Report description:

The Cloud Computing Companies Quadrant is a comprehensive industry analysis that provides valuable insights into the global market for Cloud Computing. This quadrant offers a detailed evaluation of key market players, technological advancements, product innovations, and emerging trends shaping the industry. MarketsandMarkets 360 Quadrants evaluated over 100 companies, of which the Top 35 Cloud Computing Companies were categorized and recognized as quadrant leaders. Cloud computing has transitioned over the past five years from merely a technology enabler to a fundamental element of modern IT strategies. This shift has been propelled by the rapid rise of digital workloads, the demand for real-time analytics, and the necessity for adaptable, cost-effective infrastructure. This evolution has set the stage for ongoing growth as organizations increasingly focus on agility, security, and scalability. As companies move away from outdated systems and on-premises setups, cloud computing has become central to digital transformation strategies across industries.

According to Microsoft, Cloud computing is the delivery of computing services-including servers, storage, databases, networking, software, analytics, and intelligence-over the internet ('the cloud') to offer faster innovation, flexible resources, and economies of scale. You typically pay only for cloud services you use, helping you lower your operating costs, run your infrastructure more efficiently, and scale as your business needs change.

The 360 Quadrant maps the Cloud Computing companies based on criteria such as revenue, geographic presence, growth strategies, investments, and sales strategies for the market presence of the Cloud Computing quadrant. The top criteria for product footprint evaluation included By SERVICE MODEL (IaaS, PaaS, SaaS), By IAAS (Compute, Storage, Networking), By PAAS (Application Development & Integration Platforms, Application Testing & Quality, Analytics & Reporting, Databases & Data Management, Other PaaS), By SAAS (Customer Relationship Management, Enterprise Resource Management, Human Capital Management, Content Management, Collaboration and Productivity Suites, Supply Chain Management, System Infrastructure Software, Other SaaS), By DEPLOYMENT MODEL (Public Cloud, Private Cloud, Hybrid Cloud), By ORGANIZATION SIZE (Large Enterprises, Small & Medium-Sized Enterprises), and By VERTICAL (Banking, Financial Services, and Insurance (Bfsi), Energy & Utilities, Government & Public Sector, Telecommunications, Software & It Services, Healthcare & Life Sciences, Retail & E-Commerce, Manufacturing, Transportation & Logistics, Media & Entertainment, Other Verticals).

Key players in the Cloud Computing market include major global corporations and specialized innovators such as AWS, Microsoft, Google, Oracle, Salesforce, Alibaba Cloud, IBM, SAP, Adobe, Tencent Cloud, Huawei, Hewlett-Packard Enterprise, Dell Technologies, Dropbox, Nutanix, Intuit, Workday, DXC Technology, Broadcom, NTT Data Corporation, Fujitsu, Atos SE, Kyndryl, NEC Corporation, OpenText, BOX, DigitalOcean, OVH Cloud, Cisco, Infor, Sage, Zoho, Epicor, ServiceNow, and Rackspace
