

India Desktop Virtualization - Market Share Analysis, Industry Trends & Statistics, Growth Forecasts (2025 - 2030)

Market Report | 2025-04-28 | 120 pages | Mordor Intelligence

AVAILABLE LICENSES:

- Single User License \$4750.00
- Team License (1-7 Users) \$5250.00
- Site License \$6500.00
- Corporate License \$8750.00

Report description:

The India Desktop Virtualization Market size is estimated at USD 2.66 billion in 2025, and is expected to reach USD 5.53 billion by 2030, at a CAGR of 15.76% during the forecast period (2025-2030).

Owing to the technological advancements that support newer work lifestyles, the face of business has changed dramatically. According to Dataquest, India is the fourth-largest market for VDI (virtual desktop infrastructure) in the world.

Key Highlights

- India is leading the global market, with an increase in the rate of adoption for desktop virtualization in financial services, IT-enabled services, and retail sectors. These sectors are driving the demand for VDI in India. In these sectors, the data storage, management, and data security are of the utmost importance. The VDI plays a prominent role in managing data efficiently and providing flexibility. The COVID-19 pandemic is spurring the adoption of cloud services across all sectors as they support remote work and collaboration; this, in turn, has increased the demand for desktop virtualization in the country.
- Desktop virtualization can be treated as a push to change with the rising trend of the remote workforce. The percentage of employees telecommunicating from different locations has been on the rise with the introduction of several innovative solutions being offered by market leaders, such as Dell Inc. and Microsoft Corporation, among others. The advantage of enabling the teleworking and remote location of staff, without compromising on safety and security of tools and applications being used, has given rise to increased work productivity, which is one of the major priorities for all end-user industries.
- However, some of the major advantages of desktop virtualization are central management, improved flexibility, lower support and administration cost, enhanced security, and improved disaster recovery capability.

Accelerating Growth in Financial Services to Boost the Desktop Virtualization Market in India

- Desktop virtualization is one of the vital IT strategies for financial services organizations of all sizes. These organizations can improve the time to market through desktop virtualization, as technology enables the transition toward IT mobility. Indian organizations, those offering financial services, operate across various time zones, globally, where a narrow downtime can cause a devastating business crisis.
- Clients of these organizations, who pay huge amounts for financial services, will not compromise on any services outage. Hence, many of the financial services organizations were not so keen on deploying desktop virtualization, due to high installation and maintenance costs, and complex infrastructure. However, there has been a shift in trend recently, as rapidly evolving technologies made virtual desktop infrastructure quite affordable.
- The latest desktop virtualization solutions offer great flexibility levels, which is vital for VDI deployments in the financial services sector. The increase in competition among vendors of cloud services has made it easier and cost-effective for the financial services organizations, to supply workloads to the cloud and support merger and acquisition and seasonal activities during tax reporting and temporary and long-term partnerships.
- The importance of desktop virtualization is rising, as more flexible and mobile workforces are increasing productivity, reputation, and customer satisfaction that are vital for a financial services organization.

On-premise Segment Holds the Largest Market Share

- In the initial stages of adoption, organizations deploying desktop virtualization solutions were skeptical of the security and control of these systems. With the on-premise segment providing a significant control and security over a cloud, this deployment model has seen rapid adoption over the last few years.
- Although the on-premise segment, currently, dominates the Indian desktop virtualization market, the growing rate of adoption of cloud services and the demand from small- and medium-sized businesses are expected to increase the adoption of cloud deployment model in India, during the forecast period.
- Most organizations find it difficult to source licenses for cloud systems, as cloud-service providers offer service-level licenses, while the software and OS licenses are to be handled by the clients. Sourcing licenses for on-premise are comparatively simpler. Connectivity and customization advantages also support the on-premise model.

India Desktop Virtualization Industry Overview

The Indian desktop virtualization market is neither consolidated nor fragmented. With large scale adoption of VDI in the Indian IT sector, the market is expected to witness many innovations and developments pertaining to desktop virtualization. Some of the key players, include Microsoft Corporation, Dell Inc., Wipro Limited, Hewlett-Packard Company, Symantec Corporation, Citrix Systems Inc., HCL Technologies Limited, and Huawei Technologies Co. Ltd, among others.

- Apr 2019 - Dell Technologies, VMware, and Microsoft planned to make their workplace software and cloud computing technologies work better together. Microsoft's Azure cloud computing customers can use VMware's Virtualization software, to manage their IT operations in Azure.
- Mar 2019 - Microsoft Corporation introduced Azure Stack HCI Solutions, which is a new implementation of its on-premise Azure

- 3 months of analyst support

Table of Contents:

1 INTRODUCTION

1.1 Study Assumptions and Market Definition

1.2 Scope of the Study

2 RESEARCH METHODOLOGY

3 EXECUTIVE SUMMARY

4 MARKET DYNAMICS

4.1 Market Overview

4.2 Industry Attractiveness - Porter's Five Forces Analysis

4.2.1 Bargaining Power of Suppliers

4.2.2 Bargaining Power of Buyers/Consumers

4.2.3 Threat of New Entrants

4.2.4 Threat of Substitute Products

4.2.5 Intensity of Competitive Rivalry

4.3 Industry Value Chain Analysis

4.4 Market Drivers

4.4.1 Increasing Demand for Bring Your Own Device (BYOD)

4.4.2 Growing Adoption of Cloud Computing

4.5 Market Restraints

4.5.1 Constraints in Setting up Suitable Infrastructure

5 MARKET SEGMENTATION

5.1 By Desktop Delivery Platform

5.1.1 Hosted Virtual Desktop (HVD)

5.1.2 Hosted Shared Desktop (HSD)

5.1.3 Other Desktop Delivery Platforms

5.2 By Mode of Deployment

5.2.1 On-premise

5.2.2 Cloud

5.3 By End-user Vertical

5.3.1 Financial Services

5.3.2 Healthcare

5.3.3 Manufacturing

5.3.4 IT and Telecommunication

5.3.5 Retail

5.3.6 Energy Sector

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

5.3.7 Education

5.3.8 Other End-user Verticals

6 COMPETITIVE LANDSCAPE

6.1 Company Profiles

6.1.1 Microsoft Corporation

6.1.2 Dell Inc.

6.1.3 Wipro Limited

6.1.4 Hewlett-Packard Company

6.1.5 Broadcom Inc. (Symantec Corporation)

6.1.6 Citrix Systems Inc.

6.1.7 HCL Technologies Limited

6.1.8 Huawei Technologies Co. Ltd

7 INVESTMENT ANALYSIS

8 FUTURE OF THE MARKET
