Report description:

The Japan ATM market was valued at USD 945.60 Million in 2024. The industry is expected to grow at a CAGR of 4.00% during the forecast period of 2025-2034 to attain a valuation of USD 1399.72 Million by 2034.

Japan ATM Market Growth

In March 2024, Japan attracted 3,081,600 international visitors, which was an 11.7% growth from 2019. Since many foreign travellers' smartphones are not enabled with digital payments, the government permits the usage of overseas-issued cards for making cash withdrawals at the existing network of ATMs. Many private sector companies are focusing on integrating multiple-language software into ATMs to prevent misunderstanding and fraud from international tourists. This includes languages like Chinese, French, and German, among others. This is one of the key market trends.

Mobile ATMs have revolutionised socio-economic development in Japan and boosted the resilience of financial infrastructure from natural disasters. They enhance access to various banking services, like cash deposits, withdrawals, and passbook updates in schools, household societies, and nursing homes, among other places. They are designed into a van and are powered by a long-lasting battery or an in-built generator, ensuring the optimum functioning of the ATM. The soaring popularity of mobile ATMs is expected to drive the market growth in the forecast period.

Facial recognition technology is gaining prominence in Japan for enhancing the safety and convenience of performing banking transactions within ATMs. This is because they eliminate the need for using bankbooks or cash cards for making transactions, which minimises the risk of fraud and theft while boosting accessibility to cash.
