

**Wound Care Market by Product (Dressings (Foam, Hydrocolloid, Collagen), Devices (NPWT, Debridement), Biological Skin Substitutes, Sutures, Staplers), Wounds (Chronic, Acute)), End User (Hospitals, Clinics, Home Care), and Region -Global Forecast to 2030**

Market Report | 2025-08-11 | 457 pages | MarketsandMarkets

**AVAILABLE LICENSES:**

- Single User \$8150.00
- Multi User \$9550.00
- Corporate License \$12150.00
- Enterprise Site License \$14150.00

**Report description:**

The global wound care market is projected to reach USD 30.48 billion by 2030 from USD 22.22 billion in 2025, at a CAGR of 6.5% during the forecast period.

<https://www.marketsandmarkets.com/Images/wound-care-market-Overview.webp>

This is due to the increasing rise of diabetic patients, rising cases of traumatic injuries and burn injuries, and the growing geriatric population, which drives market growth. Additionally, the risk of advanced wound care products restraining the market growth. The hospitals and clinics segment of the wound care market, by end user, is expected to hold the largest position during the forecast period.

Based on end user, the market is segmented into hospitals and clinics, home care settings, long-term care facilities, and other end users. In 2024, hospitals and clinics account for the largest share of the market. This dominance is driven by the rising prevalence of diabetic foot ulcers and surgical wounds, which require professional medical attention. Additionally, the aging population with chronic conditions such as diabetes and vascular disorders has led to an increase in hospital visits for wound care. Hospitals and specialized care centers are well equipped with experienced medical personnel, standardized treatment protocols, and a comprehensive range of wound care products, enabling efficient and effective treatment. The continued emphasis on enhancing wound care outcomes and patient recovery further reinforces the leading position of this segment.

Asia Pacific is the fastest-growing region of the wound care market.

The global wound care market is segmented into five segments, namely, North America, Europe, Asia Pacific, Latin America, and the Middle East & Africa. The Asia Pacific wound care market is expanding due to a growing aging population and a rise in lifestyle-related diseases that contribute to chronic wounds. Increased demand for quality healthcare and greater investments in hospital infrastructure and medical technologies are boosting the adoption of advanced wound care products. Moreover, the surge in medical tourism across countries like India, Thailand, and Singapore is driving surgical volumes, further increasing the need for post-operative wound care. As healthcare providers in the region focus on improving treatment outcomes and reducing recovery times, the market is poised for robust growth, with Asia Pacific projected to witness the highest CAGR during the forecast period.

A breakdown of the primary participants referred to for this report is provided below:

-□By Company Type: Tier 1: 40%, Tier 2: 30%, and Tier 3: 30%

-□By Designation: C Level: 27%, Director Level: 18%, and Others: 55%

-□By Region: North America: 51%, Europe: 21%, Asia Pacific: 18%, Latin America: 6%, and Middle East & Africa: 4%

Note 1: Companies are classified into tiers based on their total revenue. As of 2023, Tier 1 = >USD 10.00 billion, Tier 2 = USD 1.00 billion to USD 10.00 billion, and Tier 3 = <USD 1.00 billion.

Note 2: C-level primaries include CEOs, CFOs, COOs, and VPs.

Note 3: Other designations include sales managers, marketing managers, business development managers, product managers, distributors, and suppliers.

The major players operating in the wound care market are Solventum (US), Johnson & Johnson Services, Inc. (US), Smith+ Nephew (UK), Convatec Group PLC (UK), Coloplast Group (Denmark), Cardinal Health (US), Molnlycke AB (Sweden), Integra LifeSciences Corporation (US), PAUL HARTMANN AG (Germany), B.Braun SE (Germany), Organogenesis Inc. (US), MIMEDX Group, Inc. (US), Essity Aktiebolag (Sweden), Avery Dennison Corporation (US), Mativ Holdings, Inc. (US), Owens & Minor (US), Zimmer Biomet (US), Bioventus (US), Medtronic (Ireland), and Baxter (US).

