Growing Use of Acetic Anhydride in the Pharmaceutical Sector to Aid the North America Market Growth

The North America acetic anhydride market growth can be attributed to the growing use of the chemical as a significant raw material in the manufacturing of various pharmaceutical products such as acetaminophen and aspirin, among others. With the rising prevalence of various health-related issues, the increasing demand for pharmaceutical products is favouring the market growth of acetic anhydride in North America. The robust healthcare infrastructure and the rapid growth of the pharmaceutical sector are providing further impetus to the market for acetic anhydride in North America.

The growing use of acetic anhydride in tetraacetythylenediamine (TAED) in detergents to improve their bleaching efficiency is propelling the market growth. As TAED exhibits excellent granulation properties, enhanced storage stability, and good biocidal activity, it is increasingly utilised in innovative detergents, which is anticipated to fuel the market for acetic anhydride in North America. With the growing focus on hygiene, especially after the COVID-19 pandemic, the demand for detergents is surging, which is likely to augment the regional acetic anhydride market in the forecast period.
