Key Highlights

State Grid Corporation of China (SGCC), was incorporated on December 29, 2002, and is headquartered in Xicheng District, Beijing. It is a state-owned enterprise and the largest utility company in the world by revenue and number of customers. The company plays a central role in China's power transmission and distribution infrastructure, supplying electricity to over 1.1 billion people. Its domestic operations span 26 provinces, autonomous regions, and municipalities, covering approximately 88 percent of China's territory.

SGCC's core business segments include the construction, operation, and maintenance of electric power grids. The company is a global leader in ultra-high voltage transmission technology, which enables long-distance power delivery with minimal energy loss. It is instrumental in integrating renewable energy sources like wind and solar into China's national grid.

Beyond China, SGCC has expanded its footprint internationally. It holds energy transmission and distribution assets in countries such as Brazil, the Philippines, Australia, Portugal, and Italy. These investments support the international growth of the company and contribute to the development of global energy networks. With over 1.7 million employees and substantial registered capital, SGCC continues to be a strategic player in the global transition to low-carbon and sustainable energy systems.
