

Japan Contrast Enhanced Ultrasound Market Assessment, By Product [Equipment, Contrast Agents, Software and Services], By Application [Diagnostic Applications, Therapeutic Applications], By End-user [Hospitals and Surgical Centers, Diagnostic Imaging Centers, Ambulatory Surgery Center, Others], By Region, Opportunities and Forecast, FY2019-FY2033F

Market Report | 2025-06-16 | 124 pages | Market Xcel - Markets and Data

AVAILABLE LICENSES:

- Single User License \$3500.00
- Multi-User/Corporate Licence \$4700.00
- Custom Research License \$7200.00

Report description:

Japan contrast enhanced ultrasound market is projected to witness a CAGR of 6.61% during the forecast period FY2026-FY2033, growing from USD 90.44 million in FY2025 to USD 150.86 million in FY2033. Growing prevalence of liver and cardiovascular diseases in Japan is driving demand for Contrast Enhanced Ultrasound (CEUS) as a safer, non-invasive diagnostic tool. Rising awareness among clinicians and patients, combined with advancements in ultrasound technology, is boosting its adoption across hospitals and imaging centers. Additionally, government support for radiation-free imaging aligns with CEUS benefits, further encouraging its integration into routine diagnostics.

Rising Prevalence of Chronic Diseases and Geriatric Population

Japan is experiencing an increase in its aging population alongside a rising incidence of chronic illnesses, including liver, kidney, and cardiovascular diseases. Contrast-Enhanced Ultrasound (CEUS) has emerged as a favored diagnostic method in these fields due to its non-invasive nature, lack of ionizing radiation, and excellent safety profile, which is particularly advantageous for elderly and high-risk patients. It offers real-time vascular imaging, enabling healthcare providers to identify lesions and tumors with greater precision. The growing need for regular diagnostic assessments in chronic diseases further drives the adoption of CEUS. Moreover, Japan's healthcare system emphasizes early disease detection to minimize long-term care expenses, prompting hospitals to incorporate CEUS into their diagnostic offerings. For instance, according to Japan's Ministry of Internal Affairs and Communications, as of 2023, seniors (65+) made up 29.1% of the total population, highlighting the pressing need for chronic disease management solutions.

Technological Advancements and Integration with AI Fueling Growth

In Japan, Contrast-Enhanced Ultrasound (CEUS) is undergoing swift advancements, particularly through the incorporation of artificial intelligence (AI) and advanced imaging software. These innovations improve image quality, lessen reliance on operators, and facilitate real-time analysis, thereby increasing the efficiency and applicability of CEUS. Japanese companies are channeling investments into CEUS systems that feature AI-based lesion detection, automated quantification, and motion correction capabilities. The enhanced precision and diagnostic reliability provided by these systems are promoting their acceptance in hospitals and diagnostic facilities. Moreover, AI enhances the reproducibility of CEUS results-an important factor for widespread clinical implementation. These innovations align with Japan's broader focus on smart healthcare technologies to address labor shortages and improve patient outcomes. For example, Canon U.S.A., Inc., a leading global supplier of imaging solutions, has launched Aplio beyond, a versatile ultrasound system that combines clinical excellence, operational efficiency, and ergonomic design in a compact, quiet, and eco-friendly package. Tailored for ultrasound specialists working in hospitals, busy imaging centers, and advanced practices that manage substantial workloads and varied patient populations, it provides outstanding imaging capabilities for routine assessments, specialized investigations, and complex procedures.

Increasing Use of CEUS in Oncology and Liver Imaging

CEUS is gaining significant traction in oncology diagnostics, especially for liver cancer, which has high incidence rates in Japan. It offers superior lesion characterization, early tumor detection, and post-treatment follow-up capabilities, often outperforming CT or MRI in certain contexts. Given its ability to visualize micro-vascularization without nephrotoxic contrast agents, CEUS is now commonly used for patients with renal impairments-common among cancer patients. Hospitals are increasingly adopting CEUS for liver, breast, and prostate cancer screening, due to its repeatability and low risk. Moreover, CEUS-guided biopsies and ablations have improved precision and outcomes in cancer treatment. For example, in late 2023, researchers at Kyoto University published clinical outcomes showing that CEUS significantly improved the detection rate of hepatocellular carcinoma (HCC) in high-risk Japanese patients compared to conventional ultrasound.

