Company) enhancing awareness of the company's business trends, growth perspectives, and more.

Key Highlights

Silicon Valley Bank, founded in 1983, was a leading financial institution headquartered in Santa Clara, California, United States. The bank primarily served clients in the innovation sector, including startups, growth-stage companies, and venture capital firms. Over the years, SVB developed a strong reputation for being the financial backbone of the technology and life sciences industries. It became a preferred banking partner for nearly half of all venture-backed technology and life sciences companies in the United States.

SVB operated internationally with offices and operations in key global innovation hubs such as the United Kingdom, Israel, India, and China, expanding its reach to support clients across continents. The bank's core business segments included commercial banking, investment banking, and private banking, each tailored to meet the complex financial needs of innovative and fast-growing enterprises. In 2023, following financial instability linked to a sharp rise in interest rates and concentrated depositor activity, the bank was acquired by First Citizens Bank, which continued to provide services under the SVB brand.
