- Enterprisewide Price \$7250.00

**Report description:**

Cerebrospinal Fluid Management Devices Market Research Report by Product (Shunts, Valve, Critical Care Products, Dural Sealants, Others), by Age Group (Pediatric, Adult, Geriatric), by End User (Hospitals, Ambulatory Settings, Research and Academic Institutes, Others), and by Region (Americas, Europe, Asia-Pacific, Middle East & Africa) Forecast till 2027

**Market Overview**

The global cerebrospinal fluid management devices market is projected to reach USD 3,821.61 million by 2027, growing at a CAGR of 5.45% by the forecast year. Cerebrospinal fluid (CSF) management devices are medical tools designed to regulate and control the flow or drainage of CSF in patients with neurological conditions. They are commonly used in disorders such as hydrocephalus, brain injuries, or tumors to prevent excessive fluid buildup and maintain normal pressure in the brain and spinal cord.

The global cerebrospinal fluid management devices market is being greatly influenced by the rapidly growing geriatric population. The elderly are more susceptible to nervous system diseases, i.e., Alzheimer's disease, Parkinson's disease, and stroke. They are dependent on the supply of advanced treatment. As the UN predicts the number of seniors to increase from 125 million to 425 million in 2050, the rise of age-related disorders will inevitably lead to an increase in hospital visits, subsequently raising the demand for effective CSF solutions that can help in handling the occurrence of complications and improving patient outcomes.

**Key Company Development**

**Scotts International. EU Vat number: PL 6772247784**

Natus Medical Incorporated, in October 2017, added more strength to its portfolio via the purchase of the selected neurosurgery business assets of Integra LifeSciences. The transaction encompassed the Camino ICP monitoring product line, the US rights to Integra's fixed pressure shunts, CSF collection systems, Codman's DURAFORM dural graft implant, and standard EVD catheters. This acquisition allowed Natus to enhance its technological capabilities in neurosurgery and reaffirm its commitment to providing the latest solutions. By this step, the company had the possibility to be present in the global cerebrospinal fluid management devices market to a greater extent.

#### Major Players

Key players in the global cerebrospinal fluid management devices market are Medtronic PLC, Natus Medical Incorporated, B. Braun Melsungen AG, Sophysa, IRRAS AB, Moller Medical GmbH, Argi Grup, Longeviti, Integra LifeSciences, Corporation, and Anuncia.

#### Report Attribute□Details

-□Market Size 2019: USD 2,505.13 Million

-□Market Size 2027: USD 3,821.61Million

-□CAGR (2020-2027): 5.45%

-□Base Year: 2019

-□Market Forecast Period: 2020-2027

#### Market Segmentations

-□By Product: Shunts - 5.26%, Critical Care Products - 5.44%.

-□By Age Group: Pediatric - 5.30%, Adult - 5.67%.

-□By End User: Hospitals - 5.41%, Ambulatory Settings - 5.71%.

#### Regional Insights

The Americas are at the forefront of the global CSF management devices market and have the greatest local strengths of a strong medical device manufacturing base, an advanced healthcare infrastructure, and a high uptake of breakthrough technologies. North America led the market in 2019 with USD 705.99 million, supported by Latin America's contribution of USD 213.13 million. Europe is the second biggest market after the US, with the growth mainly led by strong R&D investments, positive government initiatives, and a rising awareness of neurological diseases. The likes of Germany, France, and the UK are still going from strength to strength as the main areas of innovation, which is being fostered by the associations between the manufacturers and the neurosurgeons. Europe recorded strong performance, with Western Europe at USD 543.03 million and Eastern Europe at USD 154.80 million.

The Asia-Pacific region is the fastest-growing market, with the rise of healthcare expenditure being the main driver that has also led to an increase in patient awareness and investments in neurological research. The Asia-Pacific market was driven by China (USD 190.98 million), followed by Japan (USD 125.10 million) and India (USD 98.68 million). The formation of the Hydrocephalus Support Association in Australia is compelling, as it unites the research, treatment, and patient support networks, thereby improving the ecosystem.

The Middle East & Africa contribute the least. The region is showing gradual progress, particularly in the GCC. Rising healthcare investments, favorable regulatory reforms, and partnerships between global manufacturers and regional hospitals are opening growth opportunities. Countries such as Saudi Arabia are positioning themselves as medical hubs, enhancing the adoption of advanced neurosurgical technologies.
