Report description:

The Nigeria Lubricants Market size is estimated at 574.93 million liters in 2025, and is expected to reach 695.80 million liters by 2030, at a CAGR of 3.89% during the forecast period (2025-2030).

Key Highlights

- Largest Segment by End-user Industry Automotive : Automotive is the largest end-user among all segments due to the high proportion of engine oils and gear oils used in motor vehicles than in any industrial application.
- Fastest Segment by End-user Industry Power Generation : Due to the increasing use of natural gas reactors and wind turbines for energy generation, power generation is the fastest-growing end-user of lubricants in Nigeria.
- Largest Segment by Product Type Engine Oils : Due to the varying engine sizes of cars, trucks, and buses and the high oil changing frequencies, engine oil is the most widely used product category in Nigeria.
- Fastest Segment by Product Type Metalworking Fluids: Nigeria has several government policies that are likely to propel the manufacturing industry and increase metalworking fluid consumption at a faster rate in the coming years.

Nigeria Lubricants Market Trends

Largest Segment By End User: Automotive

- In 2020, COVID-19-related restrictions led to declined maintenance requirements from several industries. The major impact was observed in the automotive industry, which recorded a dip of 5.9% during 2019-2020, followed by heavy equipment (4.7%).
- Power generation is likely to be the fastest-growing end-user industry of the Nigerian lubricants market during 2021-2026, with a CAGR of 5.39%, followed by metallurgy and metalworking (5.2%). The growing vehicle sales and production are likely to drive the consumption of lubricants in the automotive industry in the future.
