- Enterprise User Price \$1600.00

Report description:

According to ConsTrack360, the cement market in France is expected to grow by 6.3% annually to reach US\$1,721.9 million in 2025.

The cement market in the country recorded strong growth during 2020-2024, achieving a CAGR of 7.0%. Growth momentum is expected to remain positive, with the market projected to expand at a CAGR of 5.9% during 2025-2029. By the end of 2029, the cement market is projected to expand from its 2024 value of US\$1,619.9 million to approximately US\$2,169.4 million.

The cement industry in France is undergoing structural recalibration amid stagnating residential construction, strict environmental mandates, and increased emphasis on local decarbonization strategies. While demand remains subdued in certain private segments, it is being partially offset by public infrastructure and retrofitting initiatives aligned with national climate targets. Major producers are accelerating the transition toward low-carbon cement, expanding co-processing capabilities, and adopting digital process control to reduce emissions and optimize energy use. Government regulations under France's RE2020 framework are reshaping product development and procurement priorities. At the same time, challenges around energy costs, carbon taxation, and labor availability are constraining operational margins and capex planning.

Going forward, industry competitiveness will hinge on firms' ability to meet evolving environmental standards, secure low-emission supply chains, and deliver certified green products to an increasingly sustainability-conscious market. France's cement industry is shifting from traditional production models toward a sustainability-centric, digitally-enabled framework. Regulatory pressure, ESG expectations, and public procurement standards are converging to create both challenges and opportunities for forward-looking producers. Firms that invest in emissions reduction technologies, expand SCM use, and digitize

www.scotts-international.com

production and logistics systems are more likely to secure market share and policy alignment. Regional adaptation, stakeholder partnerships, and cross-sector collaboration will also be key to overcoming labor, fuel, and regulatory constraints. With the right balance of innovation, compliance, and execution, France's cement sector can support the nation's climate and infrastructure ambitions while ensuring industrial resilience in a changing market environment.

Demand Trends Are Shifting Toward Public Works and Sustainable Renovations

- **Public Infrastructure and Urban Renewal Are Stabilizing Cement Consumption:** State-led investments under France's recovery plan are supporting transport upgrades, educational facilities, and energy-efficient retrofits. Projects such as the Grand Paris Express, hospital modernization, and public housing renovations are providing stable demand for low-carbon cement blends. Lafarge and EQIOM (CRH) are focusing dispatches on these initiatives, aligning logistics with priority regions like Ile-de-France and Auvergne-Rhone-Alpes.
- **New Residential Construction is Slowing Amid Permitting Bottlenecks:** Private housing starts declined further in early 2024 due to high borrowing costs and complex environmental approval procedures. Developers are delaying new builds, especially in suburban zones, impacting demand for traditional bagged cement formats. Ciments Calcia reported a reallocation of volumes from private urban projects to state-funded refurbishment programs.
- **Green Retrofit Incentives Are Fueling Selective Product Demand:** Tax credits and subsidies under France's "MaPrimeRenov" scheme have boosted renovation activity, particularly for energy-efficient insulation and structural upgrades. Blended cement with lower embodied carbon is being increasingly used in these retrofits, especially in government-led projects.

Partnerships and Innovation are Driving Green Transition and Process Efficiency

- **Low-Carbon Cement Development is Being Prioritized Through Industry Alliances:** Holcim France launched its ECOPlanet range of low-carbon cement blends in 2024, aligning with the RE2020 standard. EQIOM has partnered with construction firms and government bodies to pilot calcined clay cement trials for public sector buildings in northern France. These product developments are being supported by sectoral collaboration with the French Building Federation (FFB) and ADEME.
- **Carbon Capture and Utilization Projects Are Advancing:** The GO4Zero project, co-led by Ciments Calcia and Air Liquide, aims to install full-scale CCU infrastructure at the Airvault plant by 2025. The initiative is backed by European and French funding frameworks and is considered a model for deep decarbonization in the cement sector.
- **Digital Process Optimization is Enhancing Environmental Compliance:** Firms are scaling up digital twin models, automated kiln control, and real-time emissions monitoring to comply with France's evolving air quality laws. Holcim and Lafarge sites in Normandie and Nouvelle-Aquitaine are integrating AI-based tools to reduce energy intensity per ton of cement.

