Report description:

The North America licorice extract market reached approximately USD 75.40 Million in 2024. The market is projected to grow at a CAGR of 8.00% between 2025 and 2034, reaching a value of around USD 162.78 Million by 2034.

North America Licorice Extract Market Outlook

The burgeoning popularity of natural sweeteners such as licorice extract as a healthy alternative to sugar, the rising usage of licorice extract in the treatment of skin disorders and stomach ulcers, and its growing applications in the cosmetics sector due to its anti-inflammatory properties are some of the major factors fuelling the growth of the North America licorice extract market. With the rising trend of clean labels in the North American region, customers are readily looking for products that are organic and do not contain any artificial additives, which has promoted the demand for licorice extract since it is a natural product.

The North America licorice extract market is segmented by form, application, and country, each showing distinct growth rates and rankings.

The Rising Usage of Powder Form in Food and Beverage Sector is Fuelling the North America Licorice Extract Market Growth

In the form-wise segment, powder leads with a CAGR of 9.0%. The strong growth of powder-form products is driven by their versatility, ease of storage, and longer shelf life compared to other forms. Powders are widely used in various industries, including food and beverages, pharmaceuticals, and personal care, due to their convenient handling and mixing properties. The ability to precisely measure and incorporate powders into formulations enhances their appeal.

Liquid form products are growing at a CAGR of 8.4 due to their rising applications in pharmaceuticals and personal care products, which contributes to the North America licorice extract demand. Additionally, the block form, growing at 7.6%, remains relevant in specific niches, such as certain food products and industrial applications where the solid form is preferred for handling and processing efficiency.
