### **Report description:**

The Colombia deodorant market reached USD 178.38 Million in 2024. The market is projected to grow at a CAGR of 3.70% between 2025 and 2034, reaching almost USD 256.53 Million by 2034.

#### Colombia Deodorant Market Growth

In 2022, Colombia's GDP recorded a year-on-year growth of 7.50%. Per capita GDP witnessed a year-on-year surge of \$434, pointing towards an increase in consumers' purchasing power. In 2022, people spent \$323 million on purchasing personal care and beauty products, which made Colombia among the top five markets in Latin America for makeup and cosmetics.

Cruelty-free deodorants are extremely popular among Colombian consumers. Through Law 2047, the Colombian government has discouraged the production, marketing, importing, and testing of any cosmetic/grooming products that are animal tested.

The emerging focus on sustainability is expected to drive the market growth. There is a growing usage of natural ingredients and raw materials such as eucalyptus, peppermint, lemon, rosemary, and lavender, among others. Refillable deodorant cases are expected to become the most popular form of packaging among deodorant manufacturers as they minimise waste generation and utilise recycled paperboard.

Increasing living standards and rising consciousness for personal hygiene are expected to drive the demand for aluminium-free deodorants over the forecast period. Roll-ons are expected to remain one of the most popular formats of deodorant application.
