

**Analytical Chemistry Sample Preparation Market - Global Industry Size, Share, Trends, Opportunity, and Forecast, Segmented By Technique (Extraction, Filtration, Precipitation, Centrifugation, Others), By Product (Kits & Reagents, Consumables), By Application (HPLC, LC-MS, GC-MS, MALDI-ToF-MS, ICP-MS, NMR, Others), By End Use (Biopharmaceutical & Biotechnology Companies, Academic & Research Institutes, Contract Research), By End Use (Biopharmaceutical & Biotechnology Companies, Academic & Research Institutes, Contract Research Organizations, Others), By Region and Competition, 2020-2030F**

Market Report | 2025-09-14 | 187 pages | TechSci Research

**AVAILABLE LICENSES:**

- Single User License \$4500.00
- Multi-User License \$5500.00
- Custom Research License \$8000.00

**Report description:**

Market Overview

Global Analytical Chemistry Sample Preparation Market was valued at USD 2.51 Billion in 2024 and is expected to reach USD 3.39 Billion by 2030 with a CAGR of 5.12% during the forecast period.

The Analytical Chemistry Sample Preparation Market plays a crucial role in various industries, including pharmaceuticals, biotechnology, food & beverage, environmental testing, and forensic analysis. Sample preparation is an essential step in analytical workflows, ensuring that complex samples are properly processed for accurate and reliable testing. As analytical techniques advance, the demand for improved sample preparation methods continues to rise, driving innovations in automation, miniaturization, and efficiency.

The growing complexity of analytical samples has significantly contributed to the increasing need for advanced sample preparation techniques. In the pharmaceutical and biotechnology sectors, stringent regulatory requirements from organizations such as the FDA and EMA necessitate precise and reproducible sample preparation methods for drug development and quality control. Additionally, the rising focus on food safety due to contamination risks and regulatory guidelines fuels the adoption of sophisticated sample preparation solutions in the food and beverage industry. Environmental monitoring, where pollutants must be detected at trace levels, also relies on advanced sample preparation tools for reliable analysis.

Automation and high-throughput sample preparation systems have gained traction in recent years, helping laboratories enhance efficiency and reduce human error. Technologies such as solid-phase extraction (SPE), liquid-liquid extraction (LLE), and protein precipitation are being optimized to improve sensitivity and reproducibility. The growing adoption of mass spectrometry and chromatography techniques, which require high-purity samples, further drives the need for enhanced sample preparation methods.

#### Key Market Drivers

##### Expansion of the Pharmaceutical and Biotechnology Sectors

The rapid expansion of the pharmaceutical and biotechnology sectors has significantly fueled the growth of the analytical chemistry sample preparation market. As drug discovery, development, and quality control processes become more sophisticated, the need for precise, accurate, and reproducible analytical techniques has increased. Sample preparation, a critical step in analytical chemistry, ensures that samples are suitable for analysis by removing contaminants, concentrating analytes, and improving detection limits. The increasing complexity of pharmaceutical formulations and biotechnological products has made advanced sample preparation techniques indispensable for ensuring compliance with stringent regulatory requirements.

One of the key drivers of this market growth is the increasing investment in pharmaceutical research and development (R&D). Pharmaceutical companies are continuously working on new drug molecules, biosimilars, and gene therapies, which require high-throughput and sensitive analytical techniques. Liquid chromatography, mass spectrometry, and spectroscopy rely heavily on well-prepared samples to deliver accurate results. Additionally, regulatory agencies such as the U.S. Food and Drug Administration (FDA) and the European Medicines Agency (EMA) mandate rigorous quality control and analytical validation, further driving demand for advanced sample preparation solutions.

The biotechnology industry has also witnessed significant growth, particularly in the fields of personalized medicine, biologics, and cell and gene therapies. These advancements require precise analytical methodologies to characterize complex biomolecules, detect impurities, and ensure product consistency. Techniques such as solid-phase extraction (SPE), liquid-liquid extraction (LLE), and protein precipitation have become essential in the preparation of biological samples before analysis. The increasing focus on biomarker discovery, genomics, and proteomics has further necessitated innovative sample preparation methods capable of handling diverse biological matrices.

