Post Covid Fast food restaurants in UAE observed an increase in their sales value rising to the level of USD 4,500 Million last year with this the price of small kitchen appliances in the United Arab Emirates had observed a continuous increase post covid hurting the sales of Smokeless Indoor Grills. With Covid, the need for sustainable buildings with a focus on hygiene becomes the calling card of urban planning and raised the demand for smokeless indoor grills as they are more eco-friendly than coal-based grills.

Middle East exists as the region with the largest share of shoppers considering brand sustainability and demanding sustainable products. This is leading to Smokeless Indoor grill manufacturers opting for the middle east market to increase their sales and revenue. The Electricity price in the Middle East is existing at a significantly low level in comparison to other developed nations, which leads to grills run by electricity as a first demand in the region.

Middle East Smokeless Indoor Grills Market Trends

Adoption Of Energy Efficient Products Driving The Market

The fuel sources favored by most backyard barbecues are having negative environmental effects. The emissions produced when burning coal, wood, and gas negatively impact the planet, with existing troubling issues surrounding their extraction at the source. In comparison to the other methods of grilling methods, such as burning wood pellets, electric grills release 99% less carbon monoxide and 91% less carbon dioxide. In addition to this smokeless indoor grills have features of temperature control, are cost-effective, and require less maintenance.
