Key Highlights

- Construction market includes both residential and non-residential construction. Market value refers to the total output value of construction activity in a specific year. Construction output value is defined as the total value of construction activity in any given period, including costs related to all materials, equipment, and services used.
- The Austrian construction industry recorded revenues of \$80.0 billion in 2024, representing a compound annual growth rate (CAGR) of 3.4% between 2019 and 2024.
- The non-residential segment accounted for the industry's largest proportion in 2024, with total revenues of \$46.5 billion, equivalent to 58.1% of the industry's overall value.
- In 2024, the Austrian construction industry recorded an annual growth of 1.2%, primarily due to the increase in final household consumption expenditure on housing per household, reflecting changing living standards and preferences. In 2024, Austrian households continued to prioritize spending on modern housing, energy-efficient upgrades, and home improvements, driven by both rising incomes and favorable mortgage conditions. According to Eurostat, in 2024, the final household consumption expenditure on housing per household in Austria reached \$20,240.9, up 3.2% annually.
