Report description:

The LA Glass Bottles And Containers Market size in terms of shipment volume is expected to grow from 10.61 million tons in 2025 to 12.83 million tons by 2030, at a CAGR of 3.86% during the forecast period (2025-2030).

Latin America's Container Glass market is experiencing robust growth, driven by the region's expanding middle class. This trend is poised to attract increased investments from end-user industries, further bolstering the market's expansion during the forecast period.

Key Highlights

- In Latin America, a region with several rapidly developing nations, the rising demand for eco-friendly and sustainable packaging solutions is a key growth driver. Glass packaging, being recyclable, reusable, and environmentally friendly, has gained favour among consumers and manufacturers.
- The beverage industry's rising demand is propelling the market forward. Data from Argentina's Secretary of Integral Policy on Drugs highlights that the country leads in per capita alcohol consumption. Brazil mirrors this trend with its high alcohol consumption rates. Additionally, the increasing popularity of non-alcoholic beverages like milk and juices further broadens the region's market for glass bottles and containers.
- Innovations like lightweight glass and efficient recycling methods are energizing the market. Advanced production techniques, especially the introduction of thin-walled and lightweight glass containers, have streamlined manufacturing processes. Notably, the Narrow Neck Press and Blow process has played a pivotal role in reducing the weight of glass bottles produced in Latin America.
- Various end-user industries, including pharmaceuticals, are rising in the region. Brazil's rapidly expanding pharmaceutical sector stands out as a significant growth driver. Over the last ten years, Brazil has solidified its position as a critical supplier to other

www.scotts-international.com

emerging South American markets. With the pharmaceutical industry's production capacity on the rise, the demand for glass packaging also exists.

- However, the market faces challenges from competing substitute products. As consumer preferences shift towards more convenient handling solutions, there's a growing demand for flexible packaging options. Moreover, advancements in plastic packaging solutions present a notable challenge to the glass packaging sector.

Latin America Glass Bottles & Containers Market Trends

Dairy-based Products to Hold a Significant Share

- Latin America's dairy market is one of the fastest-growing markets in the world. While broader prosperity has helped shift demand from glass to rigid plastic and metal, demand for value-added packaging like reusable glass is still high. Refillable glass bottles have long made beverages, like milk, more affordable for consumers in this region.
- Glass bottles are mainly used for packaging milk. They preserve the flavour of dairy products, such as milk, much longer than other types of packaging. This is because glass is less likely to allow contents to mix with air or other possible chemicals.
- Research from credible entities, including National Geographic, Time, Business Insider, and the US Food and Drug Administration, underscores the disadvantages of plastic bottles and especially highlights the benefits of glass bottles.
- As the US Department of Agriculture reported, Brazil and Mexico are the top two milk-producing nations in Latin America. 2023 Brazil's milk production reached approximately 25.2 million metric tons, while Mexico's output was 13.5 million metric tons. This marks an uptick from their respective 2022 figures of 24.7 million metric tons and 13.25 million metric tons.
- The market is also witnessing challenges in the production of milk. As the Agriculture and Horticulture Development Board reported in November 2024, milk production saw a tough start to the year marked by low economic confidence and adverse weather conditions. At the same time, many regions reported decreased volumes in September. Notably, milk production in Argentina saw a drop of only 1.9% in September. Argentina's milk production lagged significantly behind last year's figures. This setback was attributed to harsh weather conditions and the erosion of milk prices due to rampant inflation.

Cosmetics Sector to Drive the Market Growth

- In Latin America, the cosmetic packaging segment, encompassing skincare, hair care, and perfumes, increasingly favours glass packaging for high-end luxury products. This trend is gaining momentum as glass enhances the product's elegance and elevates its premium status.
- Rising disposable incomes in countries like Brazil fuel a global demand for premium cosmetic products. Brazil's cosmetics industry is expanding and has established itself as one of the fastest-growing and most dynamic in the world.
- Brazilians are increasingly prioritizing grooming and personalization. Over the past decade, cosmetic product sales have surged from 8% to 10%, positioning Brazil as Latin America's top cosmetics consumer. The youth's keen interest in grooming, especially men, underscores the rising demand for glass packaging in cosmetics.
- Brazil is Latin America's premier beauty and personal care hub and one of the prominent players in the world's leading cosmetics markets. Data from the Brazilian Association of Personal Hygiene, Perfumery and Cosmetics (ABIHPEC) highlights a historic milestone for the sector, with exports surging by 17.2% in the year's initial four months and a remarkable 25.5% jump in April 2023.
- Further, According to the National Institute of Statistics and Geography, the annual production value of cosmetics, perfumes, and toiletries in Mexico in 2020 was MXN 124.75 billion (USD 7.03 billion), which has increased to MXN 146.51 billion (USD 8.26 billion). Therefore, a rise in sales of cosmetics and other related products would advance the need for container glass across the

www.scotts-international.com

industry.

