### **Report description:**

The India crane market reached approximately USD 1.07 Billion in 2024. The market is projected to grow at a CAGR of 5.10% between 2025 and 2034, reaching a value of around USD 1.76 Billion by 2034.

#### India Crane Market Growth

The mining sector in India witnessed a total of 1,319 mines reporting mineral production in the fiscal year 2021-22. India's diverse mineral production includes 95 different minerals, ranging from fuel to metallic, non-metallic, atomic, and minor minerals. This abundance of mineral resources has significantly boosted mining activities across the country. Cranes are essential in the mining sector, playing a crucial role in handling heavy loads, transporting materials, and supporting construction and maintenance tasks. In underground mining, cranes are indispensable for moving equipment and materials through shafts and tunnels, improving operational efficiency and safety.

In 2022, the India logistics sector represented 14.4% of the overall GDP of the country, buoyed by technological advancements and the flourishing e-commerce industry. The Indian government is also introducing various initiatives to streamline logistics operations and lower logistics costs. Cranes are essential in the logistics sector, boosting the effectiveness, safety, and efficiency of various activities. From loading and unloading goods to constructing logistics infrastructure and automating warehouse systems, cranes play a crucial role in contemporary logistics. With the sector progressing, the requirement for advanced and dependable crane solutions is anticipated to increase, propelling further advancements and enhancements in crane technology customised to the specific demands of logistics operations.