Production is Impacted by Energy Volatility, Carbon Pricing, and Labor Constraints

- **Electricity and Carbon Costs are Eroding Profit Margins:** High energy prices, combined with increased carbon pricing under the EU ETS and national schemes, are elevating the cost base of cement production. French plants are particularly affected due to reliance on electricity-intensive grinding and drying processes.
- **Workforce Shortages Are Delaying Modernization Efforts:** Difficulty in recruiting skilled maintenance technicians and automation specialists has led to delays in equipment upgrades and predictive maintenance rollouts. Regional plants in Brittany and Occitanie have faced staffing challenges in implementing digital retrofits.
- **Clinker Supply Adjustments Are Needed to Meet Emissions Targets:** Government pressure to reduce clinker ratios is encouraging the use of fly ash, slag, and calcined clay, though regional availability varies. In 2024, Lafarge invested in modifying its Saint-Pierre-La-Cour facility to accommodate increased SCM (supplementary cementitious material) use.

The Outlook is Positively Aligned with Sustainability Targets and EU Recovery Funding

- **Decarbonization Policies Will Drive Product and Process Investment:** RE2020 mandates a reduced carbon footprint for all new construction materials, accelerating the shift toward low-clinker cement. Producers with certified low-carbon offerings and transparent supply chain disclosures are gaining preference in public tenders.
- **EU and National Green Funds Will Support Modernization:** The French government's stimulus and the EU Green Deal provide

www.scotts-international.com

financing incentives for digital upgrades, waste co-processing, and carbon capture adoption. Companies are actively applying for grants to retrofit legacy plants with advanced emission control systems and renewable energy integration.

- Export Opportunities Remain Limited but Strategically Relevant: While France is not a major cement exporter, excess capacity in certain regions is being redirected to Belgium, Luxembourg, and North Africa. However, cross-border trade remains constrained by regulatory compliance differences and transport cost competitiveness.

Risks Are Intensifying Around Regulatory Pressure, Logistics, and Energy Dependence

- Environmental Regulation Non-Compliance Could Lead to Penalties and Market Exclusion: Plants failing to meet RE2020 and EU taxonomy standards risk disqualification from public procurement opportunities. New lifecycle emissions tracking requirements are pushing firms to invest rapidly in environmental monitoring and data systems.

- Transport Disruptions Are Impacting Regional Distribution Reliability: Strikes and protests in early 2024 affected rail and port operations, disrupting raw material deliveries and cement dispatches from northern France. Firms have begun diversifying transport modes and increasing local stockpiles to buffer against such events.

- Fuel Mix Transition Faces Infrastructure and Permitting Delays: Transitioning to alternative fuels like biomass or RDF is slowed by limited pre-processing infrastructure and lengthy environmental approvals. Local community resistance in certain municipalities has further delayed waste-processing facility expansions.

This report provides a detailed data-centric analysis of the the cement industry in France, covering market opportunities and analysis across a range of the cement domains. With over 80+ KPIs at the country level, this report provides a comprehensive understanding of the cement market dynamics, market size and forecast, and market share statistics.

ConsTrack360's research methodology is based on industry best practices. Its unbiased analysis leverages a proprietary analytics platform to offer a detailed view of emerging business and investment market opportunities.

Table of Contents:

1. About this Report

- 1.1. Summary
- 1.2. Methodology
- 1.3. Definition
- 1.4. Disclaimer

2. France Cement Industry Dynamics and Growth Prospects

- 2.1. France Total Cement Industry Market Size and Forecast, 2020 - 2029

3. France Cement Market Value Dynamics by Type of Cement

- 3.1. France Market Share Analysis by Type of Cement, 2024
- 3.2. France Portland Cement Market Size and Forecast, 2020 - 2029
- 3.3. France Blended Cement Market Size and Forecast, 2020 - 2029
- 3.4. France Specialty Cement Market Size and Forecast, 2020 - 2029
- 3.5. France Green Cement Market Size and Forecast, 2020 - 2029

