Report description:

The North America Smokeless Indoor Grills Market is expected to register a CAGR of greater than 4% during the forecast period.

The North American market saw a growing demand for indoor smokeless grills due to consumer's desire to enjoy grilled foods. The changing lifestyles and an increase in social events, parties, and camping are also likely to drive the market demand for smokeless grills. These grills are user-friendly, easy to store, lightweight, and require less maintenance; these factors are expected to boost the market demand.

Rapid urbanization, coupled with shrinking living spaces, has led to a surge in demand for compact and convenient cooking solutions. Indoor Smokeless Grills address this need by allowing individuals to enjoy the grilling experience within the confines of their homes without compromising on taste or convenience.

Due to the COVID-19 pandemic, the North American indoor Grills market saw an upsurge in demand. Initially, due to supply chain disruptions, the market saw a decline in sales. Later, in the middle of COVID-19 and post-COVID-19, the increase in health consciousness among people fueled the market.
