- Multi User Price \$1400.00
- Enterprise User Price \$1600.00

Report description:

According to ConsTrack360, the cement market in Vietnam is expected to grow by 6.6% annually to reach US\$4,122.1 million in 2025.

The cement market in the country recorded strong growth during 2020-2024, achieving a CAGR of 8.3%. Growth momentum is expected to remain positive, with the market projected to expand at a CAGR of 6.3% during 2025-2029. By the end of 2029, the cement market is projected to expand from its 2024 value of US\$3,865.4 million to approximately US\$5,256.0 million.

Vietnam's cement industry is navigating a turbulent period characterized by sluggish domestic demand, export market dependence, and growing energy and environmental pressures. While the country remains one of the world's leading cement exporters, softening construction activity and regional overcapacity are constraining price realization and profitability. Amid these challenges, leading players are accelerating sustainability investments, diversifying export routes, and deploying energy efficiency technologies. Government policy is increasingly geared toward emissions reduction and industrial modernization. The medium-term industry outlook hinges on balancing environmental mandates with export competitiveness and domestic market revival. Vietnam's cement industry, once driven by domestic construction booms, is now realigning around export resilience, regulatory compliance, and sustainable innovation. The sector's next phase of growth will come from its ability to diversify markets, adopt circular practices, and meet environmental standards both domestically and in export destinations.

Firms that invest in green cement technology, waste-to-energy solutions, and integrated digital operations will gain long-term competitive advantage. Equally important will be navigating Vietnam's evolving regulatory framework and capitalizing on government stimulus aimed at construction sector revitalization.

With strategic investment and policy coordination, Vietnam's cement sector can remain a vital contributor to the regional construction materials trade and national industrial sustainability goals.

Sluggish Domestic Demand and Export Reliance Define Market Dynamics

- Domestic Construction Slowdown Has Impacted Cement Consumption: The real estate sector has slowed sharply due to tightened credit, bond market volatility, and delayed housing projects especially in Ho Chi Minh City and Hanoi. Cement demand from private housing and commercial developers has declined, leading to excess inventory and reduced utilization.
- Public Infrastructure Spending Offers Limited Offset: While the government has initiated highway and metro projects under its 2021-2025 economic plan, execution delays and fragmented contractor activity have limited bulk cement uplift. Key infrastructure builds like the North-South Expressway are generating regional demand but are insufficient to offset the broader demand gap.
- Exports Remain a Lifeline but Are Facing Pricing and Volume Pressure: Major producers like VICEM and Vissai rely heavily on clinker and cement exports to the Philippines, China, and Bangladesh. In 2024, export volumes were affected by falling demand in China and increased freight rates to South Asia, pressuring margins despite volume stability.

Vertical Integration and Green Partnerships Are Emerging as Competitive Levers

- Integrated Operations Are Supporting Cost Management: Players like Tan Thang Cement and Ha Tien 1 have leveraged integrated production models with captive limestone quarries and on-site energy generation. This allows better control over cost per ton, especially amid volatile coal and fuel prices.
- Green Cement and Low-Carbon Products Are Gaining Policy Attention: The Ministry of Construction is supporting the shift to low-clinker cement and greater use of blended materials like fly ash, slag, and calcined clay. Some companies have begun offering green-labelled cement products aimed at LEED and EDGE-certified construction projects.
- International Development Partnerships Are Catalyzing Innovation: In 2023, several Vietnamese cement firms partnered with international development organizations and carbon advisory firms to pilot emissions tracking and SCM optimization. These projects aim to align Vietnamese cement exports with global low-carbon procurement standards.

Production Is Impacted by Fuel Costs, Environmental Mandates, and Capacity Pressures

- Rising Coal and Power Costs Are Reducing Profitability: The industry remains heavily reliant on imported coal, which saw price volatility in 2023-2024, raising kiln operation costs. Power tariffs have also risen, particularly for plants in the northern provinces, prompting firms to explore WHR systems and solar rooftop installations.
- Environmental Regulations Are Increasing Capital Needs: New government emissions standards require investments in dust and NOx control technologies, particularly for older kilns. Some producers are facing delayed expansion plans due to slow permitting tied to environmental impact assessments.
- Overcapacity and Plant Fragmentation Are Pressuring the Market: Vietnam's installed cement capacity exceeds 110 million tons annually, far outpacing domestic demand of under 70 million tons. This has led to price undercutting, especially among smaller and unbranded regional producers struggling with export access.

