- Corporate License \$8750.00

Report description:

The Pakistan Lubricants Market size is estimated at 196.87 million liters in 2025, and is expected to reach 218.64 million liters by 2030, at a CAGR of 2.12% during the forecast period (2025-2030).

Due to the COVID-19 outbreak, nationwide lockdowns around the globe disrupted manufacturing activities and supply chains, and production halts impacted the market in 2020. However, the sector is recovering well since restrictions were lifted. An increase in automotive sales, power generation, and demand for food and beverages have led the market recovery over the last two years.

The primary factor driving the market's growth is the augmenting automotive production in Pakistan. With the increasing Chinese investment in the past few years, the market studied is expected to see an increase in demand over the forecasted period.

On the flip side, the sluggish growth in the textile industry is anticipated to restrain the development of the target industry over the forecast period.

Potential growth in the renewable energy sector will likely act as an opportunity for the market studied.

Pakistan Lubricants Market Trends

Engine Oil to Dominate the Market

- In the automobile sector, lubricants with many qualities are used in multiple application areas for many purposes, including

decreasing friction, preventing corrosion and rust development, and maintaining the component's cleanliness.

- The most common form of lubricant used in the automotive sector is engine oils. Engine oils keep the engine clean and stop particle buildup and rust development. Additionally, engine oils increase performance and fuel economy, lengthen engine life, and lower vehicle emissions. Engine oils are widely used to lubricate internal combustion engines and generally comprise 75-90% base oils and 10-25% additives.

- According to the International Organization of Motor Vehicle Manufacturers (OICA), the number of passenger cars sold in Pakistan in 2022 reached 188,318 units.

- According to the International Council on Clean Transportation, Pakistan's government established an ambitious National Electric Vehicles Policy (NEVP), with objectives and incentives aimed at capturing 30% of all passenger car and heavy-duty truck sales by 2030 and 90% by 2040. It sets even higher targets for two- and three-wheelers and buses, with 50% new sales by 2030 and 90% by 2040.

- DICE Foundation, a group of Pakistanis in the United States, Canada, and the United Kingdom, is preparing to launch the country's first electric automobile.

- According to the Pakistan Automotive Manufacturers Association (PAMA), the production of public transport, such as buses, increased from 661 units in 2021 to 701 units in 2022.

- With all the above factors, the demand for engine oils is expected to increase at a moderate pace in the forecasted period in Pakistan.

Automotive and Transportation to Dominate the Market

- In the automobile sector, lubricants with a wide range of qualities are used in multiple application areas for many purposes, including decreasing friction, preventing corrosion and rust development, and maintaining the cleanliness of the components, among others.

- The most common form of lubricant used in the automotive sector is engine oils. Engine oils are used to keep the engine clean and stop particle buildup and rust development. Additionally, engine oils increase performance and fuel economy, lengthen engine life, and lower vehicle emissions.

- According to the statistics of the Pakistan Automotive Manufacturers Association (PAMA), in October 2023, a total of 250.0 units were recorded as trucks and buses.

- According to the Arab News, automobile sales were 60 percent lower in 2023 than the previous year. In the next two years, Pakistan's economic indicators are likely to improve, which will likely increase annual vehicle sales to 350,000 units, the country's top official said.

- Furthermore, according to the International Organization of Motor Vehicle Manufacturers (OICA), the sales of new vehicles in Pakistan were 227,392 units in 2022, which increased by 21.1 % from 2019 to 2022.

- As the automotive industry continues to grow and modernize, the need for high-quality lubricants for vehicles and machinery increases in Pakistan.

- Factors such as expanding road networks, rising vehicle ownership, and industrial developments contribute to the dominance of automotive industries in the Pakistan Lubricants Market.

Pakistan Lubricants Industry Overview

Pakistan's lubricants market is partially consolidated, with various global and domestic players in the country. Some of the major players in the market (not in any particular order) include Shell, Chevron Corporation, Exxon Mobil Corporation, Pakistan State Oil, and Hi-Tech Lubricants Limited, among other companies.

Additional Benefits:

- The market estimate (ME) sheet in Excel format
- 3 months of analyst support

Table of Contents:

- 1 INTRODUCTION
- 1.1 Study Assumptions
- 1.2 Scope of the Study

2 RESEARCH METHODOLOGY

3 EXECUTIVE SUMMARY

4 MARKET DYNAMICS

- 4.1 Drivers
- 4.1.1 Positive Outlook for the Automotive Industry
- 4.1.2 Increasing Chinese Investments in the Country
- 4.2 Restraints
- 4.2.1 Sluggish Growth in Textile Industry
- 4.3 Industry Value Chain Analysis
- 4.4 Porter's Five Forces Analysis
- 4.4.1 Bargaining Power of Suppliers
- 4.4.2 Bargaining Power of Buyers
- 4.4.3 Threat of New Entrants
- 4.4.4 Threat of Substitute Products and Services
- 4.4.5 Degree of Competition

5 MARKET SEGMENTATION (Market Size in Volume)

- 5.1 Product Type
- 5.1.1 Engine Oil
- 5.1.2 Transmission and Hydraulic Fluid
- 5.1.3 General Industrial Oil
- 5.1.4 Gear Oils
- 5.1.5 Grease
- 5.1.6 Other Product Types (Process Oil and Turbine Oil)
- 5.2 End-user Industry
- 5.2.1 Power Generation
- 5.2.2 Automotive and Transportation
- 5.2.3 Heavy Equipment
- 5.2.4 Food and Beverage
- 5.2.5 Other End-user Industries (Construction and Food and Beverage Industry)

6 COMPETITIVE LANDSCAPE

- 6.1 Mergers and Acquisitions, Joint Ventures, Collaborations, and Agreements
- 6.2 Market Share (%)** /Ranking Analysis
- 6.3 Strategies Adopted by Leading Players

6.4 Company Profiles
6.4.1 Chevron Corporation
6.4.2 Cnergyico
6.4.3 Exxon Mobil Corporation
6.4.4 Hascol Petroleum Ltd.
6.4.5 Hi-Tech Lubricants Limited
6.4.6 Karachi Lubricants (pvt) Ltd.
6.4.7 Pak HY-Oils
6.4.8 Pakistan Lubricants (Pvt.) Ltd.
6.4.9 Pakistan State Oil
6.4.10 Petroliam Nasional Berhad (PETRONAS)
6.4.11 Shell
6.4.12 TotalEnergies

7 MARKET OPPORTUNITIES AND FUTURE TRENDS

7.1 Promising Renewable Energy Sector

Pakistan Lubricants - Market Share Analysis, Industry Trends & Statistics, Growth Forecasts (2025 - 2030)
