

India Metal Injection Molding Market, By Material Type (Stainless Steel, Low Alloy Steel, Soft Magnetic Material), By End User (Automotive, Medical & Healthcare, Electrical & Electronics, Others), By Region, Competition, Forecast & Opportunities, 2021-2031F

Market Report | 2025-05-16 | 86 pages | TechSci Research

AVAILABLE LICENSES:

- Single User License \$3500.00
- Multi-User License \$4500.00
- Custom Research License \$7000.00

Report description:

Market Overview

The India Metal Injection Molding (MIM) Market was valued at USD 210 million in 2025 and is projected to reach USD 319 million by 2031, expanding at a CAGR of 7.07% during the forecast period. MIM is a precision manufacturing process that merges the design versatility of plastic injection molding with the durability and strength of metal. It is particularly suited for producing small, intricate metal components in large volumes with exceptional accuracy. The process begins with a mixture of fine metal powders and a plastic-wax binder, which is injected into molds. These molded "green parts" undergo debinding to remove binders, followed by high-temperature sintering, resulting in dense metal parts that closely replicate the mold's fine details. Achieving up to 99% density of wrought metal, MIM offers cost-effectiveness, material efficiency, and high output rates. This makes it an optimal solution for producing complex components used in medical devices, automotive assemblies, electronics, and aerospace applications.

Key Market Drivers

Growing Demand from the Automotive Sector

A key growth driver for India's MIM market is the expanding automotive industry, which increasingly demands lightweight, precision-engineered components. MIM is highly advantageous for manufacturing intricate parts such as gears, fuel injection components, housings, and turbocharger elements essential to modern vehicles. The Indian government's initiatives like "Make in India" and Production Linked Incentive (PLI) schemes have spurred domestic automotive manufacturing, boosting the need for advanced component technologies like MIM. The rising production of electric vehicles (EVs) has further accelerated demand for compact, precision components that MIM can efficiently produce. Global OEMs are also outsourcing more production to India,

www.scotts-international.com

providing local MIM manufacturers an opportunity to integrate into international supply chains. Increased R&D activity has improved MIM materials and techniques in India, enhancing performance and reducing costs. As automotive players focus on lightweighting and energy efficiency, MIM's role in supporting high-performance vehicle components is set to increase, further anchoring its relevance in the sector.

Key Market Challenges

High Initial Capital Investment and Limited Infrastructure

One of the major hurdles for the MIM market in India is the high initial investment required to establish manufacturing facilities. MIM involves complex processes that need specialized machinery for feedstock preparation, precision molding, debinding, and sintering, along with advanced quality control systems. These infrastructure requirements lead to high capital expenditure, which acts as a barrier for small and medium enterprises. Moreover, the domestic supply of essential MIM raw materials like ultra-fine metal powders and binders remains limited, making manufacturers reliant on imports. This dependency results in higher production costs and longer lead times. Compared to countries with established MIM ecosystems, such as China and Germany, India lacks adequate industrial clusters, innovation hubs, and academic-industry linkages to support MIM growth at scale. Addressing these infrastructure gaps through government support, financing schemes, and strategic partnerships will be essential for the widespread adoption and expansion of MIM technology in India.

Key Market Trends

Rising Adoption in the Consumer Electronics Sector

A growing trend in India's MIM market is the increasing use of the technology in consumer electronics manufacturing. As smartphones, wearables, tablets, and laptops become more compact and advanced, manufacturers require miniaturized metal parts with precise dimensions and superior finishes. MIM is uniquely suited for producing such components, including housings, brackets, and connectors. India's rise as a consumer electronics production hub-supported by initiatives like "Digital India" and "Make in India"-has driven strong demand for these parts. Additionally, consumer preference for sleek, lightweight, and durable devices is pushing manufacturers to adopt MIM to enhance product aesthetics and functionality. The ability of MIM to consolidate multiple functions into a single, efficiently produced part makes it ideal for modern electronic device manufacturing. As the sector continues to expand, MIM is expected to play an increasingly important role in supporting innovation and precision in electronics.