- One of the significant factors driving the market's growth is the rise in the acquisition of cosmetic companies with international brands. For instance, in July 2023, Evonik acquired Novachem, an Argentinian innovator of sustainable cosmetic activities. Novachem will allow us to bring even more innovative and sustainable solutions to customers in the personal care market.

Latin America Glass Bottles & Containers Industry Overview

Glass is preferred for product packaging due to its ability to minimize contamination risks and protect contents from damage. As a rigid packaging solution, glass encompasses diverse densities, sizes, and shapes to safeguard its contents. The market offers various forms of container glass, prominently featuring bottles. In Latin America, the glass market is witnessing accelerated growth, driven by rising consumer acceptance of glass as a trusted packaging choice, prioritizing health, taste, and environmental safety.

The Latin American container glass market is fragmented. Regional players and international vendors compete for market share by attracting customers with prices and significant competitive strategies, leading to moderate market competition. Key players are Vitro, S.A.B. de CV, Owens-illinois Inc., Wheaton Brasil Group, Orora Limited, and others.

Additional Benefits:

- The market estimate (ME) sheet in Excel format
- 3 months of analyst support

Table of Contents:

1 INTRODUCTION

- 1.1 Study Assumptions and Market Definition
- 1.2 Scope of the Study

2 RESEARCH METHODOLOGY

3 EXECUTIVE SUMMARY

4 MARKET INSIGHTS

- 4.1 Market Overview
- 4.2 PESTEL ANALYSIS - Container Glass Industry in Latin America
- 4.3 Industry Standards and Regulations for Container Glass for Packaging
- 4.4 Raw Material Analysis & Material Considerations for Packaging
- 4.5 Sustainability Trends for Packaging
- 4.6 Container Glass Furnace Capacity and Location in Latin America

5 MARKET DYNAMICS

- 5.1 Market Drivers
 - 5.1.1 Growing Demand from Beverage Industry
 - 5.1.2 Recent Innovations Such as Lightweight and Effective Recycling
- 5.2 Market Restraint
 - 5.2.1 High Competition From Substitute Products
- 5.3 Analysis of the Current Positioning of Latin America in the Latin America Container Glass Market

5.4 Trade Scenario - Analysis of the Historical and Current Export-Import Paradigm for the Container Glass Industry in Latin America

6 MARKET SEGMENTATION

6.1 By End-user Industry

6.1.1 Beverage

6.1.1.1 Alcoholic Beverages

6.1.1.1.1 Wines and Spirits

6.1.1.1.2 Beer and Cider

6.1.1.2 Non-Alcoholic Beverages

6.1.1.2.1 Carbonated Drinks

6.1.1.2.2 Water

6.1.1.2.3 Dairy-Based

6.1.1.2.4 Other Non-Alcoholic Beverages

6.1.2 Food

6.1.3 Cosmetics

6.1.4 Pharmaceuticals

6.1.5 Other End user verticals

6.2 By Country***

6.2.1 Brazil

6.2.2 Mexico

6.2.3 Argentina

7 COMPETITIVE LANDSCAPE

7.1 Company Profiles

7.1.1 Vitro, S.A.B. de CV

7.1.2 Wheaton Brasil Group

7.1.3 Orora Limited

7.1.4 Saverglass SAS

7.1.5 Owens-illinois Inc.

7.1.6 Ardagh Group S.A.

7.1.7 Verallia SA

7.1.8 Gerresheimer AG

8 SUPPLEMENTARY COVERAGE - ANALYSIS OF MAJOR FURNACE SUPPLIERS TO CONTAINER GLASS PLANTS IN LATIN AMERICA

9 FUTURE OUTLOOK OF THE MARKET