4. France Blended Cement Type Demand Analysis and Outlook by Value

- 4.1. France Market Share Analysis by Blended Cement Type, 2024
- 4.2. France Type IS (X), Portland-Slag Cement Market Size and Forecast, 2020 - 2029
- 4.3. France Type IP (X), Portland-Pozzolan Cement Market Size and Forecast, 2020 - 2029
- 4.4. France IL (X), Portland-Limestone Cement Market Size and Forecast, 2020 - 2029
- 4.5. France Type IT, Ternary Blended Cement Market Size and Forecast, 2020 - 2029

5. France Specialty Cement Type Demand Analysis and Outlook by Value
 - 5.1. France Market Share Analysis by Specialty Cement Type, 2024
 - 5.2. France Rapid Hardening Cement Market Size and Forecast, 2020 - 2029
 - 5.3. France High Alumina Cement Market Size and Forecast, 2020 - 2029
 - 5.4. France White Cement Market Size and Forecast, 2020 - 2029
 - 5.5. France Sulphate Resistant Cement Market Size and Forecast, 2020 - 2029
 - 5.6. France Other Type of Cement Market Size and Forecast, 2020 - 2029

6. France Cement Market Dynamics by Market Value
 - 6.1. France Market Share Analysis by Cement Markets, 2024
 - 6.2. France Cement in Residential Buildings Market Size and Forecast, 2020 - 2029
 - 6.3. France Cement in Non-residential Buildings Market Size and Forecast, 2020 - 2029
 - 6.4. France Cement in Infrastructure & Other Markets Size and Forecast, 2020 - 2029

7. France Residential Buildings Cement Market Demand Analysis and Outlook by Value
 - 7.1. France Market Share Analysis by Residential Buildings Cement Market, 2024
 - 7.2. France Cement in Multi Family Market Size and Forecast, 2020 - 2029
 - 7.3. France Cement in Single Family Market Size and Forecast, 2020 - 2029

8. France Non-Residential Buildings Cement Market Demand Analysis and Outlook by Value
 - 8.1. France Market Share Analysis by Non-Residential Buildings Cement Market, 2024
 - 8.2. France Cement in Commercial Construction Market Size and Forecast, 2020 - 2029
 - 8.3. France Cement in Industrial Construction Market Size and Forecast, 2020 - 2029
 - 8.4. France Cement in Institutional Construction Market Size and Forecast, 2020 - 2029

9. France Infrastructure & Other Cement Market Demand Analysis and Outlook by Value
 - 9.1. France Market Share Analysis by Infrastructure & Other Cement Market, 2024

10. France Non-Residential Commercial Construction Cement Market Demand Analysis and Outlook by Value
 - 10.1. France Cement Market Share Analysis by Non-Residential Commercial Construction Market, 2024
 - 10.2. France Cement in Office Buildings Market Size and Forecast, 2020 - 2029
 - 10.3. France Cement in Retail Buildings Market Size and Forecast, 2020 - 2029
 - 10.4. France Cement in Hospitality Buildings Market Size and Forecast, 2020 - 2029
 - 10.5. France Cement in Restaurant Market Size and Forecast, 2020 - 2029
 - 10.6. France Cement in Sports Facilities Market Size and Forecast, 2020 - 2029
 - 10.7. France Cement in Other Market Size and Forecast, 2020 - 2029

11. France Non-Residential Industrial Construction Cement Market Demand Analysis and Outlook by Value
 - 11.1. France Cement Market Share Analysis by Non-Residential Industrial Construction Market, 2024
 - 11.2. France Cement in Manufacturing Plants Market Size and Forecast, 2020 - 2029
 - 11.3. France Cement in Chemical & Pharmaceutical Market Size and Forecast, 2020 - 2029
 - 11.4. France Cement in Metal & Material Processing Market Size and Forecast, 2020 - 2029

12. France Non-Residential Institutional Construction Cement Market Demand Analysis and Outlook by Value
 - 12.1. France Cement Market Share Analysis by Non-Residential Institutional Construction Market, 2024
 - 12.2. France Cement in Healthcare Construction Market Size and Forecast, 2020 - 2029