The rise in contract research organizations (CROs) and contract development and manufacturing organizations (CDMOs) has contributed to the growing demand for efficient sample preparation technologies. As pharmaceutical and biotechnology companies outsource analytical testing and drug development processes, CROs and CDMOs require robust sample preparation tools to ensure high-quality analytical data. Automation and miniaturization of sample preparation workflows have also gained traction, enabling higher throughput and reducing human error in laboratory settings. In addition to pharmaceutical and biotechnology applications, the expansion of analytical chemistry sample preparation is evident in the growing fields of forensic science, environmental testing, and food safety. However, the pharmaceutical and biotech sectors remain the primary drivers of market growth due to their ever-evolving analytical requirements. As drug pipelines expand and biopharmaceutical innovation accelerates, the demand for cutting-edge sample preparation solutions is expected to rise, making this market an essential component of modern analytical chemistry.

#### Key Market Challenges

##### High Costs of Sample Preparation

One of the primary challenges in the analytical chemistry sample preparation market is the high cost associated with sophisticated sample preparation techniques. Many modern methods, such as solid-phase extraction (SPE), liquid-liquid extraction (LLE), and advanced chromatographic techniques, require expensive consumables, reagents, and instrumentation. Laboratories, especially small-scale facilities and academic institutions, often struggle to afford these high-end technologies, limiting their

**Scotts International. EU Vat number: PL 6772247784**

[www.scotts-international.com](http://www.scotts-international.com)

adoption. Moreover, recurring expenses related to maintenance, calibration, and skilled personnel further add to the overall cost burden.

#### Key Market Trends

##### Growing Importance in Food and Environmental Safety

Another significant trend in the Analytical Chemistry Sample Preparation Market is its expanding role in food and environmental safety. According to the World Health Organization (WHO), an estimated 600 million people—approximately one in ten globally—suffer from foodborne illnesses each year, resulting in 420,000 fatalities annually. Governments and regulatory agencies worldwide are implementing stricter regulations to monitor contaminants in food products and environmental samples. Analytical techniques such as gas chromatography (GC), liquid chromatography (LC), and mass spectrometry (MS) require efficient sample preparation methods to detect trace levels of contaminants such as pesticides, heavy metals, and toxins. This growing need for accurate and efficient testing has led to increased adoption of advanced sample preparation technologies.

#### Key Market Players

- Merck KGaA
- Thermo Fisher Scientific Inc.
- Bio-rad Laboratories Inc.
- Shimadzu Corporation
- Agilent Technologies Inc.
- PerkinElmer U.S. LLC
- Promega Corporation
- Danaher Corporation
- QIAGEN N.V.
- Waters Corporation

#### Report Scope

In this report, the Global Analytical Chemistry Sample Preparation Market has been segmented into the following categories, in addition to the industry trends which have also been detailed below:

##### - Analytical Chemistry Sample Preparation Market, By Technique:

- o Extraction
- o Filtration
- o Precipitation
- o Centrifugation
- o Others

##### - Analytical Chemistry Sample Preparation Market, By Product:

- o Kits & Reagents
- o Instruments & Software
- o Consumables

##### - Analytical Chemistry Sample Preparation Market, By Application:

- o HPLC
- o LC-MS
- o GC-MS
- o MALDI-ToF-MS
- o ICP-MS
- o NMR
- o Others

##### - Analytical Chemistry Sample Preparation Market, By End Use:

- o Biopharmaceutical & Biotechnology Companies
- o Academic & Research Institutes
- o Contract Research Organizations

**Scotts International. EU Vat number: PL 6772247784**

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

o Others

-□ Analytical Chemistry Sample Preparation Market, By Region:

o North America

□ United States

□ Canada

□ Mexico

o Europe

□ France

□ United Kingdom

□ Italy

□ Germany

□ Spain

o Asia Pacific

□ China

□ India

□ Japan

□ Australia

□ South Korea

o South America

□ Brazil

□ Argentina

□ Colombia

o Middle East & Africa

□ South Africa

□ Saudi Arabia

□ UAE

Competitive Landscape

Company Profiles: Detailed analysis of the major companies present in the Global Analytical Chemistry Sample Preparation Market.

Available Customizations:

Global Analytical Chemistry Sample Preparation Market report with the given market data, TechSci Research offers customizations according to a company's specific needs. The following customization options are available for the report:

Company Information
