Report description:

The Behavioral Biometrics Market size is estimated at USD 2.72 billion in 2025, and is expected to reach USD 9.21 billion by 2030, at a CAGR of 27.64% during the forecast period (2025-2030).

With the recent outbreak of the COVID-19 pandemic, organizations across the world must respond proactively to cyber threats that have witnessed a spike during the pandemic. Owing to this, cyber resilience, which refers to a sector or organization's ability to respond to, prepare for, and recover from cyberattacks, has become an absolute necessity rather than an option in the current scenario.

Key Highlights

- Behavioral biometrics provides a new generation of user security solutions that identify individuals based on the unique way they interact with computer devices, such as smartphones, tablets, or mouse-screen-and-keyboard.
- By measuring everything from how the user holds the phone or how they swipe the screen, to which keyboard or gestural shortcuts they use, software algorithms build a unique user profile, which can then be used to confirm the user's identity on subsequent interactions.
- Behavioral biometrics does not replace the password or other legacy forms of identity authentication, but it does reduce the burden placed on them to protect sensitive data. Even the strongest password is only secure so long as it is secret. By offering an additional, continuous layer of identity assurance, behavioral biometrics prevents the password from being a single point of security failure.
- A growing number of threats are associated with the data compromising. This is resulting in significant loss to organizations, and compromising user credentials being highlighted as one of the major causes of global cyber threat.
- Similarly, according to the IBM report in 2020, major malicious breaches were caused by compromised credentials. Moreover,

about 19% of all the malicious breaches were the cause behind malicious attacks in 2020.

Behavioral Biometrics Market Trends

Increasing Data Breaches in BFSI will Drive the Growth of this Market

- With the increasing fraud and cybercrime, along with improving the customer experience, preventing customers from being exposed to risk has become a top concern of banks' agendas. With new threats emerging almost daily, measures to protect end-users from hacking and fraud have to be delivered without jeopardizing the consumer experience.
- With the rise of fintech start-ups and the imminent PSD2 (Revised Payment Service Directive) regulations set to increase competition in the sector, the customer experience is becoming an increasingly important differential, so a more nuanced approach is necessary.
- A recent study commissioned by Gemalto showed that 44% of consumers would leave their bank in the event of a security breach, and 38% would switch to a competitor offering a better service. It has driven the interest of banks and other financial institutions in using biometric technology for which they are strategically working with partners who have the security and technology expertise to ensure every link in the chain is protected.
- Most of BFSI sectors are implementing this behavioral biometric market to increase the security of their customer's data. In 2019, National Australian Bank(NAB) implemented behavioral biometrics for fraud prevention. Additionally, Wells Fargo Company is working on a payment solution that will make use of the voice of its customers to authenticate transactions and access services. Further, the company is exploring how it can leverage artificial intelligence to make it able to perform conversational banking, much like iPhone's Siri or Amazon's Alexa.
- The Treasury arm, One of the top five banks of the United States, recently deployed Biocatch's behavioral biometric modality, which can able to detect 95% of all malware cases with a false positive rate of less than 0.05%. This increasing adoption rate of behavioral biometric systems is driving the growth of this market.

North America to Hold Highest Share

- Owing to the significant adoption of behavioral biometrics in BFSI and ICT in North America, the region is anticipated to hold a substantial share in the market studied. The area is witnessing an increase in spending on security solutions. In 2019, the United States announced to spend USD 15 billion for cybersecurity, a USD 583.4 million (4.1 %) increase over 2018.
- Cybersecurity Ventures predicts cybercrime would continue rising and cost businesses globally more than USD 6 trillion annually by 2021. The estimate is based on historical cybercrime figures, including recent year-over-year growth, a dramatic increase in the hostile nation state-sponsored, and organized crime gang hacking activities. This would increase cybersecurity spending over the forecast period.
- Furthermore, the government across the region has taken a keen interest in biometric applications. It is aggressively funding multiple research programs and startups to develop advanced behavioral biometrics applications in crucial public sector departments. According to a recent survey by CIRA (Canadian Internet Registration Authority), 71 percent of organizations are suffered from data breach activities in 2019. Additionally, almost 43 % of those organizations were unaware of the mandatory breach requirements of the Personal Information Protection and Electronic Documents Act (PIPEDA). Hence the government campaigns to reduce these cyber thefts will drive the market of behavioral biometrics for this region.

Behavioral Biometrics Industry Overview

The behavioral biometrics market is moderately competitive, consisting of players strategically focusing on innovation and new solution launches. The companies are also focusing on strategic partnership & collaboration initiatives and fund-raising activities to expand their offerings and increase their market share.

- Feb 2020 - Biocatch Ltd completed its strategic acquisition with AimBrain to enhance its digital identity position in all over the world. According to the Biocatch, this acquisition will deepen its solution by enhancing its fraud detection capabilities and by also providing a better experience to its users.

Additional Benefits:

- The market estimate (ME) sheet in Excel format
- 3 months of analyst support

Table of Contents:

1 INTRODUCTION

- 1.1 Study Assumptions and Market Definition
- 1.2 Scope of the Study

2 RESEARCH METHODOLOGY

3 EXECUTIVE SUMMARY

4 MARKET DYNAMICS

- 4.1 Market Overview
- 4.2 Industry Attractiveness - Porters 5 Force Analysis
 - 4.2.1 Threat of New Entrants
 - 4.2.2 Bargaining Power of Buyers/Consumers
 - 4.2.3 Bargaining Power of Suppliers
 - 4.2.4 Threat of Substitute Products
 - 4.2.5 Intensity of Competitive Rivalry
- 4.3 Market Drivers
 - 4.3.1 Growth in Applications of Biometric Technology in the Commercial and Government Sectors
 - 4.3.2 Increase in Online Transactions and Fraudulent Activities
- 4.4 Market Restraints
 - 4.4.1 Privacy Intrusion Concerns
- 4.5 Impact of COVID-19 on the Behavioral Biometrics Industry

5 MARKET SEGMENTATION

- 5.1 Type
 - 5.1.1 Signature Analysis
 - 5.1.2 Keystroke Dynamics
 - 5.1.3 Voice Recognition
 - 5.1.4 Gait Analysis
- 5.2 Deployment

Scotts International. EU Vat number: PL 6772247784

- 5.2.1 On-premise
- 5.2.2 On-cloud
- 5.3 Application
 - 5.3.1 Identity Proofing
 - 5.3.2 Continuous Authentication
 - 5.3.3 Risk and Compliance
 - 5.3.4 Fraud Detection and Prevention
- 5.4 End-User
 - 5.4.1 BFSI
 - 5.4.2 Retail and E-commerce
 - 5.4.3 Healthcare
 - 5.4.4 Government and Public Sector
 - 5.4.5 Other End-user Verticals
- 5.5 Geography
 - 5.5.1 North America
 - 5.5.2 Europe
 - 5.5.3 Asia Pacific
 - 5.5.4 Rest of the World

6 COMPETITIVE LANDSCAPE

- 6.1 Company Profiles*
 - 6.1.1 BioCatch Ltd
 - 6.1.2 Nuance Communications Inc.
 - 6.1.3 SecureAuth Corporation
 - 6.1.4 Mastercard Incorporated (NuData Security)
 - 6.1.5 BehavioSec Inc.
 - 6.1.6 Threat Mark SRO
 - 6.1.7 UnifyID Inc.
 - 6.1.8 Zighra Inc.
 - 6.1.9 Plurilock Security Solutions Inc.
 - 6.1.10 SecuredTouch Inc.
