Report description:

The Italy Freight and Logistics Market size is estimated at 117.6 billion USD in 2025, and is expected to reach 140.9 billion USD by 2030, growing at a CAGR of 3.67% during the forecast period (2025-2030).

Rising trade, employment opportunities, and investment values are driving freight transport demand in the country

- By December 2023, Italy's port of Ancona is slated for a significant upgrade with the completion of a new EUR 108 million (USD 115.28 million) transportation link. The project, awarded to a joint venture between BESIX and Donati, encompasses a 3.3 km road commissioned by Anas, an Italian road firm. This road, featuring two tunnels and a viaduct, is expected to take three years to finish. Once operational, it will connect the international port of Ancona to the Strada Statale 16 Adriatica at the Torrette roundabout.
- The European Union's strategy to achieve climate neutrality by 2050 places a strong emphasis on a modal shift to rail, with cross-border transport playing a pivotal role in realizing the EU's Green Deal objectives. However, rail transport in Italy faces challenges, including missing links and various barriers that hinder its competitiveness. Despite these hurdles, Italy's rail sector holds a 10% modal split. Notably, companies like FS Group have ambitious investment plans, earmarking EUR 160 billion (USD 170.79 billion) for infrastructure and EUR 190 billion (USD 202.82 billion) for overland transport by 2030.

Growing future prospects due to planned overhaul of superheavy cargo transport fleet by 2026 in Italy

- In July 2024, the Italian Ministry of Transport greenlit a project to establish a rail freight station in Piacenza, strategically placed between Milan and Bologna. The upcoming station will be situated in the eastern part of Piacenza, specifically in the Le Mose area. Moreover, Le Mose already hosts the Piacenza Intermodal Terminal, overseen by Hupac. This existing terminal is currently undergoing significant enhancements, with completion slated for late 2024 or early 2025. These developments paint a promising future for Piacenza's rail freight prospects.
- In 2024, Italy plans to upgrade its superheavy cargo transport fleet due to poor conditions and failure to meet EU standards. Shippers and carriers are urging the government to implement a public incentive plan amid challenges from the Russian-Ukrainian conflict and stricter EU regulations. The plan requires a USD 747.24 million investment by 2026 to phase out 25-30% of the oldest, most polluting, and least safe vehicles over three years. Italy's support for the freight sector has lagged behind France and Germany, but changes are expected as early as late 2024.

Fuel prices surged in Italy after the discount on fuel-related excise duties expired at the end of 2022

- For the last three years, Italy has consistently held the record for the highest average wholesale power prices among major European markets. This is primarily due to its heavy reliance on natural gas for electricity generation, a strategy that sets it apart from its European counterparts. In 2023, Italy's wholesale power prices stood at an average of USD 137.80 per megawatt hour, a figure that was a third higher than both Germany's and France's averages, and over 50% more than Spain's. Moving into 2024, Italy's power costs have continued to surge, with recent wholesale prices sitting nearly 40% above France's and a striking 60% higher than Spain's.
- As of March 2024, Italy's power and gas regulator, Arera, has increased the maximum payments in capacity auctions for 2025-2027 to USD 86,466.7/MW for new capacity. Previous auctions for 2022-2024 offered maximum payments of USD 74,724.3/MW for new capacity and USD 35,227.2/MW for existing capacity, payable over 15 years. In coming years, Italian power demand will rise due to increased electrification from electric vehicles, heat pumps, and electrolyzers.

Italy Freight and Logistics Industry Overview

The Italy Freight and Logistics Market is fragmented, with the major five players in this market being DHL Group, DSV A/S (De Sammensluttede Vognmand af Air and Sea), FedEx, Kuehne+Nagel and Savino Del Bene SpA (sorted alphabetically).

2 REPORT OFFERS

3 INTRODUCTION

- 3.1 Study Assumptions & Market Definition
- 3.2 Scope of the Study?
- 3.3 Research Methodology

4 KEY INDUSTRY TRENDS

- 4.1 Demographics
- 4.2 GDP Distribution By Economic Activity
- 4.3 GDP Growth By Economic Activity
- 4.4 Inflation
- 4.5 Economic Performance And Profile
 - 4.5.1 Trends in E-Commerce Industry
 - 4.5.2 Trends in Manufacturing Industry
- 4.6 Transport And Storage Sector GDP
- 4.7 Export Trends
- 4.8 Import Trends
- 4.9 Fuel Price
- 4.10 Trucking Operational Costs
- 4.11 Trucking Fleet Size By Type
- 4.12 Logistics Performance
- 4.13 Major Truck Suppliers
- 4.14 Modal Share
- 4.15 Maritime Fleet Load Carrying Capacity
- 4.16 Liner Shipping Connectivity
- 4.17 Port Calls And Performance
- 4.18 Freight Pricing Trends
- 4.19 Freight Tonnage Trends
- 4.20 Infrastructure
- 4.21 Regulatory Framework (Road and Rail)
 - 4.21.1 Italy
- 4.22 Regulatory Framework (Sea and Air)
 - 4.22.1 Italy
- 4.23 Value Chain & Distribution Channel Analysis

5 MARKET SEGMENTATION (includes 1. Market value in USD for all segments 2. Market volume for select segments viz. freight transport, CEP (courier, express, and parcel) and warehousing & storage 3. Forecasts up to 2030 and analysis of growth prospects)

- 5.1 End User Industry
 - 5.1.1 Agriculture, Fishing, and Forestry
 - 5.1.2 Construction
 - 5.1.3 Manufacturing
 - 5.1.4 Oil and Gas, Mining and Quarrying
 - 5.1.5 Wholesale and Retail Trade
 - 5.1.6 Others
- 5.2 Logistics Function
