### **Report description:**

The global coil coatings market size attained a value of USD 7.05 Billion in 2024. The market is further expected to grow at a CAGR of 6.40% between 2025 and 2034, to reach a value of USD 13.11 Billion by 2034.

### Key Trends in the Market

Coil coating is refers to the coating of metal coils with a material to produce a coated finish before fabrication for further end uses. With this process, metal coils of different sizes can attain a uniform, high-quality, and coated finish. This method is used in various coating applications to provide smooth finish to diverse types of surfaces.

- Building and construction end users of coil coatings are driving the demand for the market due to the heightened application of coil coatings in developing interior and exterior wall panels, and ceilings, among others.

- Increasing application of coil coatings in home appliances is further expanding the market for coil coatings, further supported by the increasing sale of household appliances which is also bolstering the growth of technical coil coatings market.

- In Europe, the increasing sale of passenger and commercial automobiles is expected to garner the European coil coatings market in the forecast period. Moreover, with a significant number of companies active in market for coil coatings in Europe, the supply chain is anticipated to witness garnered health.

### Global Coil Coatings Market Segmentation

The EMR's report titled "Global Coil Coatings Market Report and Forecast 2025-2034" offers a detailed analysis of the market based on the following segments:

- Middle East and Africa

#### Global Coil Coatings Market Share by Resin Type

The polyester segment, based on resin type, accounts for a healthy share of the global coil coating market as polyester coil coatings are tough, hard, flexible, resistant to stain, and come in variety of colours and glosses. The increasing applications of the polyester resin type of coil coatings in interior and exterior spaces of houses is fuelling the segment's growth. In addition, next-generation polyester coatings are ideal for garage and entry door applications which are integral components of residential complexes.

#### Global Coil Coatings Market Share by Application

Based on application, aluminium accounts for a significant share in the market for coil coatings as aluminium is widely available, improving supply chain management. Aluminium coil coatings provide high-quality surface finish uniform thickness throughout the coating and excellent durability in extreme weather conditions. In addition, aluminium can be painted in variety of colours which boosts the aesthetic appeal of a structure.

#### Competitive Landscape

The comprehensive EMR report provides an in-depth assessment of the market based on the Porter's five forces model along with giving a SWOT analysis. The report gives a detailed analysis of the key players in the global coil coatings market, covering their
