

Airport Baggage Handling System Market Opportunity, Growth Drivers, Industry Trend Analysis, and Forecast 2025 - 2034

Market Report | 2025-05-09 | 180 pages | Global Market Insights

AVAILABLE LICENSES:

- Single User \$4850.00
- Multi User \$6050.00
- Enterprise User \$8350.00

Report description:

The Global Airport Baggage Handling System Market was valued at USD 9.2 billion in 2024 and is estimated to grow at a CAGR of 8.4% to reach USD 20.5 billion by 2034 driven by the rising air travel demand, along with the expansion of global air cargo and e-commerce logistics, is fueling market momentum. With more people flying and shipping across borders, airports are under increasing pressure to streamline operations and enhance baggage flow. System upgrades and automation have become essential to reduce processing delays and improve traveler experience.

Regulatory changes such as increased tariffs on imported components have disrupted supply chains and raised production costs. Manufacturers are exploring local sourcing strategies and regional production to mitigate these financial burdens. In addition, outdated infrastructure often fails to cope with passenger spikes during peak times, leading to delays and baggage losses. This shortfall pushes airports toward smarter, high-efficiency baggage handling systems that minimize errors and increase throughput. Companies now focus on building systems capable of operating smoothly during peak periods without compromising accuracy or performance.

Among the system types, the conveying systems segment in the baggage handling market generated USD 3.5 billion in 2024, attributed to the rising demand for upgraded systems that are smarter, faster, and more reliable than their aging counterparts. As airports increasingly prioritize seamless operations, these modern conveyor setups offer substantial benefits-streamlining transfer times, minimizing delays, and significantly reducing instances of lost or mishandled luggage. With heightened pressure on airport operators to boost efficiency while cutting long-term maintenance costs, adopting advanced, energy-efficient conveying systems continues to accelerate, reinforcing their leadership position within the market.

By service type, the assisted service segment generated USD 5.5 billion in 2024, fueled by a growing emphasis on personalized travel experiences, prompting airports to cater to travelers who require or prefer human interaction, such as elderly passengers, premium travelers, or those handling oversized or sensitive luggage. While automation is becoming standard in baggage operations, hybrid models that combine digital tools with human support are gaining popularity. These blended service approaches not only enhance customer satisfaction but also help manage unexpected challenges more effectively, offering a balance between efficiency and empathy.

United States Baggage Handling System Market generated USD 2.9 billion in 2024. This commanding presence stems from expansive airport renovation projects that upgrade outdated infrastructure to meet growing air traffic demands. As domestic and international travel rebounds, U.S. airports are investing heavily in state-of-the-art baggage handling systems that can process larger volumes of luggage. These modernization efforts are essential for minimizing transit times, supporting smoother connections, and elevating the overall passenger journey.

Key players such as Siemens AG, Beumer Group, Fives, ULMA Handling Systems, Daifuku Co., Ltd., Alstef Group, and Vanderlande Industries are strengthening their market foothold by focusing on automation, AI integration, and modular system development. Strategic collaborations with airports and logistics firms allow them to customize solutions for growing passenger demands. Investments in smart sensors, digital twins, and predictive maintenance help boost operational reliability. Several firms are expanding their regional manufacturing bases to overcome import cost hikes and meet localized demand.

□

Table of Contents:

Report Content

Chapter 1 Methodology and Scope

- 1.1 Market scope and definitions
- 1.2 Research design
 - 1.2.1 Research approach
 - 1.2.2 Data collection methods
- 1.3 Base estimates and calculations
 - 1.3.1 Base year calculation
 - 1.3.2 Key trends for market estimation
- 1.4 Forecast model
- 1.5 Primary research and validation
 - 1.5.1 Primary sources
 - 1.5.2 Data mining sources

