Egypt Automotive Aluminum Market Growth

The expansion of the automotive sector in the country, stringent rules and regulations emphasising the usage of light materials such as aluminum for automotive production, and the shift towards electric vehicles are some of the prominent market drivers. Automakers are increasingly focused on reducing the weight of vehicles and improving their fuel efficiency, which boosts the demand for materials like aluminum which is lighter than steel.

Improved alloy composition of aluminum to enhance its properties and further make it attractive for usage in different vehicle components is an emerging trend in the market. Furthermore, the growing focus on a robust supply chain in Egypt to ensure a steady supply of aluminum in various end-use sectors such as construction and automotive is fostering the market expansion.