Future Market Scenario (FY2026 - FY2033F)

The Japan Contrast Enhanced Ultrasound (CEUS) market is poised for strong growth due to increasing applications in liver disease diagnosis, oncology, and cardiovascular imaging. As Japan faces a high burden of chronic liver conditions and an aging population, demand for non-invasive, radiation-free diagnostic tools is surging. CEUS offers real-time, high-resolution imaging with minimal side effects, making it ideal for repeated use, especially among elderly and vulnerable patients. Technological advancements, rising healthcare expenditure, and a growing preference for point-of-care imaging are expected to further propel adoption. Additionally, collaborations between Japanese medical institutions and global imaging companies are accelerating CEUS-related clinical trials and technology integration, positioning the market for long-term growth in diagnostic and therapeutic applications

Key Players Landscape and Outlook

Key players in the contrast enhanced ultrasound industry utilize strategies such as mergers, acquisitions, partnerships, and new product launches to improve their services and competitiveness. Such efforts will propel significant growth in the market, allowing big-cap industry players to increase their presence and, therefore, find new opportunities in this market. For instance, Canon U.S.A., Inc. partnered with Olympus to introduce their newest ultrasound device, the Aplio i800 EUS. This hybrid system is especially proficient in identifying small lesions in the pancreas, as stated by Akihiro Sano, the general manager of ultrasound systems at Canon during a press briefing in January 2024.

Table of Contents:

- 1.□Project Scope and Definitions
- 2.□Research Methodology
- 3.□Impact of U.S. Tariffs
- 4.□Executive Summary
- 5.□Japan Contrast Enhanced Ultrasound Market Outlook, FY2019-FY2033F
- 5.1.□Market Size Analysis & Forecast
- 5.1.1.□By Value

- 5.1.2.□By Volume
- 5.2.□Market Share Analysis & Forecast
 - 5.2.1.□By Product
 - 5.2.1.1.□Equipment
 - 5.2.1.2.□Contrast Agents
 - 5.2.1.2.1.□Molecule-Targeted Microbubbles
 - 5.2.1.2.2.□Nanoparticle Microbubbles
 - 5.2.1.3.□Software and Services
 - 5.2.2.□By Application
 - 5.2.2.1.□Diagnostic Applications
 - 5.2.2.1.1.□Nephrology
 - 5.2.2.1.2.□Cardiology
 - 5.2.2.1.3.□Others
 - 5.2.2.2.□Therapeutic Applications
 - 5.2.2.2.1.□Cardiology
 - 5.2.2.2.2.□Oncology
 - 5.2.2.2.3.□Vascular
 - 5.2.2.2.4.□Others
 - 5.2.3.□By End-user
 - 5.2.3.1.□Hospitals And Surgical Centers
 - 5.2.3.2.□Diagnostic Imaging Centers
 - 5.2.3.3.□Ambulatory Surgery Center
 - 5.2.3.4.□Others
 - 5.2.4.□By Region
 - 5.2.4.1.□North [Hokkaido and Tohoku]
 - 5.2.4.2.□Central [Kanto and Chubu]
 - 5.2.4.3.□South [Kansai, Chugoku, Shikoku, and Kyushu & Okinawa]
- 5.2.5.□By Company Market Share Analysis (Top 5 Companies and Others - By Value, FY2025)
- 5.3.□Market Map Analysis, FY2025
 - 5.3.1.□By Product Type
 - 5.3.2.□By Application
 - 5.3.3.□By End-user
 - 5.3.4.□By Region
- 6.□Value Chain Analysis
- 7.□Demand Supply Analysis
- 8.□Import and Export Analysis
- 9.□Porter's Five Forces Analysis
- 10.□PESTLE Analysis
- 11.□Pricing Analysis
- 12.□Market Dynamics
 - 12.1.□Market Drivers
 - 12.2.□Market Challenges
- 13.□Market Trends and Developments
- 14.□Regulatory Framework and Innovation
- 15.□Competitive Landscape
 - 15.1.□Competition Matrix of Top 5 Market Leaders
 - 15.2.□SWOT Analysis for Top 5 Players
