### **Report description:**

The Biopharmaceutical Courier Market size is estimated at USD 7.72 billion in 2025, and is expected to reach USD 11.78 billion by 2030, at a CAGR of 8.83% during the forecast period (2025-2030).

The market is driven by the growing demand for personalized medicine, which drives the biopharma market's growth. The market is also driven by the increasing use of biopharma for the treatment of cancer and diabetes, as well as for the treatment of psoriasis and rheumatoid arthritis.

The growing awareness among the general public about the efficacy and accessibility of biopharma is also driving the growth of this market. The increasing focus on rare diseases and orphan drugs drives the market.

Rare diseases often have small patient populations, and a huge unmet medical need exists. Governments and regulatory agencies worldwide are introducing incentives and streamlining regulatory processes to promote therapies for rare diseases.

In addition, biopharma companies are investing in research and development to develop orphan drugs that target rare diseases, which address critical medical needs and create opportunities for market growth.

### **Biopharmaceutical Courier Market Trends**

#### **Immense Growth Projection for the Cold Chain Segment**

Healthcare spending is increasing rapidly in the region due to an aging population and rising disposable income. This will continue

to be a key factor for the future of global pharmaceutical and biotech companies.

The Asia-Pacific region is rapidly becoming a hub for outsourcing pathology testing, drug manufacturing, and clinical trials. This has increased the demand for temperature-sensitive healthcare products such as vaccines, biopharma, and clinical trial material. These changes have led to increased regional cold storage facilities and more investment in ongoing infrastructure improvements. Governments of various Asian nations are improving the healthcare cold chain logistics service. The growing demand for biopharma and vaccines that require cold chains is increasing. The pharmaceutical industry is expanding to meet the growing healthcare needs of an ever-expanding population.

Stricter government restrictions on handling temperature-sensitive pharmaceutical items are limiting market expansion. Consistency in operational processes, security, temperature, pest management, and expensive operational costs also limit market expansion.

#### North America is Emerging as a Key Player in the Market

The increasing number of chronic diseases and the growing investments in R&D activities in the United States drive North America's biopharmaceutical market. The US biopharmaceutical market is expected to grow due to the rising number of chronic diseases, well-established biopharmaceutical companies, and the growth of biotech companies.

The growing geriatric population and the increased R&D activity in the United States will also contribute to the growth of the biopharma market. According to the latest data from the Centers for Disease Control & Prevention (CDC), coronary heart disease (CHD) is the most prevalent heart disease in the United States, with approximately 22.3 million adults aged 20 and above suffering from it.

The CDC data also shows that every 40 seconds, around 9,58,000 people suffer from a heart attack in the United States in a year. The high number of patients suffering from cardiovascular diseases means that advanced drugs must be available to treat them.

#### Biopharmaceutical Courier Industry Overview

The biopharmaceutical courier market is highly competitive and comprises numerous key players. The competition in the industry is driven by factors such as reliability, speed, temperature control capabilities, and compliance with stringent regulations.

The major players in the market include FedEx, DHL, UPS, World Courier, and Marken. Local and regional logistics players also significantly cater to the biopharmaceutical courier needs of specific markets.

### 5 MARKET DYNAMICS

- 5.1 Drivers
  - 5.1.1 E-commerce Boom driving the market
  - 5.1.2 Increasing demand from healthcare sector driving the market
- 5.2 Restraints
  - 5.2.1 Regulatory challenges affecting the market
  - 5.2.2 Infrastructure limitations hindering the growth of the market
- 5.3 Opportunities
  - 5.3.1 Increasing demands from consumers
  - 5.3.2 International expansion
- 5.4 Industry Attractiveness - Porter's Five Forces Analysis
  - 5.4.1 Bargaining Power of Suppliers
  - 5.4.2 Bargaining Power of Consumers/ Buyers
  - 5.4.3 Threat of New Entrants
  - 5.4.4 Threat of Substitute Products
  - 5.4.5 Intensity of Competitive Rivalry
- 5.5 Value Chain/Supply Chain Analysis

### 6 MARKET SEGMENTATION

- 6.1 By Services
  - 6.1.1 Transportation
  - 6.1.2 Storage
  - 6.1.3 Packaging, and Labeling
- 6.2 By Business
  - 6.2.1 B2B
  - 6.2.2 B2C
- 6.3 By Destination
  - 6.3.1 Domestic
  - 6.3.2 International
- 6.4 By Type of Operation
