Report description:

The United States Crypto ATM market was valued at USD 50.93 Million in 2024. The industry is expected to grow at a CAGR of 47.50% during the forecast period of 2025-2034 to attain a valuation of USD 2482.53 Million by 2034.

United States Crypto ATM Market Growth

The increasing acceptance of cryptocurrencies in the USA, driven by the desire for multiplying wealth in the long term, is aiding the market. The proliferation of cryptocurrency exchanges and the growth of the digital economy is attracting millennials towards investing in cryptocurrencies for short-term growth. Every 1/5 of Americans aged 18-34 desire to own cryptocurrencies upon retirement. This is expected to increase the demand for cryptocurrencies and drive the market growth in the forecast period.

Crypto ATMs are commonly found across multiple gas stations and malls in the USA. These ATMs can provide cash to a person without a bank account, which enhances the ease of accessibility to money. Some crypto ATMs have bi-directional functionality, which allows the sale of cryptocurrencies seamlessly and securely, without exchanging any personal information. This is expected to drive their popularity among customers in the forecast period.

Between 2020-2024, the number of BTMs (Bitcoin Teller Machines) recorded a five-fold increase in the USA, reaching 31,100 units. New York is expected to witness a significant surge in the installation of BTMs, as regions with high population density provide a lucrative market expansion opportunity for major companies. The average transaction fees levied on the purchase and sale of bitcoins in the USA are 5% and 8% respectively.