Moderate Outlook Tied to Export Realignment and Domestic Policy Recovery

- Government Stimulus and Credit Normalization May Revive Domestic Demand: The government is pursuing real estate bond market reform and construction stimulus packages expected to unlock stalled housing developments in 2025. Urban development initiatives in Can Tho, Da Nang, and satellite provinces are anticipated to generate incremental cement demand.
- Export Diversification Into Africa and South Asia Is Underway: Firms are actively exploring new export markets like Kenya, Mozambique, and Sri Lanka to reduce reliance on China and the Philippines. However, freight cost fluctuations and competition from Middle Eastern and South Korean producers remain a constraint.
- Sustainability and Technology Adoption Will Drive Market Positioning: Producers investing in low-emissions cement, energy recovery, and automated logistics are better positioned for government-backed infrastructure projects. Adoption of digital quality control, emissions monitoring, and AI-based fuel optimization is growing among leading manufacturers.

www.scotts-international.com

Risks Are Elevated Across Regulatory, Economic, and Trade Dimensions

- Policy Uncertainty and Permit Delays Are Slowing Investment: Shifts in environmental policy, including stricter quarry regulations and mandatory emissions audits, are delaying new capacity approvals. Smaller firms face operational risk from abrupt regulatory enforcement without access to transition funding.
- Credit and Liquidity Constraints in the Construction Sector Remain Unresolved: Many private developers are facing liquidity issues due to unresolved bad loans and restricted bond issuance since 2022. Cement firms with high exposure to retail bagged cement are seeing slower receivables recovery and rising working capital needs.
- Export Exposure Increases Sensitivity to Global Price Shocks: Global economic uncertainty, shipping congestion, and exchange rate fluctuations continue to impact Vietnam's clinker export viability. Sudden import restrictions or dumping investigations in key markets like the Philippines or Bangladesh could further disrupt trade.

This report provides a detailed data-centric analysis of the the cement industry in Vietnam, covering market opportunities and analysis across a range of the cement domains. With over 80+ KPIs at the country level, this report provides a comprehensive understanding of the cement market dynamics, market size and forecast, and market share statistics.

ConsTrack360's research methodology is based on industry best practices. Its unbiased analysis leverages a proprietary analytics platform to offer a detailed view of emerging business and investment market opportunities.

Table of Contents:

1. About this Report
 - 1.1. Summary
 - 1.2. Methodology
 - 1.3. Definition
 - 1.4. Disclaimer
2. Vietnam Cement Industry Dynamics and Growth Prospects
 - 2.1. Vietnam Total Cement Industry Market Size and Forecast, 2020 - 2029
3. Vietnam Cement Market Value Dynamics by Type of Cement
 - 3.1. Vietnam Market Share Analysis by Type of Cement, 2024
 - 3.2. Vietnam Portland Cement Market Size and Forecast, 2020 - 2029
 - 3.3. Vietnam Blended Cement Market Size and Forecast, 2020 - 2029
 - 3.4. Vietnam Specialty Cement Market Size and Forecast, 2020 - 2029
 - 3.5. Vietnam Green Cement Market Size and Forecast, 2020 - 2029
4. Vietnam Blended Cement Type Demand Analysis and Outlook by Value
 - 4.1. Vietnam Market Share Analysis by Blended Cement Type, 2024
 - 4.2. Vietnam Type IS (X), Portland-Slag Cement Market Size and Forecast, 2020 - 2029
 - 4.3. Vietnam Type IP (X), Portland-Pozzolan Cement Market Size and Forecast, 2020 - 2029
 - 4.4. Vietnam IL (X), Portland-Limestone Cement Market Size and Forecast, 2020 - 2029
 - 4.5. Vietnam Type IT, Ternary Blended Cement Market Size and Forecast, 2020 - 2029
5. Vietnam Specialty Cement Type Demand Analysis and Outlook by Value
 - 5.1. Vietnam Market Share Analysis by Specialty Cement Type, 2024
 - 5.2. Vietnam Rapid Hardening Cement Market Size and Forecast, 2020 - 2029
 - 5.3. Vietnam High Alumina Cement Market Size and Forecast, 2020 - 2029