#### Research Coverage

This report studies the wound care market based on product, wound type, end user, and country. The report also studies factors (such as drivers, restraints, opportunities, and challenges) affecting market growth and provides details of the competitive landscape for market leaders. Furthermore, the report analyzes micro markets with respect to their individual growth trends. It forecasts the revenue of the market segments with respect to five major regions (and the respective countries in these regions).

#### Reasons to Buy the Report

The report will enable established firms as well as entrants/smaller firms to gauge the pulse of the market, which, in turn, would help them to garner a larger market share. Firms purchasing the report could use one or a combination of the strategies mentioned below to strengthen their market presence.

**Scotts International. EU Vat number: PL 6772247784**

www.scotts-international.com

This report provides insights on the following pointers:

- Analysis of key drivers (growing geriatric population, increasing cases of traumatic injuries, growing prevalence of chronic diseases rising incidence of burn injuries, rising use of regenerative medicine for wound management, and government initiatives and reimbursement policies), restraints (high cost of advanced wound care products, risks associated with use of advanced wound care products and antimicrobial resistance challenges), opportunities (Growth opportunities in emerging economies, technological advancement in wound care, and home-care optimized solutions), challenges (lack of trained healthcare professionals, Limited awareness in underdeveloped regions, and data security and privacy concerns)
- Market Penetration: Comprehensive information on the product portfolios offered by the top players in the wound care market
- Product Development/Innovation: Detailed insights on the upcoming trends, R&D activities, and product launches in the wound care market
- Market Development: Comprehensive information on lucrative emerging regions
- Market Diversification: Exhaustive information about new products, growing geographies, and recent developments in the wound care market
- Competitive Assessment: In-depth assessment of market segments, growth strategies, revenue analysis, and products of the leading market players

## **Table of Contents:**

- 6.2.4 BIOLOGICAL SKIN SUBSTITUTES 164
  - 6.2.4.1 Human donor tissue-derived products 167
    - 6.2.4.1.1 High efficacy of human donor tissue-derived products to support market demand 167
    - 6.2.4.2 Acellular animal-derived products 170
      - 6.2.4.2.1 Recognition of importance of ECM in wound treatment to lead to development of acellular wound care biologics 170
    - 6.2.4.3 Biosynthetic products 172
      - 6.2.4.3.1 Increased bioburden of infected wounds to lead to development of biosynthetic wound care products 172
- 6.2.5 TOPICAL AGENTS 175
  - 6.2.5.1 Cost-effectiveness and ease of use of topical agents in home care settings to drive demand 175
- 6.3 SURGICAL WOUND CARE PRODUCTS 178
  - 6.3.1 SUTURES 180
    - 6.3.1.1 High tensile strength of sutures to drive market 180
  - 6.3.2 TISSUE ADHESIVES, SEALANTS, AND GLUES 183
    - 6.3.2.1 Fibrin-based sealants 186
      - 6.3.2.1.1 Fibrin-based sealants replicate final stages of body's natural blood-clotting process 186
    - 6.3.2.2 Synthetic adhesives 189
      - 6.3.2.2.1 Synthetic adhesives have additional sealing properties than traditional staples 189
    - 6.3.2.3 Collagen-based sealants 191
      - 6.3.2.3.1 Collagen-based sealants are primarily used in surgical procedures to support hemostasis 191
  - 6.3.3 STAPLERS 194
    - 6.3.3.1 Staple lines are consistent and less likely to leak blood or air 194
- 6.4 TRADITIONAL WOUND CARE PRODUCTS 196
  - 6.4.1 FIXATIONS 199
    - 6.4.1.1 Fixation materials ensure dressings, wound pads, and compresses stay securely in place 199
  - 6.4.2 BANDAGES 201
    - 6.4.2.1 Wide usage of bandages to support market growth 201
  - 6.4.3 GAUZES 204
    - 6.4.3.1 Wide usage of gauzes in surgeries and wound packing to propel market growth 204
  - 6.4.4 FIRST AID PLASTERS 206
    - 6.4.4.1 Need for rapid wound management and protection to propel adoption 206
  - 6.4.5 ABSORBENT PADS 209
    - 6.4.5.1 Wide usage of absorbent pads in wound dressing and exudate management to drive market 209
