- Enterprise Electronic (PDF) \$9090.00

Report description:

Global Product Life Cycle Management (PLM) Software Market Trends and Outlook

The global Product Lifecycle Management (PLM) software market is undergoing a significant transformation, projected to more than double from US\$28 billion in 2024 to over US\$43.5 billion by 2030 at a CAGR of 7.7%, reflecting accelerating digitalization across design, engineering, and manufacturing workflows. This expansion is underpinned by the urgent need for agile, data-driven processes in industries such as automotive, aerospace, and industrial equipment, where complexity and compliance burdens are intensifying. North America continues to lead in adoption due to its mature industrial base and regulatory rigor, while Asia Pacific is emerging as the fastest-growing market, driven by ambitious modernization programs across China, India, and Japan.

Cloud-native platforms and software-as-a-service (SaaS) delivery models are reshaping how PLM is consumed, offering faster deployment, lower upfront costs, and elastic scalability. Leading providers such as Siemens Digital Industries Software, PTC, Dassault Systèmes, and Autodesk are doubling down on AI-driven capabilities, enabling predictive design, smarter simulation, and real-time collaboration. This has not only reduced product development timelines but also made enterprise-grade PLM accessible to mid-market firms, widening the addressable market.

Product Life Cycle Management (PLM) Software Regional Market Analysis

Between 2024 and 2030, the global Product Lifecycle Management (PLM) software market is projected to expand from US\$28 billion to approximately US\$43.5 billion, growing at a CAGR of 7.7%. North America held the largest regional share in 2024, accounting for 36.3% of global market value. Its dominance stems from sustained investments in digital twin technologies, early cloud adoption, and stringent regulatory compliance in sectors like aerospace, automotive, and defense. However, Asia-Pacific is poised to outpace all other regions with the fastest CAGR of 10% over the same period. By 2030, the region's market size is expected to reach nearly US\$13 billion, driven by government-led manufacturing upgrades in China, Japan, and India, alongside rising demand for SaaS-based PLM solutions among mid-tier manufacturers. South America also shows strong momentum,

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

reflecting broader regional digitization efforts and cloud-native PLM adoption in Brazil and Argentina.

Product Life Cycle Management (PLM) Software Market Analysis by Deployment Type

Cloud-based deployments will continue to dominate and accelerate, growing at a CAGR of 8.5%, the fastest among all segments. In 2024, the cloud segment accounted for nearly 71% of the total market, a lead driven by the rising demand for agile, scalable, and cost-effective PLM platforms across all company sizes. On-premise solutions, while still relevant, particularly in industries with strict data residency or security needs, are expected to grow more modestly. The slower growth reflects a broader industry shift toward cloud-native architectures and SaaS platforms, which offer lower upfront costs, faster deployment, and better interoperability. As PLM increasingly converges with IoT, digital twins, and simulation technologies, cloud models will remain the cornerstone of future-ready deployments.

Product Life Cycle Management (PLM) Software Market Analysis by Company Type

Large enterprises will remain the dominant customer base, contributing US\$18.5 billion in 2024, roughly 66.5% of total spend, driven by continued investment in digital twin integration, regulatory compliance, and enterprise-wide product innovation platforms. However, small and medium-sized enterprises (SMEs) are projected to be the fastest-growing segment, expanding at a CAGR of 9%. This acceleration is fueled by the growing availability of modular, cloud-based PLM tools tailored to mid-market needs, offering subscription pricing, faster deployments, and simplified configurations that reduce IT burden. As PLM vendors increasingly shift toward SaaS delivery and vertical-specific solutions, adoption among SMEs is likely to accelerate further.

Product Life Cycle Management (PLM) Software Market Analysis by Software Type

Collaborative Product Definition Management (cPDm) remains the largest segment, accounting for 36.1% of total market value. Its strength stems from its foundational role in data governance, configuration management, and cross-functional collaboration in complex engineering environments. However, the fastest growth is anticipated in the "Other PLM-related Tools" category, which includes emerging solutions for sustainability analytics, PLM-integrated compliance, and connected supply chain management. This segment is projected to grow at a CAGR of 11.4%, driven by evolving ESG mandates and the demand for end-to-end traceability. Simulation & Analysis tools are the second-fastest growing segment. The rise is fueled by increased adoption of digital twins, real-time physics modeling, and AI-driven design validation, especially in automotive and aerospace industries. Meanwhile, Mechanical CAD, though still significant, is forecast to grow more modestly at just 4.5%, as the segment matures and faces commoditization pressures from integrated and low-code platforms.

Product Life Cycle Management (PLM) Software Market Analysis by Industry Sector

The automotive & transportation sector remains the largest market with a share of 34% of total PLM spend in 2024. Its continued leadership is underpinned by deep investments in digital twins, regulatory traceability, and electrification-led innovation cycles that require tightly integrated engineering workflows. However, the electronics & semiconductors segment is expected to be the fastest-growing vertical, registering a CAGR of 11%. This rapid rise is fueled by the increasing product complexity, shorter design cycles, and the need to integrate PLM with embedded software, simulation, and chip manufacturing processes. Consumer goods and apparel is the second-fastest-growing sector, being driven by sustainability pressures, design personalization, and faster time-to-market for fashion and lifestyle brands, factors that are pushing companies toward SaaS-based PLM tools with strong support for material traceability and supplier collaboration.

Product Life Cycle Management (PLM) Software Market Report Scope

This global report on Product Life Cycle Management (PLM) Software market analyzes the global and regional market based on Deployment Type, Company Type, Software Type, and Industry Sector for the period 2021-2030 with projection from 2024 to 2030

Scotts International. EU Vat number: PL 6772247784

in terms of value in US\$. In addition to providing profiles of major companies operating in this space, the latest corporate and industrial developments have been covered to offer a clear panorama of how and where the market is progressing.

Key Metrics

Historical Period: 2021-2024

Base Year: 2024

Forecast Period: 2024-2030

Units: Value market in US\$

Companies Mentioned: 15+

Product Life Cycle Management (PLM) Software Market by Geographic Region

- [] North America (The United States, Canada and Mexico)

- [] Europe (Germany, the United Kingdom, France, Italy, the Netherlands, Spain, Russia, Switzerland and Rest of Europe)

- [] Asia-Pacific (China, Japan, India, Australia, Singapore, South Korea and Rest of Asia-Pacific)

- [] South America (Brazil, Argentina, Colombia, Chile, Peru and Rest of South America)

- [] Middle East & Africa (the United Arab Emirates, South Africa, Egypt, Saudi Arabia, Morocco, Kuwait, Qatar and Rest of Middle East & Africa)

Product Life Cycle Management (PLM) Software Market by Deployment Type

- [] Cloud

- [] On-Premise

Product Life Cycle Management (PLM) Software Market by Company Type

- [] Large Enterprises

- [] Small & Medium-sized Enterprises (SMEs)

Product Life Cycle Management (PLM) Software Market by Software Type

- [] Collaborative Product Definition Management (cPDm)

- [] Mechanical CAD

- [] Simulation & Analysis

- [] Digital Manufacturing

- [] Other PLM-related Tools

Product Life Cycle Management (PLM) Software Market by Industry Sector

- [] Automotive & Transportation

- [] Aerospace & Defense

- [] Industrial Equipment & Machinery

- [] Electronics & Semiconductors

- [] Consumer Goods / Apparel

- [] Pharmaceuticals & Healthcare

Table of Contents:

PART A: GLOBAL MARKET PERSPECTIVE

1. EXECUTIVE SUMMARY
