### **Report description:**

The global animal protein market is expected to grow at a CAGR of 4.10% between 2025 and 2034. Key market drivers include rise in demand for protein rich dietary supplements and growing demand from personal care industry.

#### Key Trends in the Market

Proteins that are sourced from animal products are defined as animal proteins, and are commonly found in meats such as seafood and poultry, as well as in items such as dairy and eggs. Animal proteins have the presence of all the important nine amino acids required by our body, making it an important component of a healthy diet. Animal proteins are known for lowering the risk of colorectal and heart diseases along with the risk of prostate, stomach, and pancreatic cancers.

- Its increased use in industries such as cosmetics, food and beverages, and nutraceutical as an emulsifier or foaming agent has fuelled the demand of animal proteins, helping in the growth of the overall market.
- Variations in animal protein sources such as gelatin, egg, dairy, and fish proteins have also contributed to the growth of the animal protein market as consumers are able to consume animal proteins according to their taste and preference.
- Awareness regarding the benefits of animal proteins in comparison to normal or other sources of proteins is spreading among consumers, which is likely to increase the demand and help in the market growth.
- The growing trend of veganism and vegetarianism are posing challenges to the animal protein market, as in both types of lifestyles, consumption of meat is discouraged, whereas vegans discourage all animal-sourced products.

## Market Breakup by Product Type

- Dairy Protein
- Egg Protein
- Fish Protein
- Meat Protein
- Others

## Market Breakup by Form

- Solid
- Liquid

## Market Breakup by Application

- Food and Beverage
- Cosmetics and Personal Care
- Feed
- Pharmaceuticals
- Others

## Market Breakup by Region

- North America
- Europe
- Asia Pacific
- Latin America
- Middle East and Africa

## Market Share by Form

Both solid and liquid forms of proteins are widely consumed, however, liquid protein accounts for a larger share in the animal protein market. Liquid proteins are easy to consume anywhere and anytime, without need for specialised preparation or cooking. They are consumed in the form of shakes, shots, and gels.

Liquid proteins often contain less calories as compared to the solid animal protein form such as protein bars, making them suited for before or after workouts. Along with easy consumption they are also easily digestible. The growing popularity of protein shakes and social media promotion of various protein drinks is further encouraging the growth of the liquid segment of the market for animal proteins.

## Market Share by Region

North America is expected to account for a leading segment in the animal protein market because of its established food supply chain. There is a strong presence of key market players in the region, with advanced technologies for processing and producing animal-based protein supplements and ingredients.
