### **Report description:**

The India webcam market reached around USD 255.36 Million in 2024. The market is projected to grow at a CAGR of 9.00% between 2025 and 2034 to reach nearly USD 604.53 Million by 2034.

#### India Webcam Market Growth

India's edtech industry, which is valued at over INR 15,000 crores is expected to grow at a CAGR of over 45% during the forecast period. In H1 2019, the industry received an investment of \$100 million, which rose to \$800 million year-on-year. Nearly 1.4 million schools, 51,000 colleges, and 300 million students in India depend on online education to fulfil their potential. Almost 65% of India's population is aged between 12-29 years, of which nearly 7 million students use mobile phones for assignments and projects. Online test preparation platforms are expected to grow at a CAGR of 64%, with primary and secondary education (60% CAGR), language learning (42% CAGR), and higher education (41% CAGR) following closely. This is expected to increase the demand for good quality webcams embedded in laptops and mobile phones that ensure a seamless learning experience during live interactive classes, thereby driving market growth.

Live entertainment events have become increasingly popular in India. In 2022, nearly 8 million people attended over 19,000 events and live entertainment shows, as per Book My Show's annual report. Companies like Paytm Insider witnessed a growth of 4 times in revenue and 2.5 times in the number of active users. This is expected to accelerate the demand for premium webcams that provide a seamless experience of entertainment to people, thereby driving market expansion.
