- Corporate License \$8750.00

Report description:

The Data Center Automation Market is expected to register a CAGR of 17.83% during the forecast period.

Key Highlights

- The boom in social networking, analytics, cloud computing, and mobile computing is projected to positively impact the need for data center automation. Approximately 80% of the data generated is unstructured, containing raw audio, file, or text from various sources, such as blogs and social media platforms.
- Big Data needs to be concise to be analyzed. However, manually handling an enormous amount of data would lead to a high probability of error. Thus, automation plays a vital role in data centers by performing looked-for tasks, which is expected to drive market growth during the forecast period.
- The market includes several opportunities as the company that owns and operates a data center hires third parties to take over data center management. At the same time, they keep as many processes in-house as possible. As an alternative to managed services, automation can eliminate errors, save time, and optimize the processes for better cost-savings
- The Organisation for Economic Co-operation and Deployment (OECD) and various sources claim that during the COVID-19 pandemic, internet usage increased by as much as 60% and that demand for data centers increased as a result of the internet of things (IoT) and video streaming services.

Data Center Automation Market Trends

Growth in Cloud Computing and Online Applications

- Digitization significantly increased the volume and speed of data generation. The primary driver for data center automation is the increase in cloud adoption across both big and small businesses, which is the need for agility and flexibility in the face of accelerating innovation and disruptions from competitors.
- Increased data traffic was the main underlying factor responsible for the demand for cloud data storage. With an increase in IoT adoption worldwide, device connectivity is also growing. Hence, there is an accumulation of vast piles of data.
- As per estimates by Cisco, there are over 50 billion smart connected devices in the world. The data collected from such devices can be analyzed to generate customer transaction patterns and help companies understand the propensity of their consumers.
- In recent years, cloud adoption significantly grew, and with the recent COVID-19 pandemic, which accelerated digital technologies adoption globally, the trend was further fueled. According to a report by IBM, a single manufacturing site can generate more than 2,200 terabytes of data in one month, and a single production line can generate more than 70 terabytes per day-yet most data remain unanalyzed and unsecured. Therefore, companies are moving to cloud storage to secure and utilize this data.
- Also, IBM reported that approximately 90% of the data was generated in the last two years. Due to the massive data generation, there is an increasing demand for low-cost data backup/storage across enterprises. It is analyzed to create significant opportunities for the data center automation market during the forecast period.
- A centralized control method is offered by automated data center management. It can build a log repository for tracking modifications and auditing user activity. Thus, real-time notifications are sent out for any unauthorized activity. Businesses can automate the production of reports and visuals like graphs and charts attributable to data center automation. Automatic data display in reports, charts, and graphs allow for quicker, more straightforward interpretation and more precise insights.

North America to Lead the Market

- With multiple prominent players in the region and the early adoption of advanced technologies across several end-user verticals, the North American region is expected to hold a significant market share. It will continue its dominance throughout the forecast period. Moreover, early adoption of newer technologies, significant investments in R&D for cloud-based solutions, and enhanced IT infrastructure are also anticipated to drive market growth further.
- A significant driver behind the investments in the market is the continuous evolution and new technology applications to unlock volumes that were previously considered non-commercial. With an investment series across healthcare, retail, communications, and manufacturing applications in the country, the market for cloud-based solutions is expected to witness significant growth over the forecast period.
- The country made multiple efforts to modernize its infrastructure. To achieve this, the US Army planned to spend up to USD 249 million to deploy private cloud computing services and data centers. General Dynamics, HP, and Northrop Grumman were among the service providers selected for the Army Private Cloud contract, providing cloud computing services to consolidate data centers using a secure private cloud.
- In the United States, cloud-based computing adoption is increasing rapidly, owing to which the data centers in the country are also witnessing an increase. According to Credit Suisse, the United States currently accounts for the highest number of hyperscale data centers worldwide, holding more than one-third of the total hyperscale data centers in the country. It creates significant opportunities for data center automation in the region.

Data Center Automation Industry Overview

The data center automation market is highly fragmented due to many players offering the service. Some major players who offer cloud and AI services also offer data automation as a bundled service, another reason for the fragmentation of the market. Some

key companies in the firm include Oracle, Fujitsu, HP, and Microsoft, among others. Some key recent developments in the market include:

- August 2022- ABB and ATS Global have established a Memorandum of Understanding (MoU) agreement to expand the ABB Ability Data Center Automation (DCA) market. With its headquarters in the Netherlands, the business earned the Global System Integrator (GIS) title. It will cooperate with ABB to pool resources and expertise, evaluate the benefits and efficiency of potential customer alliances using data centers, and expand each party's businesses.

- The market estimate (ME) sheet in Excel format
- 3 months of analyst support

Table of Contents:

1 INTRODUCTION

- 1.1 Study Deliverables
- 1.2 Study Assumptions
- 1.3 Scope of the Study

2 RESEARCH METHODOLOGY

3 EXECUTIVE SUMMARY

4 MARKET INSIGHTS

- 4.1 Market Overview
- 4.2 Industry Attractiveness - Porter's Five Forces Analysis
 - 4.2.1 Bargaining Power of Suppliers
 - 4.2.2 Bargaining Power of Buyers/Consumers
 - 4.2.3 Threat of New Entrants
 - 4.2.4 Threat of Substitute Products
 - 4.2.5 Intensity of Competitive Rivalry
- 4.3 Assessment of the Impact of Covid-19 on the market

5 MARKET DYNAMICS

- 5.1 Market Drivers
 - 5.1.1 Growth in Cloud Computing and Online Applications
 - 5.1.2 Energy and Cost Efficiency Concerns
- 5.2 Market Restraints
 - 5.2.1 Limitation in Storage to Challenge the Market Growth

6 MARKET SEGMENTATION

- 6.1 By Solution
 - 6.1.1 Server
 - 6.1.2 Database
 - 6.1.3 Network

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

- 6.1.4 Other Solutions
- 6.2 By Data Center Type
 - 6.2.1 Tier 1
 - 6.2.2 Tier 2
 - 6.2.3 Tier 3
 - 6.2.4 Tier 4
- 6.3 By Deployment Mode
 - 6.3.1 On-premise
 - 6.3.2 Cloud
- 6.4 By End-user Vertical
 - 6.4.1 BFSI
 - 6.4.2 Healthcare
 - 6.4.3 Retail
 - 6.4.4 Manufacturing
 - 6.4.5 IT and Telecom
 - 6.4.6 Other End-user Verticals
- 6.5 Geography
 - 6.5.1 North America
 - 6.5.2 Europe
 - 6.5.3 Asia-Pacific
 - 6.5.4 Latin America
 - 6.5.5 Middle East & Africa

7 COMPETITIVE LANDSCAPE

- 7.1 Company Profiles
 - 7.1.1 Cisco Systems Inc.
 - 7.1.2 BMC Software Inc.
 - 7.1.3 EntIT Software LLC
 - 7.1.4 ABB Limited
 - 7.1.5 Hewlett Packard Enterprise Company
 - 7.1.6 Dell Inc.
 - 7.1.7 Oracle Corporation
 - 7.1.8 Fujitsu Ltd
 - 7.1.9 Microsoft Corporation
 - 7.1.10 VMware Inc.
 - 7.1.11 Brocade Communications Systems
 - 7.1.12 Citrix Systems Inc.
 - 7.1.13 Service Now Inc.
 - 7.1.14 Chef Software Inc.