Key Market Players

- ARC Group Worldwide
- Dynacast International
- Phillips-Medsize
- NetShape Technologies
- Smith Metal Products
- Dean Group International
- CMG Technologies
- Sintex A/S

Report Scope:

In this report, the India Metal Injection Molding Market has been segmented into the following categories, in addition to the industry trends which have also been detailed below:

- India Metal Injection Molding Market, By Material Type:

- o Stainless Steel
- o Low Alloy Steel
- o Soft Magnetic Material

- India Metal Injection Molding Market, By End User:

- o Automotive
- o Medical & Healthcare
- o Electrical & Electronics
- o Others

- India Metal Injection Molding Market, By Region:

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

- o South India
- o North India
- o West India
- o East India

Competitive Landscape

Company Profiles: Detailed analysis of the major companies present in the India Metal Injection Molding Market.

Available Customizations:

India Metal Injection Molding Market report with the given market data, TechSci Research offers customizations according to a company's specific needs. The following customization options are available for the report:

Company Information

- Detailed analysis and profiling of additional market players (up to five).

Table of Contents:

1. Product Overview
 - 1.1. Market Definition
 - 1.2. Scope of the Market
 - 1.2.1. Markets Covered
 - 1.2.2. Years Considered for Study
 - 1.3. Key Market Segmentations
2. Research Methodology
 - 2.1. Objective of the Study
 - 2.2. Baseline Methodology
 - 2.3. Formulation of the Scope
 - 2.4. Assumptions and Limitations
 - 2.5. Sources of Research
 - 2.5.1. Secondary Research
 - 2.5.2. Primary Research
 - 2.6. Approach for the Market Study
 - 2.6.1. The Bottom-Up Approach
 - 2.6.2. The Top-Down Approach
 - 2.7. Methodology Followed for Calculation of Market Size & Market Shares
 - 2.8. Forecasting Methodology
 - 2.8.1. Data Triangulation & Validation
3. Executive Summary
 - 3.1. Overview of the Market
 - 3.2. Overview of Key Market Segmentations
 - 3.3. Overview of Key Market Players
 - 3.4. Overview of Key Regions/Countries
 - 3.5. Overview of Market Drivers, Challenges, and Trends
4. Voice of Customer
5. India Metal Injection Molding Market Outlook
 - 5.1. Market Size & Forecast
 - 5.1.1. By Value
 - 5.2. Market Share & Forecast
 - 5.2.1. By Material Type (Stainless Steel, Low Alloy Steel, Soft Magnetic Material)
 - 5.2.2. By End User (Automotive, Medical & Healthcare, Electrical & Electronics, Others),
 - 5.2.3. By Region (South India, North India, West India, East India)

Scotts International. EU Vat number: PL 6772247784

www.scotts-international.com

- 5.2.4. By Company (2025)
- 5.3. Market Map
- 6. South India Metal Injection Molding Market Outlook
 - 6.1. Market Size & Forecast
 - 6.1.1. By Value
 - 6.2. Market Share & Forecast
 - 6.2.1. By Material Type
 - 6.2.2. By End User
- 7. North India Metal Injection Molding Market Outlook
 - 7.1. Market Size & Forecast
 - 7.1.1. By Value
 - 7.2. Market Share & Forecast
 - 7.2.1. By Material Type
 - 7.2.2. By End User
- 8. West India Metal Injection Molding Market Outlook
 - 8.1. Market Size & Forecast
 - 8.1.1. By Value
 - 8.2. Market Share & Forecast
 - 8.2.1. By Material Type
 - 8.2.2. By End User
- 9. East India Metal Injection Molding Market Outlook
 - 9.1. Market Size & Forecast
 - 9.1.1. By Value
 - 9.2. Market Share & Forecast
 - 9.2.1. By Material Type
 - 9.2.2. By End User
- 10. Market Dynamics
 - 10.1. Drivers
 - 10.2. Challenges
- 11. Market Trends & Developments
 - 11.1. Merger & Acquisition (If Any)
 - 11.2. Product Launches (If Any)
 - 11.3. Recent Developments
- 12. Policy and Regulatory Landscape
- 13. India Economic Profile
- 14. Company Profiles
 - 14.1. ARC Group Worldwide
 - 14.1.1. Business Overview
 - 14.1.2. Key Revenue and Financials
 - 14.1.3. Recent Developments
 - 14.1.4. Key Personnel/Key Contact Person
 - 14.1.5. Key Product/Services Offered
 - 14.2. Dynacast International
 - 14.3. Phillips-Medisize
 - 14.4. NetShape Technologies
 - 14.5. Smith Metal Products
 - 14.6. Dean Group International
