### **Report description:**

The Japan air conditioners market size is projected to grow at a CAGR of 2.32% between 2025 and 2034.

Based on the end use, commercials boost the Japan air conditioners market growth as they are designed to cater for the need for large spaces, such as offices, restaurants, or hotels and often come with advanced features like central controls, zone cooling and energy management systems

Commercial air conditioners are made for large spaces, such as offices, restaurants, or hotels. Customisation options meet specific needs, while durability ensures longevity under demanding conditions with advanced features such as energy management and zone cooling. Prioritising efficiency cuts business costs, with benefits such as maintenance services and professional installations.

Residential air conditioners prioritise residential comfort with various price options and compatible energy-saving features. The models with air filtration and no noise enhance indoor air quality, offering a blend of comfort, affordability, ease of use, and health benefits as it purify the air and is energy efficient and can also work on inverters.

Daikin unveiled a collection of five fresh residential split system air conditioners in Japan, offering ventilation and humidification features-a novelty for the nation. Kicking off with the debut of Urusara X and Urusara mini in November 2021, these models boasted the capacity to intake external air. The operation could be managed using either the remote controller or the Daikin Smart app. Additionally, a ventilation sensor was integrated to regulate air volume according to room occupancy, and ventilation could be triggered automatically through a Daikin CO2 concentration sensor.
