### **Report description:**

The India cement market reached around 338.04 MMT in 2024. The market is projected to grow at a CAGR of 5.40% between 2025 and 2034 to reach nearly 571.97 MMT by 2034.

#### India Cement Market Growth

In 2024-25, the market in India is expected to add 70-75 MT of additional production capacity, 55% of which is expected to be concentrated in India's central and eastern regions.

India is the world's fastest-growing economy, which recorded an economic growth of 8.4% between September and November 2023. In March 2024, the government announced its plan to allocate nearly \$15 billion for infrastructure development across the government. Telangana (\$630 million), Odisha (\$196 million), Kolkata (\$154 million), Bihar (\$128 million), and northeastern states (\$100 million) were the major beneficiaries of these schemes. This is expected to raise the demand for cement over the forecast period.

Rural and semi-urban regions of India are expected to witness substantial growth in the demand for housing due to the proposed reduction of stamp duties and amendments to the GST law under the Union Budget 2024. The finance ministry has allocated a budget of INR 10 lakh crore, with a contribution of INR 2.2 lakh crore from the central government to build additional 3 crore houses in the country. This is expected to drive the demand for cement in the country in the forecast period.

The reduction in fuel, freight, and energy prices has eased the pressure on Indian cement manufacturers. Their operating margins are expected to increase by 300-350 basis points to nearly 18.5% in 2024.
