.6.1 Market Trends

6.6.2 Market Forecast

6.7 Others

6.7.1 Market Trends

6.7.2 Market Forecast

7 Market Breakup by End User

7.1 Hospitals and Clinics

7.1.1 Market Trends

7.1.2 Market Forecast

7.2 Ambulatory Care Centers

7.2.1 Market Trends

7.2.2 Market Forecast

7.3 Specialty Clinics

7.3.1 Market Trends

7.3.2 Market Forecast

7.4 Others

7.4.1 Market Trends

7.4.2 Market Forecast

8 Market Breakup by Region

8.1 North America

8.1.1 United States

8.1.1.1 Market Trends

8.1.1.2 Market Forecast

8.1.2 Canada

8.1.2.1 Market Trends