Chapter 2 Executive Summary

- 2.1 Industry 360 synopsis

Chapter 3 Industry Insights

- 3.1 Industry ecosystem analysis
- 3.2 Trump administration tariffs
 - 3.2.1 Impact on trade
 - 3.2.1.1 Trade volume disruptions
 - 3.2.1.2 Retaliatory measures
 - 3.2.2 Impact on the industry
 - 3.2.2.1 Supply-side impact
 - 3.2.2.1.1 Price volatility in key components
 - 3.2.2.1.2 Supply chain restructuring
 - 3.2.2.1.3 Production cost implications
 - 3.2.2.2 Demand-side impact (selling price)
 - 3.2.2.2.1 Price transmission to end markets
 - 3.2.2.2.2 Market share dynamics
 - 3.2.2.2.3 Consumer response patterns

- 3.2.3 Key companies impacted
- 3.2.4 Strategic industry responses
 - 3.2.4.1 Supply chain reconfiguration
 - 3.2.4.2 Pricing and product strategies
 - 3.2.4.3 Policy engagement
- 3.2.5 Outlook and future considerations
- 3.3 Industry impact forces
 - 3.3.1 Growth drivers
 - 3.3.1.1 Increase in global air passenger traffic
 - 3.3.1.2 Growth of low-cost carriers (LCCs)
 - 3.3.1.3 Expansion and modernization of airports
 - 3.3.1.4 Growth of air cargo and e-commerce logistics
 - 3.3.1.5 Digitalization and real-time baggage tracking
 - 3.3.2 Industry pitfalls and challenges
 - 3.3.2.1 High capital investment and operational costs
 - 3.3.2.2 Risk of system failures and downtime
- 3.4 Growth potential analysis
- 3.5 Regulatory landscape
- 3.6 Technology landscape
- 3.7 Future market trends
- 3.8 Gap analysis
- 3.9 Porter's analysis
- 3.10 PESTEL analysis

Chapter 4 Competitive Landscape, 2024

- 4.1 Introduction
- 4.2 Company market share analysis
- 4.3 Competitive analysis of major market players
- 4.4 Competitive positioning matrix
- 4.5 Strategy dashboard

Chapter 5 Market Estimates and Forecast, By System type, 2021 - 2034 (USD Million & Million Units)

- 5.1 Key trends
- 5.2 Conveying systems
- 5.3 Sorting and storage systems
- 5.4 Tracking & tracing systems
- 5.5 Destination coded vehicles
- 5.6 Self-bag drop (SBD)
- 5.7 Others

Chapter 6 Market Estimates and Forecast, By Service, 2021 - 2034 (USD Million & Million Units)

- 6.1 Key trends
- 6.2 Self-service
- 6.3 Assisted service

Chapter 7 Market Estimates and Forecast, By Technology, 2021 - 2034 (USD Million & Million Units)

- 7.1 Key trends

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

7.2 Barcode-based systems

7.3 RFID-based systems

7.4 Others

Chapter 8 Market Estimates and Forecast, By End Use, 2021 - 2034 (USD Million & Million Units)

8.1 Key trends

8.2 International airports

8.3 Domestic airports

8.4 Military & government airports

Chapter 9 Market Estimates and Forecast, By Region, 2021 - 2034 (USD Million & Million Units)

9.1 Key trends

9.2 North America

9.2.1 U.S.

9.2.2 Canada

9.3 Europe

9.3.1 Germany

9.3.2 UK

9.3.3 France

9.3.4 Spain

9.3.5 Italy

9.3.6 Netherlands

9.4 Asia Pacific

9.4.1 China

9.4.2 India

9.4.3 Japan

9.4.4 Australia

9.4.5 South Korea

9.5 Latin America

9.5.1 Brazil

9.5.2 Mexico

9.5.3 Argentina

9.6 Middle East and Africa

9.6.1 Saudi Arabia

9.6.2 South Africa

9.6.3 UAE

Chapter 10 Company Profiles

10.1 Alstef Group

10.2 Ansir Systems

10.3 Beumer Group

10.4 Cassioli Srl

10.5 Daifuku Co., Ltd.

10.6 Datalogic S.p.A.

10.7 Fives

10.8 G&S Airport Conveyor

10.9 KieTek International, Inc.

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

10.10 Leonardo S.p.A
10.11 Matrex
10.12 Pteris Global Limited
10.13 Robson Handling Technology
10.14 Siemens AG
10.15 ULMA Handling Systems
10.16 Vanderlande Industries
